

KITABU QUEST

Grade 4

AGRICULTURE

● Clear lessons

● Worked examples

● Fun activities

● Real-life problems

KEN CBC aligned draft

GRADE

4

Title Page

KITABU QUEST Grade 4 Agriculture

Kenya CBC content draft for review

Mascot: honeybee

This content-first draft was regenerated from Kitabu curriculum data using a topic-by-topic book plan. It is designed to help learners read, practise, discuss, create, and revise with confidence.

Cover artwork is intentionally deferred until all content has passed review and is marked ready-for-cover.

How To Use This Book

This book helps Grade 4 learners study Agriculture through clear lessons, worked examples, activities, practice, and revision.

Use the inquiry questions to think first. Read the explanation. Try the guided example. Complete the activity. Answer the practice questions. Correct your work and ask for support where needed.

Learn through school-garden practice, observation logs, tool safety, and home projects.

Every unit has a local example, a misconception to avoid, success criteria, and a check for understanding.

Learning Skills In This Book

Each chapter builds knowledge, skills, values, creativity, communication, collaboration, critical thinking, digital literacy, and self-confidence.

Look for these page types: Learn, Example, Activity, Practice, Reflection, Home Link, and Review.

How to study well: read the goal first, underline new words, try the example before reading the answer, discuss with a partner, and correct your work after feedback. Do not skip the reflection questions. They help you notice what you understand and what needs more practice.

Table Of Contents

Use this table of contents to plan your study. Start with the first chapter, but return to earlier pages whenever you need revision.

1. 1.0 Conservation of Resources
2. 2.0 Food Production Processes
3. 3.0 Hygiene Practices
4. 4.0 Production Techniques

After each chapter, complete the chapter review before moving forward. At the end of the book, use the glossary, answer notes, and final project to revise the whole subject.

Chapter: Conservation of Resources

In this chapter you will study Conservation of Resources.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 1.1 Soil Conservation
- 1.2 Water Conservation
- 1.3 Fuel Conservation
- 1.4 Conserving Wild Animals

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Soil Conservation: Lesson Opener

Learning area: Soil Conservation

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Soil Conservation.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Soil Conservation.

By the end of this lesson sequence, you should be able to:

- identify suitable materials for making compost manure
- prepare compost manure for farming
- appreciate importance of compost manure in farming.

Inquiry questions:

- How can composting conserve the environment?

Before reading, write one thing you already know and one question you want this lesson to answer.

Soil Conservation: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Soil Conservation.

The important idea is Soil Conservation. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Soil Conservation. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Soil Conservation
- Conservation

Explain the idea in your own words before attempting the activities.

Soil Conservation: Worked Example

Practical model for Soil Conservation: Making compost safely.

Procedure:

1. Choose a shaded, well-drained site away from drinking water.
2. Layer dry plant material, green plant material, and a little soil or old compost.
3. Moisten the heap lightly; it should be damp, not waterlogged.
4. Turn the heap regularly to add air.
5. Keep plastics, glass, metal, diseased plants, and faecal waste out of the compost.

Hazards: cuts from hidden objects, bad odour from too much water, pests, and disease from unsafe waste.

Quality criteria: correct materials, balanced moisture, regular turning, earthy smell, and dark crumbly compost when ready.

Soil Conservation: Activity

Activity for Soil Conservation: Complete a supervised agriculture procedure card.

Inquiry question: How can composting conserve the environment?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Soil Conservation: Activity And Practice

Practice for Soil Conservation:

1. Carry out or describe a practical task for this outcome: identify suitable materials for making compost manure. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: prepare compost manure for farming. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate importance of compost manure in farming. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to soil conservation and write two useful sentences about it.

Soil Conservation: Outcome Check

Outcome: identify suitable materials for making compost manure

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Soil Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Soil Conservation: Outcome Check

Outcome: prepare compost manure for farming

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Soil Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Soil Conservation: Outcome Check

Outcome: appreciate importance of compost manure in farming.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Soil Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Water Conservation: Lesson Opener

Learning area: Water Conservation

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Water Conservation.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Water Conservation.

By the end of this lesson sequence, you should be able to:

- describe drip irrigation as a way of conserving water
- carry out drip irrigation to conserve water
- appreciate use of drip irrigation to conserve water in farming.

Inquiry questions:

- How do we use drip irrigation to conserve water?

Before reading, write one thing you already know and one question you want this lesson to answer.

Water Conservation: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Water Conservation.

The important idea is Water Conservation. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Water Conservation.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Water Conservation
- Water
- Conservation

Explain the idea in your own words before attempting the activities.

Water Conservation: Worked Example

Practical model for Water Conservation: Water-use plan for a garden bed.

Procedure:

1. Check soil moisture before watering by observing colour and feel.
2. Decide whether the bed needs watering, mulching, drainage, or shade.
3. Water near the root zone and avoid wasting water on paths.
4. Record amount, time, weather, and plant response.
5. Suggest one conservation action such as mulching, watering early, fixing leaks, or using a watering can with a rose.

Hazards: slippery paths, contaminated water, heavy containers, and flooded roots.

Rubric: excellent work links water action to evidence, avoids waste, protects plants, and keeps a useful record.

Water Conservation: Activity

Activity for Water Conservation: Complete a supervised agriculture procedure card.

Inquiry question: How do we use drip irrigation to conserve water?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Water Conservation: Activity And Practice

Practice for Water Conservation:

1. Carry out or describe a practical task for this outcome: describe drip irrigation as a way of conserving water. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: carry out drip irrigation to conserve water. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate use of drip irrigation to conserve water in farming. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to water conservation and write two useful sentences about it.

Water Conservation: Outcome Check

Outcome: describe drip irrigation as a way of conserving water

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Water Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Water Conservation: Outcome Check

Outcome: carry out drip irrigation to conserve water

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Water Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Water Conservation: Outcome Check

Outcome: appreciate use of drip irrigation to conserve water in farming.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Water Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Fuel Conservation: Lesson Opener

Learning area: Fuel Conservation

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Fuel Conservation.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Fuel Conservation.

By the end of this lesson sequence, you should be able to:

- identify types of fuels used at home
- conserve fuels during cooking
- conserving fuel to minimise wastage of resources

Inquiry questions:

- How does reducing fuel wastage conserve our resources?

Before reading, write one thing you already know and one question you want this lesson to answer.

Fuel Conservation: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Fuel Conservation.

The important idea is Fuel Conservation. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Fuel Conservation. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Fuel Conservation
- Conservation

Explain the idea in your own words before attempting the activities.

Fuel Conservation: Worked Example

Practical model for Fuel Conservation: Water-use plan for a garden bed.

Procedure:

1. Check soil moisture before watering by observing colour and feel.
2. Decide whether the bed needs watering, mulching, drainage, or shade.
3. Water near the root zone and avoid wasting water on paths.
4. Record amount, time, weather, and plant response.
5. Suggest one conservation action such as mulching, watering early, fixing leaks, or using a watering can with a rose.

Hazards: slippery paths, contaminated water, heavy containers, and flooded roots.

Rubric: excellent work links water action to evidence, avoids waste, protects plants, and keeps a useful record.

Fuel Conservation: Activity

Activity for Fuel Conservation: Complete a supervised agriculture procedure card.

Inquiry question: How does reducing fuel wastage conserve our resources?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Fuel Conservation: Activity And Practice

Practice for Fuel Conservation:

1. Carry out or describe a practical task for this outcome: identify types of fuels used at home. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: conserve fuels during cooking. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: conserving fuel to minimise wastage of resources. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to fuel conservation and write two useful sentences about it.

Fuel Conservation: Outcome Check

Outcome: identify types of fuels used at home

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Fuel Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Fuel Conservation: Outcome Check

Outcome: conserve fuels during cooking

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Fuel Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Fuel Conservation: Outcome Check

Outcome: conserving fuel to minimise wastage of resources

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Fuel Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Wild Animals: Lesson Opener

Learning area: Conserving Wild Animals

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Wild Animals.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Conserving Wild Animals.

By the end of this lesson sequence, you should be able to:

- identify small wild animals that destroy crops
- construct and use a scarecrow to scare off small wild animals from crops
- living better with small wild animals

Inquiry questions:

- How can we scare off small wild animals from crop enterprises?

Before reading, write one thing you already know and one question you want this lesson to answer.

Conserving Wild Animals: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Wild Animals.

The important idea is Conserving Wild Animals. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Conserving Wild Animals. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Conserving Wild Animals
- Conserving
- Animals

Explain the idea in your own words before attempting the activities.

Conserving Wild Animals: Worked Example

Practical model for Conserving Wild Animals: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Conserving Wild Animals: Activity

Activity for Conserving Wild Animals: Complete a supervised agriculture procedure card.

Inquiry question: How can we scare off small wild animals from crop enterprises?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Conserving Wild Animals: Activity And Practice

Practice for Conserving Wild Animals:

1. Carry out or describe a practical task for this outcome: identify small wild animals that destroy crops. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: construct and use a scarecrow to scare off small wild animals from crops. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: living better with small wild animals. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to conserving wild animals and write two useful sentences about it.

Conserving Wild Animals: Outcome Check

Outcome: identify small wild animals that destroy crops

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Wild Animals: Outcome Check

Outcome: construct and use a scarecrow to scare off small wild animals from crops

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Wild Animals: Outcome Check

Outcome: living better with small wild animals

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conservation of Resources: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Food Production Processes

In this chapter you will study Food Production Processes.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 2.1 Food Production Processes
- 2.2 Food Production Processes
- 2.3 Uses of Domestic Animals
- 2.4 Balanced Meal
- 2.5 Cooking Food Boiling food Shallow frying food

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Direct Sowing of Tiny Seeds: Lesson Opener

Learning area: Direct Sowing of Tiny Seeds

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Direct Sowing of Tiny Seeds.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Direct Sowing of Tiny Seeds.

By the end of this lesson sequence, you should be able to:

- explain and apply direct sowing of tiny seeds using clear examples and practice

Inquiry questions:

- How does direct sowing of tiny seeds enhance food production process?

Before reading, write one thing you already know and one question you want this lesson to answer.

Direct Sowing of Tiny Seeds: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Direct Sowing of Tiny Seeds.

The important idea is Direct Sowing of Tiny Seeds. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Direct Sowing of Tiny Seeds. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Direct Sowing of Tiny Seeds
- Sowing
- Seeds

Explain the idea in your own words before attempting the activities.

Direct Sowing of Tiny Seeds: Worked Example

Practical model for Direct Sowing of Tiny Seeds: Direct sow tiny seeds carefully.

Procedure:

1. Prepare a fine, level seedbed with small soil particles and no large clods.
2. Make shallow drills or marked rows at the spacing taught by the teacher.
3. Mix very tiny seeds with dry sand or fine soil so they spread more evenly.
4. Sow thinly, cover lightly, water gently, and label the row with crop and date.
5. Observe germination, thin overcrowded seedlings, and record what changed.

Hazards: wasting seed, burying tiny seeds too deeply, washing seeds away, using dirty water, and stepping on the seedbed.

Rubric: excellent work shows correct depth, even spacing, gentle watering, clear labelling, and a useful germination record.

Direct Sowing of Tiny Seeds: Activity

Activity for Direct Sowing of Tiny Seeds: Complete a supervised agriculture procedure card.

Inquiry question: How does direct sowing of tiny seeds enhance food production process?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Direct Sowing of Tiny Seeds: Activity And Practice

Practice for Direct Sowing of Tiny Seeds:

1. Carry out or describe a practical task for this outcome: explain and apply direct sowing of tiny seeds using clear examples and practice. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to direct sowing of tiny seeds and write two useful sentences about it.

Direct Sowing of Tiny Seeds: Outcome Check

Outcome: explain and apply direct sowing of tiny seeds using clear examples and practice

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Direct Sowing of Tiny Seeds.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

we grow fruits: Lesson Opener

Learning area: we grow fruits

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to we grow fruits.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on we grow fruits.

By the end of this lesson sequence, you should be able to:

- explain and apply we grow fruits using clear examples and practice

Inquiry questions:

- How do we grow fruits?

Before reading, write one thing you already know and one question you want this lesson to answer.

we grow fruits: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to we grow fruits.

The important idea is we grow fruits. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for we grow fruits. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- we grow fruits

- fruits

Explain the idea in your own words before attempting the activities.

we grow fruits: Worked Example

Practical model for we grow fruits: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

we grow fruits: Activity

Activity for we grow fruits: Complete a supervised agriculture procedure card.

Inquiry question: How do we grow fruits?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

we grow fruits: Activity And Practice

Practice for we grow fruits:

1. Carry out or describe a practical task for this outcome: explain and apply we grow fruits using clear examples and practice. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to we grow fruits and write two useful sentences about it.

we grow fruits: Outcome Check

Outcome: explain and apply we grow fruits using clear examples and practice

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in we grow fruits.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Uses of Domestic Animals: Lesson Opener

Learning area: Uses of Domestic Animals

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Uses of Domestic Animals.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Uses of Domestic Animals.

By the end of this lesson sequence, you should be able to:

- identify types of domestic animals in the community
- relate various domestic animals to their uses
- domestic animals for food production

Inquiry questions:

- How do domestic animals contribute to food production?

Before reading, write one thing you already know and one question you want this lesson to answer.

Uses of Domestic Animals: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Uses of Domestic Animals.

The important idea is Uses of Domestic Animals. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

Uses of Domestic Animals: Activity And Practice

Practice for Uses of Domestic Animals:

1. Carry out or describe a practical task for this outcome: identify types of domestic animals in the community. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: relate various domestic animals to their uses. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: domestic animals for food production. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to uses of domestic animals and write two useful sentences about it.

Uses of Domestic Animals: Outcome Check

Outcome: identify types of domestic animals in the community

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Uses of Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Uses of Domestic Animals: Outcome Check

Outcome: relate various domestic animals to their uses

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Uses of Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Uses of Domestic Animals: Outcome Check

Outcome: domestic animals for food production

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Uses of Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Balanced Meal: Lesson Opener

Learning area: Balanced Meal

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Balanced Meal.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Balanced Meal.

By the end of this lesson sequence, you should be able to:

- explain importance of eating a balanced meal
- select food from different food groups to make a balanced meal
- eating a balanced meal

Inquiry questions:

- How does a balanced meal impact on health?

Before reading, write one thing you already know and one question you want this lesson to answer.

Balanced Meal: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Balanced Meal.

The important idea is Balanced Meal. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Balanced Meal: Activity And Practice

Practice for Balanced Meal:

1. Carry out or describe a practical task for this outcome: explain importance of eating a balanced meal. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: select food from different food groups to make a balanced meal. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: eating a balanced meal. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to balanced meal and write two useful sentences about it.

Balanced Meal: Outcome Check

Outcome: explain importance of eating a balanced meal

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Balanced Meal.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Balanced Meal: Outcome Check

Outcome: select food from different food groups to make a balanced meal

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Balanced Meal.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Balanced Meal: Outcome Check

Outcome: eating a balanced meal

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Balanced Meal.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking Food Boiling food Shallow frying food: Lesson Opener

Learning area: Cooking Food Boiling food Shallow frying food

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking Food Boiling food Shallow frying food.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Cooking Food Boiling food Shallow frying food.

By the end of this lesson sequence, you should be able to:

- describe methods of cooking food
- cook food using different methods
- embrace boiling and shallow frying in food production.

Inquiry questions:

- How can we cook food using boiling and shallow frying methods?

Before reading, write one thing you already know and one question you want this lesson to answer.

Cooking Food Boiling food Shallow frying food: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking Food Boiling food Shallow frying food.

The important idea is Cooking Food Boiling food Shallow frying food. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Cooking Food Boiling food Shallow frying food
- Cooking
- Boiling
- Shallow
- frying

Explain the idea in your own words before attempting the activities.

Cooking Food Boiling food Shallow frying food: Worked Example

Practical model for Cooking Food Boiling food Shallow frying food: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Cooking Food Boiling food Shallow frying food: Activity

Activity for Cooking Food Boiling food Shallow frying food: Complete a supervised agriculture procedure card.

Inquiry question: How can we cook food using boiling and shallow frying methods?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.

Cooking Food Boiling food Shallow frying food: Activity And Practice

Practice for Cooking Food Boiling food Shallow frying food:

1. Carry out or describe a practical task for this outcome: describe methods of cooking food. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: cook food using different methods. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: embrace boiling and shallow frying in food production. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to cooking food boiling food shallow frying food and write two useful sentences about it.

Cooking Food Boiling food Shallow frying food: Outcome Check

Outcome: describe methods of cooking food

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Boiling food Shallow frying food.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking Food Boiling food Shallow frying food: Outcome Check

Outcome: cook food using different methods

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Boiling food Shallow frying food.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking Food Boiling food Shallow frying food: Outcome Check

Outcome: embrace boiling and shallow frying in food production.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Boiling food Shallow frying food.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Food Production Processes: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Hygiene Practices

In this chapter you will study Hygiene Practices.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 3.1 Hygiene Practices
- 3.2 Hygiene Practices
- 3.3 Cleaning Personal Protective Equipment

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

es personal hygiene promote good health: Lesson Opener

Learning area: es personal hygiene promote good health

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to es personal hygiene promote good health.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on es personal hygiene promote good health.

By the end of this lesson sequence, you should be able to:

- practise body cleanliness as a healthy personal hygiene habit

Inquiry questions:

- How does personal hygiene promote good health?

Before reading, write one thing you already know and one question you want this lesson to answer.

es personal hygiene promote good health: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to es personal hygiene promote good health.

The important idea is es personal hygiene promote good health. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for es personal hygiene promote good health.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- es personal hygiene promote good health
- personal
- hygiene
- promote
- health

Explain the idea in your own words before attempting the activities.

es personal hygiene promote good health: Worked Example

Practical model for es personal hygiene promote good health: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

es personal hygiene promote good health: Activity

Activity for es personal hygiene promote good health: Complete a supervised agriculture procedure card.

Inquiry question: How does personal hygiene promote good health?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

es personal hygiene promote good health: Activity And Practice

Practice for es personal hygiene promote good health:

1. Carry out or describe a practical task for this outcome: practise body cleanliness as a healthy personal hygiene habit. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to es personal hygiene promote good health and write two useful sentences about it.

es personal hygiene promote good health: Outcome Check

Outcome: practise body cleanliness as a healthy personal hygiene habit

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in es personal hygiene promote good health.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

we maintain hygiene in the home environment: Lesson Opener

Learning area: we maintain hygiene in the home environment

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to we maintain hygiene in the home environment.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on we maintain hygiene in the home environment.

By the end of this lesson sequence, you should be able to:

- methods used for cleaning home environment, methods to clean home environment, in promoting domestic hygiene.

Inquiry questions:

- How can we maintain hygiene in the home environment?

Before reading, write one thing you already know and one question you want this lesson to answer.

we maintain hygiene in the home environment: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to we maintain hygiene in the home environment.

5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

we maintain hygiene in the home environment: Activity

Activity for we maintain hygiene in the home environment: Complete a supervised agriculture procedure card.

Inquiry question: How can we maintain hygiene in the home environment?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

we maintain hygiene in the home environment: Activity And Practice

Practice for we maintain hygiene in the home environment:

1. Carry out or describe a practical task for this outcome: methods used for cleaning home environment, methods to clean home environment, in promoting domestic hygiene. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to we maintain hygiene in the home environment and write two useful sentences about it.

we maintain hygiene in the home environment: Outcome Check

Outcome: methods used for cleaning home environment, methods to clean home environment, in promoting domestic hygiene.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in we maintain hygiene in the home environment.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cleaning Personal Protective Equipment: Lesson Opener

Learning area: Cleaning Personal Protective Equipment

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cleaning Personal Protective Equipment.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Cleaning Personal Protective Equipment.

By the end of this lesson sequence, you should be able to:

- identify personal protective equipment in day to day life
- clean personal protective equipment for hygiene purposes
- appreciate clean personal protective equipment in promoting hygiene.

Inquiry questions:

- How does cleaning of personal protective equipment promote hygiene?

Before reading, write one thing you already know and one question you want this lesson to answer.

Cleaning Personal Protective Equipment: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cleaning Personal Protective Equipment.

The important idea is Cleaning Personal Protective Equipment. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Cleaning Personal Protective Equipment. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Cleaning Personal Protective Equipment
- Cleaning
- Personal
- Protective
- Equipment

Explain the idea in your own words before attempting the activities.

Cleaning Personal Protective Equipment: Worked Example

Practical model for Cleaning Personal Protective Equipment: Tool selection and maintenance check.

Procedure:

1. Name the agriculture task and choose the correct tool for it.
2. Inspect the handle, blade, joint, edge, or moving part before use.
3. Use the tool with safe spacing and the correct body position.
4. Clean, dry, oil, sharpen, or store the tool as appropriate after use.
5. Record one fault found and the safe maintenance action taken.

Hazards: cuts, loose handles, rust, poor storage, and using the wrong tool.

Rubric: excellent work matches tool to task, checks safety before use, maintains the tool correctly, and records the result.

Cleaning Personal Protective Equipment: Activity

Activity for Cleaning Personal Protective Equipment: Complete a supervised agriculture procedure card.

Inquiry question: How does cleaning of personal protective equipment promote hygiene?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Cleaning Personal Protective Equipment: Activity And Practice

Practice for Cleaning Personal Protective Equipment:

1. Carry out or describe a practical task for this outcome: identify personal protective equipment in day to day life. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: clean personal protective equipment for hygiene purposes. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate clean personal protective equipment in promoting hygiene. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to cleaning personal protective equipment and write two useful sentences about it.

Cleaning Personal Protective Equipment: Outcome Check

Outcome: identify personal protective equipment in day to day life

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cleaning Personal Protective Equipment.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cleaning Personal Protective Equipment: Outcome Check

Outcome: clean personal protective equipment for hygiene purposes

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cleaning Personal Protective Equipment.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cleaning Personal Protective Equipment: Outcome Check

Outcome: appreciate clean personal protective equipment in promoting hygiene.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cleaning Personal Protective Equipment.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Hygiene Practices: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Production Techniques

In this chapter you will study Production Techniques.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 4.1 Making Tacking Stitches

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Making Tacking Stitches: Lesson Opener

Learning area: Making Tacking Stitches

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Making Tacking Stitches.

Curriculum link: This lesson follows the Grade 4 curriculum sequence and focuses on Making Tacking Stitches.

By the end of this lesson sequence, you should be able to:

- identify the types of tacking stitches in sewing
- make an item using tacking stitches
- tacking stitches

Inquiry questions:

- How can we use tacking stitches in making items?

Before reading, write one thing you already know and one question you want this lesson to answer.

Making Tacking Stitches: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Making Tacking Stitches.

The important idea is Making Tacking Stitches. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 4, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Making Tacking Stitches. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Making Tacking Stitches
- Making
- Tacking
- Stitches

Explain the idea in your own words before attempting the activities.

Making Tacking Stitches: Worked Example

Practical model for Making Tacking Stitches: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Making Tacking Stitches: Activity

Activity for Making Tacking Stitches: Complete a supervised agriculture procedure card.

Inquiry question: How can we use tacking stitches in making items?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Making Tacking Stitches: Activity And Practice

Practice for Making Tacking Stitches:

1. Carry out or describe a practical task for this outcome: identify the types of tacking stitches in sewing. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: make an item using tacking stitches. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: tacking stitches. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to making tacking stitches and write two useful sentences about it.

Making Tacking Stitches: Outcome Check

Outcome: identify the types of tacking stitches in sewing

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Making Tacking Stitches.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Making Tacking Stitches: Outcome Check

Outcome: make an item using tacking stitches

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Making Tacking Stitches.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Making Tacking Stitches: Outcome Check

Outcome: tacking stitches

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Making Tacking Stitches.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Production Techniques: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Soil Conservation: Review Clinic 1

Use this review clinic to strengthen a real unit from the book.

Practice context: home or school example connected to Soil Conservation.

1. Re-read the lesson on Soil Conservation and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Water Conservation: Review Clinic 2

Use this review clinic to strengthen a real unit from the book.

Practice context: county or community example connected to Water Conservation.

1. Re-read the lesson on Water Conservation and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: tools/materials are named.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Fuel Conservation: Review Clinic 3

Use this review clinic to strengthen a real unit from the book.

Practice context: partner discussion about Fuel Conservation.

1. Re-read the lesson on Fuel Conservation and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: safety and care are included.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Conserving Wild Animals: Review Clinic 4

Use this review clinic to strengthen a real unit from the book.

Practice context: small project or observation linked to Conserving Wild Animals.

1. Re-read the lesson on Conserving Wild Animals and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Glossary

Use this glossary to revise important words in Agriculture.

- Soil Conservation: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Water Conservation: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Fuel Conservation: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Conserving Wild Animals: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Food Production Processes: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Uses of Domestic Animals: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Balanced Meal: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Cooking Food Boiling food Shallow frying food: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Hygiene Practices: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Cleaning Personal Protective Equipment: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Making Tacking Stitches: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.

Add five more words from your lessons, then write a meaning and one correct example sentence or worked example for each word.

Answer And Teacher Notes

Most questions in this book are open practice tasks. A good answer should:

- respond to the exact question asked;
- use correct vocabulary from Agriculture;
- include a clear example, reason, working, observation, or evidence;
- be neat enough for another learner to follow;
- show correction after feedback.

For calculations, check each step. For language work, check spelling, punctuation, grammar, and meaning. For practical subjects, check safety, materials, observations, and conclusion.

Answer-key guide: Social Studies answers should name the place, people, evidence, meaning, and responsible action. Agriculture answers should name tools, sequence, safety, observation, and care for living things. Creative Arts answers should show planning, technique, safety, improvement, and explanation of choices.

Rubric for self-checking:

- 4: The answer addresses the exact question, uses subject vocabulary correctly, gives evidence or working, and includes a useful check or correction.
- 3: The main answer is correct but one part needs stronger evidence, clearer working, better labels, or a fuller explanation.
- 2: Some understanding is shown, but the answer is incomplete, too general, or hard to follow.
- 1: The answer is guessed, off topic, or missing the evidence needed for the task.

Correction routine: reread the command word, underline the key data or evidence, improve one weak step, and write one sentence explaining why the final answer is reasonable.

Final Project

Create a final project for Agriculture.

Your project must include:

1. A clear title.
2. A real-life problem or question.
3. Evidence from at least three lessons.
4. A drawing, table, map, chart, model, dialogue, performance plan, artwork note, or worked solution.
5. A short reflection explaining what you learned.

Present your project to a classmate, teacher, parent, or study group.
