KEN CBC aligned draft

# Title Page

KITABU QUEST Grade 5 Agriculture

Kenya CBC content draft for review

Mascot: honeybee

This content-first draft was regenerated from Kitabu curriculum data using a topic-by-topic book plan. It is designed to help learners read, practise, discuss, create, and revise with confidence.

Cover artwork is intentionally deferred until all content has passed review and is marked ready-for-cover.

## How To Use This Book

This book helps Grade 5 learners study Agriculture through clear lessons, worked examples, activities, practice, and revision.

Use the inquiry questions to think first. Read the explanation. Try the guided example. Complete the activity. Answer the practice questions. Correct your work and ask for support where needed.

Learn through school-garden practice, observation logs, tool safety, and home projects.

Every unit has a local example, a misconception to avoid, success criteria, and a check for understanding.

## Learning Skills In This Book

Each chapter builds knowledge, skills, values, creativity, communication, collaboration, critical thinking, digital literacy, and self-confidence.

Look for these page types: Learn, Example, Activity, Practice, Reflection, Home Link, and Review.

How to study well: read the goal first, underline new words, try the example before reading the answer, discuss with a partner, and correct your work after feedback. Do not skip the reflection questions. They help you notice what you understand and what needs more practice.

## Table Of Contents

Use this table of contents to plan your study. Start with the first chapter, but return to earlier pages whenever you need revision.

1. 1.0 Conservation of Resources
2. 2.0 Food Production Processes
3. 3.0 Hygiene Practices
4. 4.0 Production Techniques

After each chapter, complete the chapter review before moving forward. At the end of the book, use the glossary, answer notes, and final project to revise the whole subject.

## Chapter: Conservation of Resources

In this chapter you will study Conservation of Resources.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 1.1 Soil Conservation
- 1.2 Water Conservation
- 1.3 Conserving Wild Animals

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

### Soil Conservation: Lesson Opener

Learning area: Soil Conservation

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Soil Conservation.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Soil Conservation.

By the end of this lesson sequence, you should be able to:

- identify sites for soil improvement in the school or community
- construct organic waste pit for soil improvement
- demonstrate use of plant remains for soil improvement.

Inquiry questions:

- How can we improve the soil using suitable organic wastes?

Before reading, write one thing you already know and one question you want this lesson to answer.

### Soil Conservation: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Soil Conservation.

The important idea is Soil Conservation. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Soil Conservation. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Soil Conservation

- Conservation

Explain the idea in your own words before attempting the activities.

## **Soil Conservation: Worked Example**

Practical model for Soil Conservation: Soil observation and improvement.

Procedure:

1. Collect a small soil sample from an approved school-garden spot.
2. Observe colour, texture, moisture, stones, plant remains, and signs of erosion.
3. Record the evidence in a table before suggesting an improvement.
4. Choose one improvement such as mulching, compost, contour planting, cover crops, or safe drainage.
5. Explain how the improvement protects soil fertility, water, or plant growth.

Hazards: sharp objects, dirty hands, unsafe slopes, and contaminated soil.

Rubric: excellent work names the soil evidence, links it to a practical improvement, includes safety, and records observations clearly.

## **Soil Conservation: Activity**

Activity for Soil Conservation: Complete a supervised agriculture procedure card.

Inquiry question: How can we improve the soil using suitable organic wastes?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Soil Conservation: Activity And Practice**

Practice for Soil Conservation:

1. Carry out or describe a practical task for this outcome: identify sites for soil improvement in the school or community. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: construct organic waste pit for soil improvement. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: demonstrate use of plant remains for soil improvement. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to soil conservation and write two useful sentences about it.

## **Soil Conservation: Outcome Check**

Outcome: identify sites for soil improvement in the school or community

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Soil Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Soil Conservation: Outcome Check**

Outcome: construct organic waste pit for soil improvement

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Soil Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Soil Conservation: Outcome Check**

Outcome: demonstrate use of plant remains for soil improvement.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Soil Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Water Conservation: Lesson Opener**

Learning area: Water Conservation

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Water Conservation.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Water Conservation.

By the end of this lesson sequence, you should be able to:

- identify ways of conserving water for household gardening
- practice water conservation within the school or community
- appreciate importance of conserving water in the community.

Inquiry questions:

- How can we conserve soil water in household gardening practices?

Before reading, write one thing you already know and one question you want this lesson to answer.

## **Water Conservation: Learn**

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Water Conservation.

The important idea is Water Conservation. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |  
| --- | --- |  
| Purpose | Why the task is being done. |  
| Tools/materials | Exact items needed for Water Conservation. |  
| Safety and care | Hazard, hygiene action, and care for living things. |  
| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Water Conservation
- Water
- Conservation

Explain the idea in your own words before attempting the activities.

## **Water Conservation: Worked Example**

Practical model for Water Conservation: Water-use plan for a garden bed.

Procedure:

1. Check soil moisture before watering by observing colour and feel.
2. Decide whether the bed needs watering, mulching, drainage, or shade.
3. Water near the root zone and avoid wasting water on paths.
4. Record amount, time, weather, and plant response.
5. Suggest one conservation action such as mulching, watering early, fixing leaks, or using a watering can with a rose.

Hazards: slippery paths, contaminated water, heavy containers, and flooded roots.

Rubric: excellent work links water action to evidence, avoids waste, protects plants, and keeps a useful record.

## Water Conservation: Activity

Activity for Water Conservation: Complete a supervised agriculture procedure card.

Inquiry question: How can we conserve soil water in household gardening practices?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## Water Conservation: Activity And Practice

Practice for Water Conservation:

1. Carry out or describe a practical task for this outcome: identify ways of conserving water for household gardening. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: practice water conservation within the school or community. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate importance of conserving water in the community. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to water conservation and write two useful sentences about it.

## Water Conservation: Outcome Check

Outcome: identify ways of conserving water for household gardening

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Water Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Water Conservation: Outcome Check**

Outcome: practice water conservation within the school or community

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Water Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Water Conservation: Outcome Check**

Outcome: appreciate importance of conserving water in the community.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Water Conservation.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Conserving Wild Animals: Lesson Opener**

Learning area: Conserving Wild Animals

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Wild Animals.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Conserving Wild Animals.

By the end of this lesson sequence, you should be able to:

- identify ways of repelling wild animals to avoid damage of property
- repel wild animals to avoid destruction of property
- appreciate importance of living better with wild animals.

Inquiry questions:

- How can we repel wild animals to avoid destruction of property?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Conserving Wild Animals: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Wild Animals.

The important idea is Conserving Wild Animals. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Conserving Wild Animals. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Conserving Wild Animals
- Conserving
- Animals

Explain the idea in your own words before attempting the activities.

## Conserving Wild Animals: Worked Example

Practical model for Conserving Wild Animals: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

## **Conserving Wild Animals: Activity**

Activity for Conserving Wild Animals: Complete a supervised agriculture procedure card.

Inquiry question: How can we repel wild animals to avoid destruction of property?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Conserving Wild Animals: Activity And Practice**

Practice for Conserving Wild Animals:

1. Carry out or describe a practical task for this outcome: identify ways of repelling wild animals to avoid damage of property. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: repel wild animals to avoid destruction of property. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate importance of living better with wild animals. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to conserving wild animals and write two useful sentences about it.

## **Conserving Wild Animals: Outcome Check**

Outcome: identify ways of repelling wild animals to avoid damage of property

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Conserving Wild Animals: Outcome Check**

Outcome: repel wild animals to avoid destruction of property

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Conserving Wild Animals: Outcome Check**

Outcome: appreciate importance of living better with wild animals.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Conservation of Resources: Chapter Review**

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

## **Chapter: Food Production Processes**

In this chapter you will study Food Production Processes.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 2.1 Growing Vegetables
- 2.2 Uses of Domestic Animals
- 2.3 Food Production Processes
- 2.4 Food Nutrients
- 2.5 Cooking Food Dry Fat Frying Deep Frying

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

## **Growing Vegetables: Lesson Opener**

Learning area: Growing Vegetables

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Growing Vegetables.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Growing Vegetables.

By the end of this lesson sequence, you should be able to:

- identify gardening practices in growing vegetables
- establish a nursery bed for vegetables
- care for vegetable seedlings after transplanting
- vegetables in provision of healthy meals

Inquiry questions:

- How does growing vegetables contribute to food production?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Growing Vegetables: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Growing Vegetables.

The important idea is Growing Vegetables. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Growing Vegetables. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Growing Vegetables
- Growing
- Vegetables

Explain the idea in your own words before attempting the activities.

## Growing Vegetables: Worked Example

Practical model for Growing Vegetables: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

## **Growing Vegetables: Activity**

Activity for Growing Vegetables: Complete a supervised agriculture procedure card.

Inquiry question: How does growing vegetables contribute to food production?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Growing Vegetables: Activity And Practice**

Practice for Growing Vegetables:

1. Carry out or describe a practical task for this outcome: identify gardening practices in growing vegetables. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: establish a nursery bed for vegetables. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: care for vegetable seedlings after transplanting. List materials, steps, safety checks, and how you will judge quality.
4. Carry out or describe a practical task for this outcome: vegetables in provision of healthy meals. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to growing vegetables and write two useful sentences about it.

## **Growing Vegetables: Outcome Check**

Outcome: identify gardening practices in growing vegetables

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Growing Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Growing Vegetables: Outcome Check**

Outcome: establish a nursery bed for vegetables

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Growing Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Growing Vegetables: Outcome Check**

Outcome: care for vegetable seedlings after transplanting

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Growing Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Uses of Domestic Animals: Lesson Opener**

Learning area: Uses of Domestic Animals

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Uses of Domestic Animals.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Uses of Domestic Animals.

By the end of this lesson sequence, you should be able to:

- identify uses of various domestic animals in food production processes
- relate various domestic animals to their uses
- domestic animals in food production

Inquiry questions:

- How are domestic animals important in food production?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Uses of Domestic Animals: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Uses of Domestic Animals.

The important idea is Uses of Domestic Animals. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Uses of Domestic Animals. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Uses of Domestic Animals
- Domestic
- Animals

Explain the idea in your own words before attempting the activities.

## Uses of Domestic Animals: Worked Example

Practical model for Uses of Domestic Animals: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

## Uses of Domestic Animals: Activity

Activity for Uses of Domestic Animals: Complete a supervised agriculture procedure card.

Inquiry question: How are domestic animals important in food production?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## Uses of Domestic Animals: Activity And Practice

Practice for Uses of Domestic Animals:

1. Carry out or describe a practical task for this outcome: identify uses of various domestic animals in food production processes. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: relate various domestic animals to their uses. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: domestic animals in food production. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to uses of domestic animals and write two useful sentences about it.

## **Uses of Domestic Animals: Outcome Check**

Outcome: identify uses of various domestic animals in food production processes

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Uses of Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Uses of Domestic Animals: Outcome Check**

Outcome: relate various domestic animals to their uses

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Uses of Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## Uses of Domestic Animals: Outcome Check

Outcome: domestic animals in food production

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Uses of Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## Preservation and Storage of Cereals and Pulses: Lesson Opener

Learning area: Preservation and Storage of Cereals and Pulses

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Preservation and Storage of Cereals and Pulses.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Preservation and Storage of Cereals and Pulses.

By the end of this lesson sequence, you should be able to:

- preserving cereals and pulses in the locality, pulses for food security, importance of preserving cereals

Inquiry questions:

- How does preservation and storage of cereals and pulses enhance food security?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Preservation and Storage of Cereals and Pulses: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Preservation and Storage of Cereals and Pulses.

The important idea is Preservation and Storage of Cereals and Pulses. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Preservation and Storage of Cereals and Pulses. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Preservation and Storage of Cereals and Pulses
- Preservation
- Storage
- Cereals
- Pulses

Explain the idea in your own words before attempting the activities.

## **Preservation and Storage of Cereals and Pulses: Worked Example**

Practical model for Preservation and Storage of Cereals and Pulses: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

## **Preservation and Storage of Cereals and Pulses: Activity**

Activity for Preservation and Storage of Cereals and Pulses: Complete a supervised agriculture procedure card.

Inquiry question: How does preservation and storage of cereals and pulses enhance food security?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Preservation and Storage of Cereals and Pulses: Activity And Practice**

Practice for Preservation and Storage of Cereals and Pulses:

1. Carry out or describe a practical task for this outcome: preserving cereals and pulses in the locality, pulses for food security, importance of preserving cereals. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to preservation and storage of cereals and pulses and write two useful sentences about it.

## **Preservation and Storage of Cereals and Pulses: Outcome Check**

Outcome: preserving cereals and pulses in the locality, pulses for food security, importance of preserving cereals

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Preservation and Storage of Cereals and Pulses.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## Food Nutrients: Lesson Opener

Learning area: Food Nutrients

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Food Nutrients.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Food Nutrients.

By the end of this lesson sequence, you should be able to:

- identify food nutrients and disorders linked to poor nutrition

Inquiry questions:

- Why is the knowledge of food nutrients important in food production?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Food Nutrients: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Food Nutrients.

The important idea is Food Nutrients. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Food Nutrients. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Food Nutrients
- Nutrients

Explain the idea in your own words before attempting the activities.

## **Food Nutrients: Worked Example**

Practical model for Food Nutrients: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

## **Food Nutrients: Activity**

Activity for Food Nutrients: Complete a supervised agriculture procedure card.

Inquiry question: Why is the knowledge of food nutrients important in food production?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Food Nutrients: Activity And Practice**

Practice for Food Nutrients:

1. Carry out or describe a practical task for this outcome: identify food nutrients and disorders linked to poor nutrition. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to food nutrients and write two useful sentences about it.

## **Food Nutrients: Outcome Check**

Outcome: identify food nutrients and disorders linked to poor nutrition

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Food Nutrients.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Cooking Food Dry Fat Frying Deep Frying: Lesson Opener**

Learning area: Cooking Food Dry Fat Frying Deep Frying

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking Food Dry Fat Frying Deep Frying.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Cooking Food Dry Fat Frying Deep Frying.

By the end of this lesson sequence, you should be able to:

- describe various methods of cooking food
- cook foods using various methods
- embrace dry fat frying and deep frying in food production.

Inquiry questions:

- How can we cook foods using dry fat frying and deep frying methods?

Before reading, write one thing you already know and one question you want this lesson to answer.

## **Cooking Food Dry Fat Frying Deep Frying: Learn**

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking Food Dry Fat Frying Deep Frying.

The important idea is Cooking Food Dry Fat Frying Deep Frying. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Cooking Food Dry Fat Frying Deep Frying. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Cooking Food Dry Fat Frying Deep Frying
- Cooking
- Frying

Explain the idea in your own words before attempting the activities.

## **Cooking Food Dry Fat Frying Deep Frying: Worked Example**

Practical model for Cooking Food Dry Fat Frying Deep Frying: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

## **Cooking Food Dry Fat Frying Deep Frying: Activity**

Activity for Cooking Food Dry Fat Frying Deep Frying: Complete a supervised agriculture procedure card.

Inquiry question: How can we cook foods using dry fat frying and deep frying methods?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Cooking Food Dry Fat Frying Deep Frying: Activity And Practice**

Practice for Cooking Food Dry Fat Frying Deep Frying:

1. Carry out or describe a practical task for this outcome: describe various methods of cooking food. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: cook foods using various methods. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: embrace dry fat frying and deep frying in food production. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to cooking food dry fat frying deep frying and write two useful sentences about it.

## **Cooking Food Dry Fat Frying Deep Frying: Outcome Check**

Outcome: describe various methods of cooking food

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Dry Fat Frying Deep Frying.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Cooking Food Dry Fat Frying Deep Frying: Outcome Check**

Outcome: cook foods using various methods

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Dry Fat Frying Deep Frying.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Cooking Food Dry Fat Frying Deep Frying: Outcome Check**

Outcome: embrace dry fat frying and deep frying in food production.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Dry Fat Frying Deep Frying.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Food Production Processes: Chapter Review**

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

## **Chapter: Hygiene Practices**

In this chapter you will study Hygiene Practices.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 3.1 Good Grooming Practices Dressing Etiquette
- 3.2 Home
- 3.3 Hygiene Practices

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

## **Good Grooming Practices Dressing Etiquette: Lesson Opener**

Learning area: Good Grooming Practices Dressing Etiquette

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Good Grooming Practices Dressing Etiquette.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Good Grooming Practices Dressing Etiquette.

By the end of this lesson sequence, you should be able to:

- describe good grooming as a daily health habit
- practice good grooming as a daily health habit
- appreciate good grooming as a healthy habit.

Inquiry questions:

- How does good grooming promote personal hygiene?

Before reading, write one thing you already know and one question you want this lesson to answer.

## **Good Grooming Practices Dressing Etiquette: Learn**

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Good Grooming Practices Dressing Etiquette.

The important idea is Good Grooming Practices Dressing Etiquette. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |  
| --- | --- |  
| Purpose | Why the task is being done. |  
| Tools/materials | Exact items needed for Good Grooming Practices Dressing Etiquette. |  
| Safety and care | Hazard, hygiene action, and care for living things. |  
| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Good Grooming Practices Dressing Etiquette
- Grooming
- Practices
- Dressing
- Etiquette

Explain the idea in your own words before attempting the activities.

## **Good Grooming Practices Dressing Etiquette: Worked Example**

Practical model for Good Grooming Practices Dressing Etiquette: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

## **Good Grooming Practices Dressing Etiquette: Activity**

Activity for Good Grooming Practices Dressing Etiquette: Complete a supervised agriculture procedure card.

Inquiry question: How does good grooming promote personal hygiene?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Good Grooming Practices Dressing Etiquette: Activity And Practice**

Practice for Good Grooming Practices Dressing Etiquette:

1. Carry out or describe a practical task for this outcome: describe good grooming as a daily health habit. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: practice good grooming as a daily health habit. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate good grooming as a healthy habit. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to good grooming practices dressing etiquette and write two useful sentences about it.

## **Good Grooming Practices Dressing Etiquette: Outcome Check**

Outcome: describe good grooming as a daily health habit

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Good Grooming Practices Dressing Etiquette.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Good Grooming Practices Dressing Etiquette: Outcome Check**

Outcome: practice good grooming as a daily health habit

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Good Grooming Practices Dressing Etiquette.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Good Grooming Practices Dressing Etiquette: Outcome Check**

Outcome: appreciate good grooming as a healthy habit.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Good Grooming Practices Dressing Etiquette.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Home: Lesson Opener**

Learning area: Home

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Home.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Home.

By the end of this lesson sequence, you should be able to:

- from different materials in home environment, surfaces in the home environment, clean home environment to promote

Inquiry questions:

- How do you clean surfaces made from different materials?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Home: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Home.

The important idea is Home. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Home. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Home

Explain the idea in your own words before attempting the activities.

## Home: Worked Example

Practical model for Home: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

## Home: Activity

Activity for Home: Complete a supervised agriculture procedure card.

Inquiry question: How do you clean surfaces made from different materials?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## Home: Activity And Practice

Practice for Home:

1. Carry out or describe a practical task for this outcome: from different materials in home environment, surfaces in the home environment, clean home environment to promote. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to home and write two useful sentences about it.

## Home: Outcome Check

Outcome: from different materials in home environment, surfaces in the home environment, clean home environment to promote

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Home.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## es laundering cotton items promote hygiene: Lesson Opener

Learning area: es laundering cotton items promote hygiene

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to es laundering cotton items promote hygiene.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on es laundering cotton items promote hygiene.

By the end of this lesson sequence, you should be able to:

- a cotton item, personal hygiene, laundry work for hygiene purposes.

Inquiry questions:

- How does laundering cotton items promote hygiene?

Before reading, write one thing you already know and one question you want this lesson to answer.

## es laundering cotton items promote hygiene: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to es laundering cotton items promote hygiene.

The important idea is es laundering cotton items promote hygiene. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for es laundering cotton items promote hygiene. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- es laundering cotton items promote hygiene
- laundering
- cotton
- items
- promote
- hygiene

Explain the idea in your own words before attempting the activities.

## **es laundering cotton items promote hygiene: Worked Example**

Practical model for es laundering cotton items promote hygiene: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

## **es laundering cotton items promote hygiene: Activity**

Activity for es laundering cotton items promote hygiene: Complete a supervised agriculture procedure card.

Inquiry question: How does laundering cotton items promote hygiene?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **es laundering cotton items promote hygiene: Activity And Practice**

Practice for es laundering cotton items promote hygiene:

1. Carry out or describe a practical task for this outcome: a cotton item, personal hygiene, laundry work for hygiene purposes. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to es laundering cotton items promote hygiene and write two useful sentences about it.

## **es laundering cotton items promote hygiene: Outcome Check**

Outcome: a cotton item, personal hygiene, laundry work for hygiene purposes.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in es laundering cotton items promote hygiene.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## Hygiene Practices: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

## Chapter: Production Techniques

In this chapter you will study Production Techniques.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 4.1 Repairing Garments
- 4.2 Constructing Innovative Gardens Horizontal gardens Vertical gardens

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

## Repairing Garments: Lesson Opener

Learning area: Repairing Garments

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Repairing Garments.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Repairing Garments.

By the end of this lesson sequence, you should be able to:

- identify stitches used in repairing garment
- make samples of stitches used to repair garments
- use the stitches to repair gaping seam
- adopt the use of stitches to repair of garments.

Inquiry questions:

- How can we repair garments?

Before reading, write one thing you already know and one question you want this lesson to answer.

## Repairing Garments: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Repairing Garments.

The important idea is Repairing Garments. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |  
| --- | --- |  
| Purpose | Why the task is being done. |  
| Tools/materials | Exact items needed for Repairing Garments. |  
| Safety and care | Hazard, hygiene action, and care for living things. |  
| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Repairing Garments
- Repairing
- Garments

Explain the idea in your own words before attempting the activities.

## Repairing Garments: Worked Example

Practical model for Repairing Garments: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

## Repairing Garments: Activity

Activity for Repairing Garments: Complete a supervised agriculture procedure card.

Inquiry question: How can we repair garments?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Repairing Garments: Activity And Practice**

Practice for Repairing Garments:

1. Carry out or describe a practical task for this outcome: identify stitches used in repairing garment. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: make samples of stitches used to repair garments. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: use the stitches to repair gaping seam. List materials, steps, safety checks, and how you will judge quality.
4. Carry out or describe a practical task for this outcome: adopt the use of stitches to repair of garments. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to repairing garments and write two useful sentences about it.

## **Repairing Garments: Outcome Check**

Outcome: identify stitches used in repairing garment

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Repairing Garments.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Repairing Garments: Outcome Check**

Outcome: make samples of stitches used to repair garments

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Repairing Garments.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Repairing Garments: Outcome Check**

Outcome: use the stitches to repair gaping seam

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Repairing Garments.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Lesson Opener**

Learning area: Constructing Innovative Gardens Horizontal gardens Vertical gardens

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Constructing Innovative Gardens Horizontal gardens Vertical gardens.

Curriculum link: This lesson follows the Grade 5 curriculum sequence and focuses on Constructing Innovative Gardens Horizontal gardens Vertical gardens.

By the end of this lesson sequence, you should be able to:

- distinguish between horizontal and vertical innovative gardening
- construct innovative gardens for growing crops
- adopt the use of innovative gardens in growing crops.

Inquiry questions:

- How can gardening be done on vertical and horizontal spaces?

Before reading, write one thing you already know and one question you want this lesson to answer.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Learn**

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Constructing Innovative Gardens Horizontal gardens Vertical gardens.

The important idea is Constructing Innovative Gardens Horizontal gardens Vertical gardens. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 5, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Constructing Innovative Gardens Horizontal gardens Vertical gardens. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Constructing Innovative Gardens Horizontal gardens Vertical gardens
- Constructing
- Innovative
- Gardens
- Horizontal

Explain the idea in your own words before attempting the activities.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Worked Example**

Practical model for Constructing Innovative Gardens Horizontal gardens Vertical gardens: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Activity**

Activity for Constructing Innovative Gardens Horizontal gardens Vertical gardens: Complete a supervised agriculture procedure card.

Inquiry question: How can gardening be done on vertical and horizontal spaces?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Activity And Practice**

Practice for Constructing Innovative Gardens Horizontal gardens Vertical gardens:

1. Carry out or describe a practical task for this outcome: distinguish between horizontal and vertical innovative gardening. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: construct innovative gardens for growing crops. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: adopt the use of innovative gardens in growing crops. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to constructing innovative gardens horizontal gardens vertical gardens and write two useful sentences about it.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Outcome Check**

Outcome: distinguish between horizontal and vertical innovative gardening

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Constructing Innovative Gardens Horizontal gardens Vertical gardens.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Outcome Check**

Outcome: construct innovative gardens for growing crops

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Constructing Innovative Gardens  
Horizontal gardens Vertical gardens.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Constructing Innovative Gardens Horizontal gardens Vertical gardens: Outcome Check**

Outcome: adopt the use of innovative gardens in growing crops.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Constructing Innovative Gardens  
Horizontal gardens Vertical gardens.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

## **Production Techniques: Chapter Review**

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

## **Soil Conservation: Review Clinic 1**

Use this review clinic to strengthen a real unit from the book.

Practice context: home or school example connected to Soil Conservation.

1. Re-read the lesson on Soil Conservation and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

## **Water Conservation: Review Clinic 2**

Use this review clinic to strengthen a real unit from the book.

Practice context: county or community example connected to Water Conservation.

1. Re-read the lesson on Water Conservation and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: tools/materials are named.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

## **Conserving Wild Animals: Review Clinic 3**

Use this review clinic to strengthen a real unit from the book.

Practice context: partner discussion about Conserving Wild Animals.

1. Re-read the lesson on Conserving Wild Animals and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: safety and care are included.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

## **Growing Vegetables: Review Clinic 4**

Use this review clinic to strengthen a real unit from the book.

Practice context: small project or observation linked to Growing Vegetables.

1. Re-read the lesson on Growing Vegetables and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

## Glossary

Use this glossary to revise important words in Agriculture.

- Soil Conservation: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Water Conservation: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Conserving Wild Animals: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Growing Vegetables: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Uses of Domestic Animals: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Food Production Processes: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Food Nutrients: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Cooking Food Dry Fat Frying Deep Frying: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Good Grooming Practices Dressing Etiquette: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Home: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Hygiene Practices: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Repairing Garments: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Constructing Innovative Gardens Horizontal gardens Vertical gardens: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.

Add five more words from your lessons, then write a meaning and one correct example sentence or worked example for each word.

## Answer And Teacher Notes

Most questions in this book are open practice tasks. A good answer should:

- respond to the exact question asked;
- use correct vocabulary from Agriculture;
- include a clear example, reason, working, observation, or evidence;
- be neat enough for another learner to follow;
- show correction after feedback.

For calculations, check each step. For language work, check spelling, punctuation, grammar, and meaning. For practical subjects, check safety, materials, observations, and conclusion.

Answer-key guide: Social Studies answers should name the place, people, evidence, meaning, and responsible action. Agriculture answers should name tools, sequence, safety, observation, and care for living things. Creative Arts answers should show planning, technique, safety, improvement, and explanation of choices.

Rubric for self-checking:

- 4: The answer addresses the exact question, uses subject vocabulary correctly, gives evidence or working, and includes a useful check or correction.
- 3: The main answer is correct but one part needs stronger evidence, clearer working, better labels, or a fuller explanation.
- 2: Some understanding is shown, but the answer is incomplete, too general, or hard to follow.
- 1: The answer is guessed, off topic, or missing the evidence needed for the task.

Correction routine: reread the command word, underline the key data or evidence, improve one weak step, and write one sentence explaining why the final answer is reasonable.

## Final Project

Create a final project for Agriculture.

Your project must include:

1. A clear title.
2. A real-life problem or question.
3. Evidence from at least three lessons.
4. A drawing, table, map, chart, model, dialogue, performance plan, artwork note, or worked solution.
5. A short reflection explaining what you learned.

Present your project to a classmate, teacher, parent, or study group.
