

KITABU QUEST

Grade 6

AGRICULTURE

● Clear lessons

● Worked examples

● Fun activities

● Real-life problems

GRADE

6

KEN CBC aligned draft

Title Page

KITABU QUEST Grade 6 Agriculture

Kenya CBC content draft for review

Mascot: honeybee

This content-first draft was regenerated from Kitabu curriculum data using a topic-by-topic book plan. It is designed to help learners read, practise, discuss, create, and revise with confidence.

Cover artwork is intentionally deferred until all content has passed review and is marked ready-for-cover.

How To Use This Book

This book helps Grade 6 learners study Agriculture through clear lessons, worked examples, activities, practice, and revision.

Use the inquiry questions to think first. Read the explanation. Try the guided example. Complete the activity. Answer the practice questions. Correct your work and ask for support where needed.

Learn through school-garden practice, observation logs, tool safety, and home projects.

Every unit has a local example, a misconception to avoid, success criteria, and a check for understanding.

Learning Skills In This Book

Each chapter builds knowledge, skills, values, creativity, communication, collaboration, critical thinking, digital literacy, and self-confidence.

Look for these page types: Learn, Example, Activity, Practice, Reflection, Home Link, and Review.

How to study well: read the goal first, underline new words, try the example before reading the answer, discuss with a partner, and correct your work after feedback. Do not skip the reflection questions. They help you notice what you understand and what needs more practice.

Table Of Contents

Use this table of contents to plan your study. Start with the first chapter, but return to earlier pages whenever you need revision.

1. 1.0 Conservation of Resources
2. 2.0 Food Production Processes
3. 3.0 Hygiene Practices
4. 4.0 Production Techniques

After each chapter, complete the chapter review before moving forward. At the end of the book, use the glossary, answer notes, and final project to revise the whole subject.

Chapter: Conservation of Resources

In this chapter you will study Conservation of Resources.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 1.1 Controlling Soil Erosion
- 1.2 Conserving Water: Sunken seedbed Shallow pits
- 1.3 Conserving Wild Animals

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Controlling Soil Erosion: Lesson Opener

Learning area: Controlling Soil Erosion

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Controlling Soil Erosion.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Controlling Soil Erosion.

By the end of this lesson sequence, you should be able to:

- describe types of soil erosion in the environment
- control soil erosion in the environment
- appreciate importance of conserving soil.

Inquiry questions:

- How does erosion control conserve the environment?

Before reading, write one thing you already know and one question you want this lesson to answer.

Controlling Soil Erosion: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Controlling Soil Erosion.

The important idea is Controlling Soil Erosion. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Controlling Soil Erosion. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Controlling Soil Erosion
- Controlling
- Erosion

Explain the idea in your own words before attempting the activities.

Controlling Soil Erosion: Worked Example

Practical model for Controlling Soil Erosion: Soil observation and improvement.

Procedure:

1. Collect a small soil sample from an approved school-garden spot.
2. Observe colour, texture, moisture, stones, plant remains, and signs of erosion.
3. Record the evidence in a table before suggesting an improvement.
4. Choose one improvement such as mulching, compost, contour planting, cover crops, or safe drainage.
5. Explain how the improvement protects soil fertility, water, or plant growth.

Hazards: sharp objects, dirty hands, unsafe slopes, and contaminated soil.

Rubric: excellent work names the soil evidence, links it to a practical improvement, includes safety, and records observations clearly.

Controlling Soil Erosion: Activity

Activity for Controlling Soil Erosion: Complete a supervised agriculture procedure card.

Inquiry question: How does erosion control conserve the environment?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Controlling Soil Erosion: Activity And Practice

Practice for Controlling Soil Erosion:

1. Carry out or describe a practical task for this outcome: describe types of soil erosion in the environment. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: control soil erosion in the environment. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate importance of conserving soil.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to controlling soil erosion and write two useful sentences about it.

Controlling Soil Erosion: Outcome Check

Outcome: describe types of soil erosion in the environment

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Controlling Soil Erosion.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Controlling Soil Erosion: Outcome Check

Outcome: control soil erosion in the environment

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Controlling Soil Erosion.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Controlling Soil Erosion: Outcome Check

Outcome: appreciate importance of conserving soil.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Controlling Soil Erosion.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Water: Sunken seedbed Shallow pits: Lesson Opener

Learning area: Conserving Water: Sunken seedbed Shallow pits

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Water: Sunken seedbed Shallow pits.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Conserving Water: Sunken seedbed Shallow pits.

By the end of this lesson sequence, you should be able to:

- identify types of seedbeds that conserve soil moisture
- prepare different types of seedbeds that conserve soil moisture
- appreciate importance of conserving moisture in a seedbed to increase chances of plants growth.

Inquiry questions:

- How can we prepare a seedbed to conserve moisture?

Before reading, write one thing you already know and one question you want this lesson to answer.

Conserving Water: Sunken seedbed Shallow pits: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Water: Sunken seedbed Shallow pits.

The important idea is Conserving Water: Sunken seedbed Shallow pits. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Conserving Water: Sunken seedbed Shallow pits. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Conserving Water: Sunken seedbed Shallow pits
- Conserving
- Water
- Sunken
- seedbed
- Shallow

Explain the idea in your own words before attempting the activities.

Conserving Water: Sunken seedbed Shallow pits: Worked Example

Practical model for Conserving Water: Sunken seedbed Shallow pits: Soil observation and improvement.

Procedure:

1. Collect a small soil sample from an approved school-garden spot.
2. Observe colour, texture, moisture, stones, plant remains, and signs of erosion.
3. Record the evidence in a table before suggesting an improvement.
4. Choose one improvement such as mulching, compost, contour planting, cover crops, or safe drainage.
5. Explain how the improvement protects soil fertility, water, or plant growth.

Hazards: sharp objects, dirty hands, unsafe slopes, and contaminated soil.

Rubric: excellent work names the soil evidence, links it to a practical improvement, includes safety, and records observations clearly.

Conserving Water: Sunken seedbed Shallow pits: Activity

Activity for Conserving Water: Sunken seedbed Shallow pits: Complete a supervised agriculture procedure card.

Inquiry question: How can we prepare a seedbed to conserve moisture?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Conserving Water: Sunken seedbed Shallow pits: Activity And Practice

Practice for Conserving Water: Sunken seedbed Shallow pits:

1. Carry out or describe a practical task for this outcome: identify types of seedbeds that conserve soil moisture. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: prepare different types of seedbeds that conserve soil moisture. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: appreciate importance of conserving moisture in a seedbed to increase chances of plants growth.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to conserving water: sunken seedbed shallow pits and write two useful sentences about it.

Conserving Water: Sunken seedbed Shallow pits: Outcome Check

Outcome: identify types of seedbeds that conserve soil moisture

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Water: Sunken seedbed Shallow pits.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Water: Sunken seedbed Shallow pits: Outcome Check

Outcome: prepare different types of seedbeds that conserve soil moisture

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Water: Sunken seedbed Shallow pits.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Water: Sunken seedbed Shallow pits: Outcome Check

Outcome: appreciate importance of conserving moisture in a seedbed to increase chances of plants growth.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Water: Sunken seedbed Shallow pits.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Wild Animals: Lesson Opener

Learning area: Conserving Wild Animals

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Wild Animals.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Conserving Wild Animals.

By the end of this lesson sequence, you should be able to:

- identify deterrents that can keep off wild animals from crop and domestic animals
- establish deterrents to keep off wild animals from destroying crops and domestic animals
- acknowledge the importance of deterrents in conserving wild animals.

Inquiry questions:

- How can wild animals be kept away from crops and domestic animals?

Before reading, write one thing you already know and one question you want this lesson to answer.

Conserving Wild Animals: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Wild Animals.

The important idea is Conserving Wild Animals. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Conserving Wild Animals. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Conserving Wild Animals
- Conserving
- Animals

Explain the idea in your own words before attempting the activities.

Conserving Wild Animals: Worked Example

Practical model for Conserving Wild Animals: Crop-care decision card.

Procedure:

1. Identify the crop stage: seed, nursery, transplanted crop, flowering, fruiting, or harvest.
2. Observe spacing, water, weeds, pests, disease signs, soil cover, and plant colour.
3. Choose one safe action: watering, thinning, weeding, mulching, staking, pest scouting, or harvesting.
4. Record why that action fits the evidence seen.
5. Review the result after a set time and note whether plant health improved.

Hazards: sharp tools, unsafe chemicals, dirty water, plant irritation, and overwatering.

Rubric: excellent work uses real observations, names the crop-care action, protects safety, and explains the expected result.

Conserving Wild Animals: Activity

Activity for Conserving Wild Animals: Complete a supervised agriculture procedure card.

Inquiry question: How can wild animals be kept away from crops and domestic animals?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Conserving Wild Animals: Activity And Practice

Practice for Conserving Wild Animals:

1. Carry out or describe a practical task for this outcome: identify deterrents that can keep off wild animals from crop and domestic animals. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: establish deterrents to keep off wild animals from destroying crops and domestic animals. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: acknowledge the importance of deterrents in conserving wild animals.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to conserving wild animals and write two useful sentences about it.

Conserving Wild Animals: Outcome Check

Outcome: identify deterrents that can keep off wild animals from crop and domestic animals

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Wild Animals: Outcome Check

Outcome: establish deterrents to keep off wild animals from destroying crops and domestic animals

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Wild Animals: Outcome Check

Outcome: acknowledge the importance of deterrents in conserving wild animals.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Wild Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conservation of Resources: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Food Production Processes

In this chapter you will study Food Production Processes.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 2.1 Rearing Small Domestic Animals
- 2.2 Preserving Crop Products Fruits Vegetables
- 2.3 Cooking Food Stewing Baking (rubbing-in method)

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Rearing Small Domestic Animals: Lesson Opener

Learning area: Rearing Small Domestic Animals

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Rearing Small Domestic Animals.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Rearing Small Domestic Animals.

By the end of this lesson sequence, you should be able to:

- explain routine practices in rearing of small domestic animals
- rear small domestic animals used as sources of food
- embrace the rearing of small domestic animals used as sources of food.

Inquiry questions:

- How does rearing of animals contribute to food production?

Before reading, write one thing you already know and one question you want this lesson to answer.

Rearing Small Domestic Animals: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Rearing Small Domestic Animals.

The important idea is Rearing Small Domestic Animals. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Rearing Small Domestic Animals. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Rearing Small Domestic Animals
- Rearing
- Small
- Domestic
- Animals

Explain the idea in your own words before attempting the activities.

Rearing Small Domestic Animals: Worked Example

Practical model for Rearing Small Domestic Animals: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Rearing Small Domestic Animals: Activity

Activity for Rearing Small Domestic Animals: Complete a supervised agriculture procedure card.

Inquiry question: How does rearing of animals contribute to food production?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Rearing Small Domestic Animals: Activity And Practice

Practice for Rearing Small Domestic Animals:

1. Carry out or describe a practical task for this outcome: explain routine practices in rearing of small domestic animals. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: rear small domestic animals used as sources of food. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: embrace the rearing of small domestic animals used as sources of food.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to rearing small domestic animals and write two useful sentences about it.

Rearing Small Domestic Animals: Outcome Check

Outcome: explain routine practices in rearing of small domestic animals

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Rearing Small Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Rearing Small Domestic Animals: Outcome Check

Outcome: rear small domestic animals used as sources of food

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Rearing Small Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Rearing Small Domestic Animals: Outcome Check

Outcome: embrace the rearing of small domestic animals used as sources of food.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Rearing Small Domestic Animals.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Preserving Crop Products Fruits Vegetables: Lesson Opener

Learning area: Preserving Crop Products Fruits Vegetables

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Preserving Crop Products Fruits Vegetables.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Preserving Crop Products Fruits Vegetables.

By the end of this lesson sequence, you should be able to:

- describe how to preserve crop produce at home
- preserve crop produce using drying method
- adopt preservation crop produce to reduce food wastage.

Inquiry questions:

- How does preservation of fruits and vegetables enhance food security?

Before reading, write one thing you already know and one question you want this lesson to answer.

Preserving Crop Products Fruits Vegetables: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Preserving Crop Products Fruits Vegetables.

The important idea is Preserving Crop Products Fruits Vegetables. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Preserving Crop Products Fruits Vegetables.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Preserving Crop Products Fruits Vegetables
- Preserving
- Products
- Fruits
- Vegetables

Explain the idea in your own words before attempting the activities.

Preserving Crop Products Fruits Vegetables: Worked Example

Practical model for Preserving Crop Products Fruits Vegetables: Crop-care decision card.

Procedure:

1. Identify the crop stage: seed, nursery, transplanted crop, flowering, fruiting, or harvest.
2. Observe spacing, water, weeds, pests, disease signs, soil cover, and plant colour.
3. Choose one safe action: watering, thinning, weeding, mulching, staking, pest scouting, or harvesting.
4. Record why that action fits the evidence seen.
5. Review the result after a set time and note whether plant health improved.

Hazards: sharp tools, unsafe chemicals, dirty water, plant irritation, and overwatering.

Rubric: excellent work uses real observations, names the crop-care action, protects safety, and explains the expected result.

Preserving Crop Products Fruits Vegetables: Activity

Activity for Preserving Crop Products Fruits Vegetables: Complete a supervised agriculture procedure card.

Inquiry question: How does preservation of fruits and vegetables enhance food security?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Preserving Crop Products Fruits Vegetables: Activity And Practice

Practice for Preserving Crop Products Fruits Vegetables:

1. Carry out or describe a practical task for this outcome: describe how to preserve crop produce at home. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: preserve crop produce using drying method. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: adopt preservation crop produce to reduce food wastage.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to preserving crop products fruits vegetables and write two useful sentences about it.

Preserving Crop Products Fruits Vegetables: Outcome Check

Outcome: describe how to preserve crop produce at home

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Preserving Crop Products Fruits Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Preserving Crop Products Fruits Vegetables: Outcome Check

Outcome: preserve crop produce using drying method

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Preserving Crop Products Fruits Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Preserving Crop Products Fruits Vegetables: Outcome Check

Outcome: adopt preservation crop produce to reduce food wastage.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Preserving Crop Products Fruits Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking Food Stewing Baking (rubbing-in method): Lesson Opener

Learning area: Cooking Food Stewing Baking (rubbing-in method)

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking Food Stewing Baking (rubbing-in method).

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Cooking Food Stewing Baking (rubbing-in method).

By the end of this lesson sequence, you should be able to:

- describe different methods of cooking
- cook food using, different methods
- embrace different methods of cooking in food production.

Inquiry questions:

- How can we cook foods by baking?
- How can we cook foods by stewing?

Before reading, write one thing you already know and one question you want this lesson to answer.

Cooking Food Stewing Baking (rubbing-in method): Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking Food Stewing Baking (rubbing-in method).

The important idea is Cooking Food Stewing Baking (rubbing-in method). In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Cooking Food Stewing Baking (rubbing-in method). |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Cooking Food Stewing Baking (rubbing-in method)
- Cooking
- Stewing
- Baking
- method)

Explain the idea in your own words before attempting the activities.

Cooking Food Stewing Baking (rubbing-in method): Worked Example

Practical model for Cooking Food Stewing Baking (rubbing-in method): Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Cooking Food Stewing Baking (rubbing-in method): Activity

Activity for Cooking Food Stewing Baking (rubbing-in method): Complete a supervised agriculture procedure card.

Inquiry question: How can we cook foods by baking?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Cooking Food Stewing Baking (rubbing-in method): Activity And Practice

Practice for Cooking Food Stewing Baking (rubbing-in method):

1. Carry out or describe a practical task for this outcome: describe different methods of cooking. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: cook food using, different methods. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: embrace different methods of cooking in food production.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to cooking food stewing baking (rubbing-in method) and write two useful sentences about it.

Cooking Food Stewing Baking (rubbing-in method): Outcome Check

Outcome: describe different methods of cooking

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Stewing Baking (rubbing-in method).
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking Food Stewing Baking (rubbing-in method): Outcome Check

Outcome: cook food using, different methods

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Stewing Baking (rubbing-in method).
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking Food Stewing Baking (rubbing-in method): Outcome Check

Outcome: embrace different methods of cooking in food production.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking Food Stewing Baking (rubbing-in method).
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Food Production Processes: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Hygiene Practices

In this chapter you will study Hygiene Practices.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 3.1 Good
- 3.2 Laundry

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

es body cleanliness enhance personal hygiene: Lesson Opener

Learning area: es body cleanliness enhance personal hygiene

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to es body cleanliness enhance personal hygiene.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on es body cleanliness enhance personal hygiene.

By the end of this lesson sequence, you should be able to:

- practise body cleanliness as a healthy personal hygiene habit

Inquiry questions:

- How does body cleanliness enhance personal hygiene?

Before reading, write one thing you already know and one question you want this lesson to answer.

es body cleanliness enhance personal hygiene: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to es body cleanliness enhance personal hygiene.

The important idea is es body cleanliness enhance personal hygiene. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named

es body cleanliness enhance personal hygiene: Activity And Practice

Practice for es body cleanliness enhance personal hygiene:

1. Carry out or describe a practical task for this outcome: practise body cleanliness as a healthy personal hygiene habit. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to es body cleanliness enhance personal hygiene and write two useful sentences about it.

es body cleanliness enhance personal hygiene: Outcome Check

Outcome: practise body cleanliness as a healthy personal hygiene habit

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in es body cleanliness enhance personal hygiene.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Laundry: Lesson Opener

Learning area: Laundry

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Laundry.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Laundry.

By the end of this lesson sequence, you should be able to:

- stains on clothing and household articles, stains from clothing and household articles, for personal hygiene.

Inquiry questions:

- How does stain removal enhance personal hygiene?

Before reading, write one thing you already know and one question you want this lesson to answer.

Laundry: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Laundry.

The important idea is Laundry. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Laundry.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Laundry

Explain the idea in your own words before attempting the activities.

Laundry: Worked Example

Practical model for Laundry: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Laundry: Activity

Activity for Laundry: Complete a supervised agriculture procedure card.

Inquiry question: How does stain removal enhance personal hygiene?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Laundry: Activity And Practice

Practice for Laundry:

1. Carry out or describe a practical task for this outcome: stains on clothing and household articles, stains from clothing and household articles, for personal hygiene.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to laundry and write two useful sentences about it.

Laundry: Outcome Check

Outcome: stains on clothing and household articles, stains from clothing and household articles, for personal hygiene.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Laundry.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Hygiene Practices: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Production Techniques

In this chapter you will study Production Techniques.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 4.1 Crocheting Stitches
- 4.2 Constructing Moist Bed Garden

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Crocheting Stitches: Lesson Opener

Learning area: Crocheting Stitches

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Crocheting Stitches.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Crocheting Stitches.

By the end of this lesson sequence, you should be able to:

- identify crocheting stitches in making household articles
- use crocheting stitches to make a household articles
- adopt the use of crocheting stiches in making household articles.

Inquiry questions:

- How can crocheting reduce the cost of purchasing household articles?

Before reading, write one thing you already know and one question you want this lesson to answer.

Crocheting Stitches: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Crocheting Stitches.

The important idea is Crocheting Stitches. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Crocheting Stitches.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Crocheting Stitches
- Crocheting
- Stitches

Explain the idea in your own words before attempting the activities.

Crocheting Stitches: Worked Example

Practical model for Crocheting Stitches: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Crocheting Stitches: Activity

Activity for Crocheting Stitches: Complete a supervised agriculture procedure card.

Inquiry question: How can crocheting reduce the cost of purchasing household articles?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Crocheting Stitches: Activity And Practice

Practice for Crocheting Stitches:

1. Carry out or describe a practical task for this outcome: identify crocheting stitches in making household articles. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: use crocheting stitches to make a household articles. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: adopt the use of crocheting stitches in making household articles.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to crocheting stitches and write two useful sentences about it.

Crocheting Stitches: Outcome Check

Outcome: identify crocheting stitches in making household articles

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Crocheting Stitches.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Crocheting Stitches: Outcome Check

Outcome: use crocheting stitches to make a household articles

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Crocheting Stitches.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Crocheting Stitches: Outcome Check

Outcome: adopt the use of crocheting stiches in making household articles.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Crocheting Stitches.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Constructing Moist Bed Garden: Lesson Opener

Learning area: Constructing Moist Bed Garden

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Constructing Moist Bed Garden.

Curriculum link: This lesson follows the Grade 6 curriculum sequence and focuses on Constructing Moist Bed Garden.

By the end of this lesson sequence, you should be able to:

- explain the meaning of moist bed garden
- construct a moist bed garden for growing a selected crop
- embrace the use of moist bed garden in growing crops.

Inquiry questions:

- How can we construct a moist bed gardens to grow crops?

Before reading, write one thing you already know and one question you want this lesson to answer.

Constructing Moist Bed Garden: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Constructing Moist Bed Garden.

The important idea is Constructing Moist Bed Garden. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 6, use short sentences, concrete examples, and step-by-step guidance.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Constructing Moist Bed Garden. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Constructing Moist Bed Garden
- Constructing
- Moist
- Garden

Explain the idea in your own words before attempting the activities.

Constructing Moist Bed Garden: Worked Example

Practical model for Constructing Moist Bed Garden: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Constructing Moist Bed Garden: Activity

Activity for Constructing Moist Bed Garden: Complete a supervised agriculture procedure card.

Inquiry question: How can we construct a moist bed gardens to grow crops?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Constructing Moist Bed Garden: Activity And Practice

Practice for Constructing Moist Bed Garden:

1. Carry out or describe a practical task for this outcome: explain the meaning of moist bed garden. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: construct a moist bed garden for growing a selected crop. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: embrace the use of moist bed garden in growing crops.. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to constructing moist bed garden and write two useful sentences about it.

Constructing Moist Bed Garden: Outcome Check

Outcome: explain the meaning of moist bed garden

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Constructing Moist Bed Garden.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Constructing Moist Bed Garden: Outcome Check

Outcome: construct a moist bed garden for growing a selected crop

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Constructing Moist Bed Garden.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Constructing Moist Bed Garden: Outcome Check

Outcome: embrace the use of moist bed garden in growing crops.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Constructing Moist Bed Garden.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Production Techniques: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Controlling Soil Erosion: Review Clinic 1

Use this review clinic to strengthen a real unit from the book.

Practice context: home or school example connected to Controlling Soil Erosion.

1. Re-read the lesson on Controlling Soil Erosion and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Conserving Water: Sunken seedbed Shallow pits: Review Clinic 2

Use this review clinic to strengthen a real unit from the book.

Practice context: county or community example connected to Conserving Water: Sunken seedbed Shallow pits.

1. Re-read the lesson on Conserving Water: Sunken seedbed Shallow pits and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: tools/materials are named.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Conserving Wild Animals: Review Clinic 3

Use this review clinic to strengthen a real unit from the book.

Practice context: partner discussion about Conserving Wild Animals.

1. Re-read the lesson on Conserving Wild Animals and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: safety and care are included.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Rearing Small Domestic Animals: Review Clinic 4

Use this review clinic to strengthen a real unit from the book.

Practice context: small project or observation linked to Rearing Small Domestic Animals.

1. Re-read the lesson on Rearing Small Domestic Animals and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Glossary

Use this glossary to revise important words in Agriculture.

- Controlling Soil Erosion: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Conserving Water: Sunken seedbed Shallow pits: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Conserving Wild Animals: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Rearing Small Domestic Animals: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Preserving Crop Products Fruits Vegetables: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Cooking Food Stewing Baking (rubbing-in method): A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Hygiene Practices: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Laundry: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Crocheting Stitches: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Constructing Moist Bed Garden: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.

Add five more words from your lessons, then write a meaning and one correct example sentence or worked example for each word.

Answer And Teacher Notes

Most questions in this book are open practice tasks. A good answer should:

- respond to the exact question asked;
- use correct vocabulary from Agriculture;
- include a clear example, reason, working, observation, or evidence;
- be neat enough for another learner to follow;
- show correction after feedback.

For calculations, check each step. For language work, check spelling, punctuation, grammar, and meaning. For practical subjects, check safety, materials, observations, and conclusion.

Answer-key guide: Social Studies answers should name the place, people, evidence, meaning, and responsible action. Agriculture answers should name tools, sequence, safety, observation, and care for living things. Creative Arts answers should show planning, technique, safety, improvement, and explanation of choices.

Rubric for self-checking:

- 4: The answer addresses the exact question, uses subject vocabulary correctly, gives evidence or working, and includes a useful check or correction.
- 3: The main answer is correct but one part needs stronger evidence, clearer working, better labels, or a fuller explanation.
- 2: Some understanding is shown, but the answer is incomplete, too general, or hard to follow.
- 1: The answer is guessed, off topic, or missing the evidence needed for the task.

Correction routine: reread the command word, underline the key data or evidence, improve one weak step, and write one sentence explaining why the final answer is reasonable.

Final Project

Create a final project for Agriculture.

Your project must include:

1. A clear title.
2. A real-life problem or question.
3. Evidence from at least three lessons.
4. A drawing, table, map, chart, model, dialogue, performance plan, artwork note, or worked solution.
5. A short reflection explaining what you learned.

Present your project to a classmate, teacher, parent, or study group.
