Grade 9

AGRICULTURE

Honeybee

Cover scene

learners working in a school garden with seedlings, compost, watering cans, and a friendly honeybee mascot

● Clear lessons

● Worked examples

● Fun activities

● Real-life problems

GRADE

9

KEN CBC aligned draft

Think - Explore - Achieve

Title Page

KITABU QUEST Grade 9 Agriculture

Kenya CBC content draft for review

Mascot: honeybee

This content-first draft was regenerated from Kitabu curriculum data using a topic-by-topic book plan. It is designed to help learners read, practise, discuss, create, and revise with confidence.

Cover artwork is intentionally deferred until all content has passed review and is marked ready-for-cover.

How To Use This Book

This book helps Grade 9 learners study Agriculture through clear lessons, worked examples, activities, practice, and revision.

Use the inquiry questions to think first. Read the explanation. Try the guided example. Complete the activity. Answer the practice questions. Correct your work and ask for support where needed.

Learn through school-garden practice, observation logs, tool safety, and home projects.

Every unit has a local example, a misconception to avoid, success criteria, and a check for understanding.

Learning Skills In This Book

Each chapter builds knowledge, skills, values, creativity, communication, collaboration, critical thinking, digital literacy, and self-confidence.

Look for these page types: Learn, Example, Activity, Practice, Reflection, Home Link, and Review.

How to study well: read the goal first, underline new words, try the example before reading the answer, discuss with a partner, and correct your work after feedback. Do not skip the reflection questions. They help you notice what you understand and what needs more practice.

Table Of Contents

Use this table of contents to plan your study. Start with the first chapter, but return to earlier pages whenever you need revision.

1. 1.0 Conservation of Resources
2. 2.0 Food Production Processes
3. 3.0 Hygiene Practises
4. 4.0 Production Techniques

After each chapter, complete the chapter review before moving forward. At the end of the book, use the glossary, answer notes, and final project to revise the whole subject.

Chapter: Conservation of Resources

In this chapter you will study Conservation of Resources.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 1.1 Conserving Animal Feed: Hay
- 1.2 Conserving Leftover Food
- 1.3 Integrated Farming

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Conserving Animal Feed: Hay: Lesson Opener

Learning area: Conserving Animal Feed: Hay

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Animal Feed: Hay.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Conserving Animal Feed: Hay.

By the end of this lesson sequence, you should be able to:

- describe methods of conserving forage in coping with drought
- conserve forage to cope with drought
- adopt conservation of forage in coping with drought.

Inquiry questions:

- How can hay conservation contribute to coping with drought?

Before reading, write one thing you already know and one question you want this lesson to answer.

Conserving Animal Feed: Hay: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Animal Feed: Hay.

The important idea is Conserving Animal Feed: Hay. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Conserving Animal Feed: Hay. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Conserving Animal Feed: Hay
- Conserving
- Animal
- Feed

Explain the idea in your own words before attempting the activities.

Conserving Animal Feed: Hay: Worked Example

Practical model for Conserving Animal Feed: Hay: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Conserving Animal Feed: Hay: Activity

Activity for Conserving Animal Feed: Hay: Complete a supervised agriculture procedure card.

Inquiry question: How can hay conservation contribute to coping with drought?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Conserving Animal Feed: Hay: Activity And Practice

Practice for Conserving Animal Feed: Hay:

1. Carry out or describe a practical task for this outcome: describe methods of conserving forage in coping with drought. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: conserve forage to cope with drought. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: adopt conservation of forage in coping with drought. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to conserving animal feed: hay and write two useful sentences about it.

Conserving Animal Feed: Hay: Outcome Check

Outcome: describe methods of conserving forage in coping with drought

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Animal Feed: Hay.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Animal Feed: Hay: Outcome Check

Outcome: conserve forage to cope with drought

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Animal Feed: Hay.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Animal Feed: Hay: Outcome Check

Outcome: adopt conservation of forage in coping with drought.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Animal Feed: Hay.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Leftover Food: Lesson Opener

Learning area: Conserving Leftover Food

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Leftover Food.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Conserving Leftover Food.

By the end of this lesson sequence, you should be able to:

- explain the importance of conserving leftover food at home
- prepare leftover food to avoid wastage
- embrace the use of leftover food to avoid food wastage.

Inquiry questions:

- How is leftover food prepared for use to prevent food wastage?

Before reading, write one thing you already know and one question you want this lesson to answer.

Conserving Leftover Food: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Conserving Leftover Food.

The important idea is Conserving Leftover Food. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Conserving Leftover Food.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Conserving Leftover Food
- Conserving
- Leftover

Explain the idea in your own words before attempting the activities.

Conserving Leftover Food: Worked Example

Practical model for Conserving Leftover Food: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Conserving Leftover Food: Activity

Activity for Conserving Leftover Food: Complete a supervised agriculture procedure card.

Inquiry question: How is leftover food prepared for use to prevent food wastage?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Conserving Leftover Food: Activity And Practice

Practice for Conserving Leftover Food:

1. Carry out or describe a practical task for this outcome: explain the importance of conserving leftover food at home. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: prepare leftover food to avoid wastage. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: embrace the use of leftover food to avoid food wastage. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to conserving leftover food and write two useful sentences about it.

Conserving Leftover Food: Outcome Check

Outcome: explain the importance of conserving leftover food at home

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Leftover Food.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Leftover Food: Outcome Check

Outcome: prepare leftover food to avoid wastage

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Leftover Food.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conserving Leftover Food: Outcome Check

Outcome: embrace the use of leftover food to avoid food wastage.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Conserving Leftover Food.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Integrated Farming: Lesson Opener

Learning area: Integrated Farming

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Integrated Farming.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Integrated Farming.

By the end of this lesson sequence, you should be able to:

- describe components of integrated farming in conserving resources
- make a model of integrated farming for the conservation of resources
- integrated farming in the conservation of resources

Inquiry questions:

- How can integrated farming conserve resources?

Before reading, write one thing you already know and one question you want this lesson to answer.

Integrated Farming: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Integrated Farming.

The important idea is Integrated Farming. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Integrated Farming. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Integrated Farming
- Integrated
- Farming

Explain the idea in your own words before attempting the activities.

Integrated Farming: Worked Example

Practical model for Integrated Farming: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Integrated Farming: Activity

Activity for Integrated Farming: Complete a supervised agriculture procedure card.

Inquiry question: How can integrated farming conserve resources?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Integrated Farming: Activity And Practice

Practice for Integrated Farming:

1. Carry out or describe a practical task for this outcome: describe components of integrated farming in conserving resources. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: make a model of integrated farming for the conservation of resources. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: integrated farming in the conservation of resources. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to integrated farming and write two useful sentences about it.

Integrated Farming: Outcome Check

Outcome: describe components of integrated farming in conserving resources

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Integrated Farming.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Integrated Farming: Outcome Check

Outcome: make a model of integrated farming for the conservation of resources

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Integrated Farming.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Integrated Farming: Outcome Check

Outcome: integrated farming in the conservation of resources

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Integrated Farming.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Conservation of Resources: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Food Production Processes

In this chapter you will study Food Production Processes.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 2.2 Storage of Crop
- 2.3 Cooking

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Storage of Crop: Lesson Opener

Learning area: Storage of Crop

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Storage of Crop.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Storage of Crop.

By the end of this lesson sequence, you should be able to:

- storage structures before storing crop produce, structure in readiness for storing crop produce, to reduce spoilage

Inquiry questions:

- How can we prepare the facility in readiness for the storage of crop produce?
- How should crop produce be managed during storage?

Before reading, write one thing you already know and one question you want this lesson to answer.

Storage of Crop: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Storage of Crop.

The important idea is Storage of Crop. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Storage of Crop.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Storage of Crop
- Storage

Explain the idea in your own words before attempting the activities.

Storage of Crop: Worked Example

Practical model for Storage of Crop: Crop-care decision card.

Procedure:

1. Identify the crop stage: seed, nursery, transplanted crop, flowering, fruiting, or harvest.
2. Observe spacing, water, weeds, pests, disease signs, soil cover, and plant colour.
3. Choose one safe action: watering, thinning, weeding, mulching, staking, pest scouting, or harvesting.
4. Record why that action fits the evidence seen.
5. Review the result after a set time and note whether plant health improved.

Hazards: sharp tools, unsafe chemicals, dirty water, plant irritation, and overwatering.

Rubric: excellent work uses real observations, names the crop-care action, protects safety, and explains the expected result.

Storage of Crop: Activity

Activity for Storage of Crop: Complete a supervised agriculture procedure card.

Inquiry question: How can we prepare the facility in readiness for the storage of crop produce?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Storage of Crop: Activity And Practice

Practice for Storage of Crop:

1. Carry out or describe a practical task for this outcome: storage structures before storing crop produce, structure in readiness for storing crop produce, to reduce spoilage. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to storage of crop and write two useful sentences about it.

Storage of Crop: Outcome Check

Outcome: storage structures before storing crop produce, structure in readiness for storing crop produce, to reduce spoilage

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Storage of Crop.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Cooking: Lesson Opener

Learning area: Cooking

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Cooking.

By the end of this lesson sequence, you should be able to:

- mixtures used in food production food production various flour mixtures from various flour mixtures.

Inquiry questions:

- How can we make products from flour mixtures?

Before reading, write one thing you already know and one question you want this lesson to answer.

Cooking: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cooking.

The important idea is Cooking. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Cooking. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Cooking

Explain the idea in your own words before attempting the activities.

Cooking: Worked Example

Practical model for Cooking: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Cooking: Activity

Activity for Cooking: Complete a supervised agriculture procedure card.

Inquiry question: How can we make products from flour mixtures?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Cooking: Activity And Practice

Practice for Cooking:

1. Carry out or describe a practical task for this outcome: mixtures used in food production food production various flour mixtures from various flour mixtures. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to cooking and write two useful sentences about it.

Cooking: Outcome Check

Outcome: mixtures used in food production food production various flour mixtures from various flour mixtures.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cooking.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Food Production Processes: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Hygiene Practises

In this chapter you will study Hygiene Practises.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 3.1 Cleaning Waste Disposal
- 3.2 Disinfecting Clothing and Household Articles

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Cleaning Waste Disposal: Lesson Opener

Learning area: Cleaning Waste Disposal

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cleaning Waste Disposal.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Cleaning Waste Disposal.

By the end of this lesson sequence, you should be able to:

- cleaning waste disposal facilities at the household level waste disposal facilities at the household level.

Inquiry questions:

- How does cleaning waste disposal facilities promote hygiene?

Before reading, write one thing you already know and one question you want this lesson to answer.

Cleaning Waste Disposal: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Cleaning Waste Disposal.

The important idea is Cleaning Waste Disposal. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Cleaning Waste Disposal. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Cleaning Waste Disposal
- Cleaning
- Waste
- Disposal

Explain the idea in your own words before attempting the activities.

Cleaning Waste Disposal: Worked Example

Practical model for Cleaning Waste Disposal: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Cleaning Waste Disposal: Activity

Activity for Cleaning Waste Disposal: Complete a supervised agriculture procedure card.

Inquiry question: How does cleaning waste disposal facilities promote hygiene?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Cleaning Waste Disposal: Activity And Practice

Practice for Cleaning Waste Disposal:

1. Carry out or describe a practical task for this outcome: cleaning waste disposal facilities at the household level waste disposal facilities at the household level. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to cleaning waste disposal and write two useful sentences about it.

Cleaning Waste Disposal: Outcome Check

Outcome: cleaning waste disposal facilities at the household level waste disposal facilities at the household level.

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Cleaning Waste Disposal.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Disinfecting Clothing and Household Articles: Lesson Opener

Learning area: Disinfecting Clothing and Household Articles

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Disinfecting Clothing and Household Articles.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Disinfecting Clothing and Household Articles.

By the end of this lesson sequence, you should be able to:

- describe methods of disinfecting clothing and household articles
- carry out disinfection of clothing and household articles
- disinfecting clothing and household articles

Inquiry questions:

- How can we disinfect household articles for hygiene purposes?

Before reading, write one thing you already know and one question you want this lesson to answer.

Disinfecting Clothing and Household Articles: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Disinfecting Clothing and Household Articles.

The important idea is Disinfecting Clothing and Household Articles. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Disinfecting Clothing and Household Articles. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Disinfecting Clothing and Household Articles
- Disinfecting
- Clothing
- Household
- Articles

Explain the idea in your own words before attempting the activities.

Disinfecting Clothing and Household Articles: Worked Example

Practical model for Disinfecting Clothing and Household Articles: Food and hygiene safety.

Procedure:

1. Wash hands with soap and clean water before handling food or tools.
2. Clean the working surface and separate raw, cooked, and waste materials.
3. Measure ingredients with clean containers.
4. Dispose of waste in the correct bin or compost area if suitable.
5. Wash tools, dry them, and store them safely after use.

Hazards: contamination, burns, cuts, slippery floors, and unsafe waste handling.

Quality criteria: clean hands, clean tools, correct measurements, safe disposal, and a record of what was done.

Disinfecting Clothing and Household Articles: Activity

Activity for Disinfecting Clothing and Household Articles: Complete a supervised agriculture procedure card.

Inquiry question: How can we disinfect household articles for hygiene purposes?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Disinfecting Clothing and Household Articles: Activity And Practice

Practice for Disinfecting Clothing and Household Articles:

1. Carry out or describe a practical task for this outcome: describe methods of disinfecting clothing and household articles. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: carry out disinfection of clothing and household articles. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: disinfecting clothing and household articles. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to disinfecting clothing and household articles and write two useful sentences about it.

Disinfecting Clothing and Household Articles: Outcome Check

Outcome: describe methods of disinfecting clothing and household articles

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Disinfecting Clothing and Household Articles.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Disinfecting Clothing and Household Articles: Outcome Check

Outcome: carry out disinfection of clothing and household articles

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Disinfecting Clothing and Household Articles.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Disinfecting Clothing and Household Articles: Outcome Check

Outcome: disinfecting clothing and household articles

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Disinfecting Clothing and Household Articles.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Hygiene Practises: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Chapter: Production Techniques

In this chapter you will study Production Techniques.

Inquiry starter: What do you already know about this topic from home, school, or your community?

Chapter units:

- 4.1 Grafting in Plants
- 4.2 Production Techniques

Before you begin, write two things you already know and one question you want to answer. As you study, collect examples from daily life. At the end of the chapter, return to your question and improve your answer using new vocabulary, examples, and evidence from the lessons.

Grafting in Plants: Lesson Opener

Learning area: Grafting in Plants

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Grafting in Plants.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Grafting in Plants.

By the end of this lesson sequence, you should be able to:

- describe grafting as a method of plant propagation
- carry out grafting for various purposes
- take care of the grafted plant to ensure successful union
- appraise grafting for aesthetics, repair, improvement and rejuvenation purposes.

Inquiry questions:

- Why is grafting done on a plant?

Before reading, write one thing you already know and one question you want this lesson to answer.

Grafting in Plants: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Grafting in Plants.

The important idea is Grafting in Plants. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

Agriculture record	What to note
Purpose	Why the task is being done.
Tools/materials	Exact items needed for Grafting in Plants.
Safety and care	Hazard, hygiene action, and care for living things.
Observation	Date, condition seen, action taken, and result.

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Grafting in Plants
- Grafting
- Plants

Explain the idea in your own words before attempting the activities.

Grafting in Plants: Worked Example

Practical model for Grafting in Plants: Choose the exact agriculture action, then prove it with evidence.

Procedure:

1. Choose one concrete task from this topic: observe soil, care for a crop, handle a tool, feed or protect an animal, store produce, manage water, or keep a record.
2. State the purpose of that task in one sentence.
3. List exact tools, materials, living things, and safety items before starting.
4. Perform one step at a time under teacher or adult guidance where needed.
5. Record date, condition observed, action taken, result, and one improvement.

Rubric: excellent work names the real task, uses safe handling, gives a clear sequence, cares for living things, and records useful evidence.

Grafting in Plants: Activity

Activity for Grafting in Plants: Complete a supervised agriculture procedure card.

Inquiry question: Why is grafting done on a plant?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Grafting in Plants: Activity And Practice

Practice for Grafting in Plants:

1. Carry out or describe a practical task for this outcome: describe grafting as a method of plant propagation. List materials, steps, safety checks, and how you will judge quality.
2. Carry out or describe a practical task for this outcome: carry out grafting for various purposes. List materials, steps, safety checks, and how you will judge quality.
3. Carry out or describe a practical task for this outcome: take care of the grafted plant to ensure successful union. List materials, steps, safety checks, and how you will judge quality.
4. Carry out or describe a practical task for this outcome: appraise grafting for aesthetics, repair, improvement and rejuvenation purposes. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to grafting in plants and write two useful sentences about it.

Grafting in Plants: Outcome Check

Outcome: describe grafting as a method of plant propagation

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Grafting in Plants.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Grafting in Plants: Outcome Check

Outcome: carry out grafting for various purposes

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Grafting in Plants.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Grafting in Plants: Outcome Check

Outcome: take care of the grafted plant to ensure successful union

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Grafting in Plants.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Using a Homemade Sun Dryer to Preserve Vegetables: Lesson Opener

Learning area: Using a Homemade Sun Dryer to Preserve Vegetables

Start here: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Using a Homemade Sun Dryer to Preserve Vegetables.

Curriculum link: This lesson follows the Grade 9 curriculum sequence and focuses on Using a Homemade Sun Dryer to Preserve Vegetables.

By the end of this lesson sequence, you should be able to:

- homemade sun dryer for vegetables, sun dryer to preserve vegetables, homemade sun dryer in the preservation

Inquiry questions:

- How can innovative technology be used to preserve vegetables?

Before reading, write one thing you already know and one question you want this lesson to answer.

Using a Homemade Sun Dryer to Preserve Vegetables: Learn

Start with this real situation: a school garden, home garden, farm tool, soil, water, crop, animal-care, or food-security example linked to Using a Homemade Sun Dryer to Preserve Vegetables.

The important idea is Using a Homemade Sun Dryer to Preserve Vegetables. In this lesson, do not memorise words only. Read the example, try the guided task, then explain the idea in your own words.

A common mistake is describing farm work without naming tools, steps, safety, observations, or care practices. Avoid it by checking your work against these success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

For Grade 9, use clear academic words introduced through examples.

Inline visual support:

| Agriculture record | What to note |

| --- | --- |

| Purpose | Why the task is being done. |

| Tools/materials | Exact items needed for Using a Homemade Sun Dryer to Preserve Vegetables. |

| Safety and care | Hazard, hygiene action, and care for living things. |

| Observation | Date, condition seen, action taken, and result. |

Method for Agriculture: Learn through school-garden practice, observation logs, tool safety, and home projects.

Key words:

- Using a Homemade Sun Dryer to Preserve Vegetables
- Using
- Homemade
- Dryer
- Preserve
- Vegetables

Explain the idea in your own words before attempting the activities.

Using a Homemade Sun Dryer to Preserve Vegetables: Worked Example

Practical model for Using a Homemade Sun Dryer to Preserve Vegetables: Preserve vegetables with a homemade sun dryer.

Procedure:

1. Select fresh vegetables, wash them with clean water, and remove damaged parts.
2. Cut pieces evenly so they dry at a similar rate.
3. Place them on a clean raised tray inside a covered sun dryer that allows warm air to pass through.
4. Turn pieces as instructed and protect them from dust, animals, and rain.
5. Store only fully dried vegetables in a clean, dry, labelled container.

Hazards: contamination, mould from poor drying, cuts while slicing, burns from hot surfaces, and leaving food uncovered.

Rubric: excellent work protects hygiene, shows correct drying conditions, prevents spoilage, and explains how preservation reduces food loss.

Using a Homemade Sun Dryer to Preserve Vegetables: Activity

Activity for Using a Homemade Sun Dryer to Preserve Vegetables: Complete a supervised agriculture procedure card.

Inquiry question: How can innovative technology be used to preserve vegetables?

1. State the purpose of the task.
2. List exact tools, materials, living things, and protective items needed.
3. Write the steps in order, including what the teacher or adult must supervise.
4. Name at least three hazards and the safety action for each hazard.
5. Record what should be observed before, during, and after the task.
6. Judge quality using practical criteria: safety, hygiene, care for living things, correct method, and useful records.

Success criteria:

- steps are practical
- tools/materials are named
- safety and care are included

Home link: Observe a related farm, garden, kitchen, storage, or animal-care practice. Record what was done safely and one improvement.

Using a Homemade Sun Dryer to Preserve Vegetables: Activity And Practice

Practice for Using a Homemade Sun Dryer to Preserve Vegetables:

1. Carry out or describe a practical task for this outcome: homemade sun dryer for vegetables, sun dryer to preserve vegetables, homemade sun dryer in the preservation. List materials, steps, safety checks, and how you will judge quality.

Correction check:

- steps are practical
- tools/materials are named
- safety and care are included

Reflection: What was easy? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for an example related to using a homemade sun dryer to preserve vegetables and write two useful sentences about it.

Using a Homemade Sun Dryer to Preserve Vegetables: Outcome Check

Outcome: homemade sun dryer for vegetables, sun dryer to preserve vegetables, homemade sun dryer in the preservation

Show mastery with evidence.

1. Explain the outcome in your own words.
2. Give one local, school, home, community, practical, or text-based example.
3. Complete a short task that proves you can apply the idea in Using a Homemade Sun Dryer to Preserve Vegetables.
4. Use correct vocabulary and include a reason, observation, example, step, or result.
5. Write one mistake a learner might make and how to avoid it.
6. Ask a peer, teacher, or parent to check whether your answer is clear.

Evidence of mastery: your work answers the exact outcome, gives a relevant example, and shows a correction after feedback.

Production Techniques: Chapter Review

Review the chapter carefully.

1. Write five key words from this chapter and explain each one.
2. Choose two units and compare what you learned.
3. Create one poster, chart, dialogue, model, map, or worked solution that teaches this chapter.
4. Answer one inquiry question again. Improve your first answer using what you now know.
5. Rate your confidence: high, medium, or needs practice.

Conserving Animal Feed: Hay: Review Clinic 1

Use this review clinic to strengthen a real unit from the book.

Practice context: home or school example connected to Conserving Animal Feed: Hay.

1. Re-read the lesson on Conserving Animal Feed: Hay and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Conserving Leftover Food: Review Clinic 2

Use this review clinic to strengthen a real unit from the book.

Practice context: county or community example connected to Conserving Leftover Food.

1. Re-read the lesson on Conserving Leftover Food and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: tools/materials are named.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Integrated Farming: Review Clinic 3

Use this review clinic to strengthen a real unit from the book.

Practice context: partner discussion about Integrated Farming.

1. Re-read the lesson on Integrated Farming and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: safety and care are included.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Storage of Crop: Review Clinic 4

Use this review clinic to strengthen a real unit from the book.

Practice context: small project or observation linked to Storage of Crop.

1. Re-read the lesson on Storage of Crop and underline the main idea.
2. Write a five-sentence or five-step summary.
3. Make one question that tests knowledge.
4. Make one question that tests skill, reasoning, or application.
5. Solve or answer both questions.
6. Check your work against this criterion: steps are practical.
7. Exchange your questions with a partner and discuss corrections.

Challenge: Describe a real-life task from your home, school, farm, market, field, library, or community that uses this idea.

Glossary

Use this glossary to revise important words in Agriculture.

- Conserving Animal Feed: Hay: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Conserving Leftover Food: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Integrated Farming: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Storage of Crop: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Cooking: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Cleaning Waste Disposal: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Disinfecting Clothing and Household Articles: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Grafting in Plants: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.
- Production Techniques: A practical agriculture idea that needs tools or materials, safe steps, care for living things, observations, and records.

Add five more words from your lessons, then write a meaning and one correct example sentence or worked example for each word.

Answer And Teacher Notes

Most questions in this book are open practice tasks. A good answer should:

- respond to the exact question asked;
- use correct vocabulary from Agriculture;
- include a clear example, reason, working, observation, or evidence;
- be neat enough for another learner to follow;
- show correction after feedback.

For calculations, check each step. For language work, check spelling, punctuation, grammar, and meaning. For practical subjects, check safety, materials, observations, and conclusion.

Answer-key guide: Social Studies answers should name the place, people, evidence, meaning, and responsible action. Agriculture answers should name tools, sequence, safety, observation, and care for living things. Creative Arts answers should show planning, technique, safety, improvement, and explanation of choices.

Rubric for self-checking:

- 4: The answer addresses the exact question, uses subject vocabulary correctly, gives evidence or working, and includes a useful check or correction.
- 3: The main answer is correct but one part needs stronger evidence, clearer working, better labels, or a fuller explanation.
- 2: Some understanding is shown, but the answer is incomplete, too general, or hard to follow.
- 1: The answer is guessed, off topic, or missing the evidence needed for the task.

Correction routine: reread the command word, underline the key data or evidence, improve one weak step, and write one sentence explaining why the final answer is reasonable.

Final Project

Create a final project for Agriculture.

Your project must include:

1. A clear title.
2. A real-life problem or question.
3. Evidence from at least three lessons.
4. A drawing, table, map, chart, model, dialogue, performance plan, artwork note, or worked solution.
5. A short reflection explaining what you learned.

Present your project to a classmate, teacher, parent, or study group.
