KITABU QUEST S1 Geography and Environment

Rwanda REB-CBC learner book

Mascot: mountain gorilla

This KITABU QUEST book turns the curriculum into short lessons, worked examples, guided activities, practice, review, and home links for Rwanda learners.

How To Use This Book

This book helps S1 learners study Geography and Environment one teachable topic at a time.

1. Start with the inquiry question and say what you already know.
2. Read the Learn section slowly and mark new words.
3. Try the worked example before reading the full solution.
4. Complete the activity and practice tasks.
5. Correct your answer using the success criteria.
6. Ask for support when your answer is still unclear.

Subject method: Use maps, field observations, diagrams, environmental evidence, and local examples.

Learning Skills In This Book

Each topic builds knowledge, skill, values, communication, collaboration, critical thinking, creativity, digital awareness, and self-confidence.

Study actively: speak answers aloud, draw when useful, show your working, cite evidence, use local examples, and correct mistakes after feedback.

A strong answer is specific. It names the idea, gives evidence or method, applies it to the task, and checks whether it answers the question.

Table Of Contents

Use this table to move through the book one topic at a time. Each topic has a lesson opener, clear teaching, a model or example, guided work, practice, and checks for understanding.

1. Forms of relief
2. Rocks
3. Soils
4. Weather and climate
5. Vegetation
6. General organisation of hydrography
7. Hazards
8. Population and settlement
9. Economic activities

As you finish each topic, return to the success criteria and correct one answer before moving on.

Forms of relief: Lesson Opener

Learning focus: Forms of relief

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Forms of relief.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- determine the relationship between reliefs and human activities
- identify the different forms of relief features
- state the relationship between reliefs and human activities
- classify the different forms of reliefs
- explain the relationship between reliefs and human activities
- appreciate the importance of reliefs

Inquiry questions:

- How can forms of relief help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Forms of relief: Learn

Forms of relief becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Forms of relief
- Forms
- relief
- idea
- skill
- example
- practice
- correction

Forms of relief: Worked Example

Evidence model for Forms of relief: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Forms of relief: Vocabulary And Study Skill

Use these words and study moves before you practise Forms of relief. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Forms of relief
- Forms
- relief
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Forms of relief without a clear example, method, or evidence.

Forms of relief: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Forms of relief.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Forms of relief: Practice And Correction

Practice for Forms of relief:

1. Use an example from your community or country to explain: determine the relationship between reliefs and human activities.
2. Use an example from your community or country to explain: identify the different forms of relief features.
3. Use an example from your community or country to explain: state the relationship between reliefs and human activities.
4. Use an example from your community or country to explain: classify the different forms of reliefs.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to forms of relief and write two useful sentences about it.

Forms of relief: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Forms of relief.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Forms of relief: Outcome Check

Show that you can determine the relationship between reliefs and human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Forms of relief: Outcome Check

Show that you can identify the different forms of relief features.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Rocks: Lesson Opener

Learning focus: Rocks

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Rocks.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- differentiate types of rocks and their economic uses
- state the types and characteristics of rocks
- outline the importance of rocks
- apply knowledge to explain and categorise rocks in their environment
- analyse the characteristics of different types of rocks

Inquiry questions:

- How can rocks help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Rocks: Learn

Rocks becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Rocks
- idea
- skill
- example
- practice
- correction

Rocks: Worked Example

Evidence model for Rocks: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Rocks: Vocabulary And Study Skill

Use these words and study moves before you practise Rocks. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Rocks
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Rocks without a clear example, method, or evidence.

Rocks: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Rocks.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Rocks: Practice And Correction

Practice for Rocks:

1. Use an example from your community or country to explain: differentiate types of rocks and their economic uses.
2. Use an example from your community or country to explain: state the types and characteristics of rocks.
3. Use an example from your community or country to explain: outline the importance of rocks.
4. Use an example from your community or country to explain: apply knowledge to explain and categorise rocks in their environment.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to rocks and write two useful sentences about it.

Rocks: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Rocks.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Rocks: Outcome Check

Show that you can differentiate types of rocks and their economic uses.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Rocks: Outcome Check

Show that you can state the types and characteristics of rocks.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Lesson Opener

Learning focus: Soils

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Soils.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- determine the relationship between different types of soils and human activities
- define soils and state the factors responsible for soil formation
- identify soil properties and constituents
- identify the types of soils
- state the importance of soils
- outline the effects of soil on human activities

Inquiry questions:

- How can soils help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Learn

Soils becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Soils
- idea
- skill
- example
- practice
- correction

Soils: Worked Example

Evidence model for Soils: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Soils: Vocabulary And Study Skill

Use these words and study moves before you practise Soils. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Soils
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Soils without a clear example, method, or evidence.

Soils: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Soils.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Soils: Practice And Correction

Practice for Soils:

1. Use an example from your community or country to explain: determine the relationship between different types of soils and human activities.
2. Use an example from your community or country to explain: define soils and state the factors responsible for soil formation.
3. Use an example from your community or country to explain: identify soil properties and constituents.
4. Use an example from your community or country to explain: identify the types of soils.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to soils and write two useful sentences about it.

Soils: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Soils.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Outcome Check

Show that you can determine the relationship between different types of soils and human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Outcome Check

Show that you can define soils and state the factors responsible for soil formation.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and climate: Lesson Opener

Learning focus: Weather and climate

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Weather and climate.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- recognise the importance of the atmosphere, differentiate weather from climate and classify the major climatic types
- state the difference between weather and climate
- identify the layers of the atmosphere and state the importance of the atmosphere
- outline the elements of weather and climate
- identify weather instruments at a weather station
- state the factors influencing temperature

Inquiry questions:

- How can weather and climate help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and climate: Learn

Weather and climate becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Weather and climate
- Weather
- climate
- idea
- skill
- example
- practice
- correction

Weather and climate: Worked Example

Evidence model for Weather and climate: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Weather and climate: Vocabulary And Study Skill

Use these words and study moves before you practise Weather and climate. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Weather and climate
- Weather
- climate
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Weather and climate without a clear example, method, or evidence.

Weather and climate: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Weather and climate.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Weather and climate: Practice And Correction

Practice for Weather and climate:

1. Use an example from your community or country to explain: recognise the importance of the atmosphere, differentiate weather from climate and classify the major climatic types.
2. Use an example from your community or country to explain: state the difference between weather and climate.
3. Use an example from your community or country to explain: identify the layers of the atmosphere and state the importance of the atmosphere.
4. Use an example from your community or country to explain: outline the elements of weather and climate.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to weather and climate and write two useful sentences about it.

Weather and climate: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Weather and climate.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and climate: Outcome Check

Show that you can recognise the importance of the atmosphere, differentiate weather from climate and classify the major climatic types.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and climate: Outcome Check

Show that you can state the difference between weather and climate.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Vegetation: Lesson Opener

Learning focus: Vegetation

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Vegetation.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- to be able determine the relationship between vegetation and human activities
- identify different vegetation types on maps
- outline the factors that influence the distribution of vegetation
- outline the importance vegetation
- state the relationship between vegetation and human activities
- locate different types of vegetation on maps

Inquiry questions:

- How can vegetation help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Vegetation: Learn

Vegetation becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Vegetation
- idea
- skill
- example
- practice
- correction

Vegetation: Worked Example

Evidence model for Vegetation: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Vegetation: Vocabulary And Study Skill

Use these words and study moves before you practise Vegetation. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Vegetation
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Vegetation without a clear example, method, or evidence.

Vegetation: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Vegetation.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Vegetation: Practice And Correction

Practice for Vegetation:

1. Use an example from your community or country to explain: to be able determine the relationship between vegetation and human activities.
2. Use an example from your community or country to explain: identify different vegetation types on maps.
3. Use an example from your community or country to explain: outline the factors that influence the distribution of vegetation.
4. Use an example from your community or country to explain: outline the importance vegetation.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to vegetation and write two useful sentences about it.

Vegetation: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Vegetation.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Vegetation: Outcome Check

Show that you can to be able determine the relationship between vegetation and human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Vegetation: Outcome Check

Show that you can identify different vegetation types on maps.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

General organisation of hydrography: Lesson Opener

Learning focus: General organisation of hydrography

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for General organisation of hydrography.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- analyse the general organisation of hydrography and its relationship with human activities
- state the different types of water bodies
- identify the major terminologies related to drainage
- identify the major rivers of the world
- explain the different parts of a river profile and its characteristics
- identify different drainage patterns

Inquiry questions:

- How can general organisation of hydrography help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

General organisation of hydrography: Learn

General organisation of hydrography becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- General organisation of hydrography
- General
- organisation
- hydrography
- idea
- skill
- example
- practice

General organisation of hydrography: Worked Example

Evidence model for General organisation of hydrography: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

General organisation of hydrography: Vocabulary And Study Skill

Use these words and study moves before you practise General organisation of hydrography. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- General organisation of hydrography
- General
- organisation
- hydrography
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about General organisation of hydrography without a clear example, method, or evidence.

General organisation of hydrography: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for General organisation of hydrography.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

General organisation of hydrography: Practice And Correction

Practice for General organisation of hydrography:

1. Use an example from your community or country to explain: analyse the general organisation of hydrography and its relationship with human activities.
2. Use an example from your community or country to explain: state the different types of water bodies.
3. Use an example from your community or country to explain: identify the major terminologies related to drainage.
4. Use an example from your community or country to explain: identify the major rivers of the world.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to general organisation of hydrography and write two useful sentences about it.

General organisation of hydrography: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from General organisation of hydrography.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

General organisation of hydrography: Outcome Check

Show that you can analyse the general organisation of hydrography and its relationship with human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

General organisation of hydrography: Outcome Check

Show that you can state the different types of water bodies.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Hazards: Lesson Opener

Learning focus: Hazards

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Hazards.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- propose responses to the effects of natural and non-natural hazards in their environment
- identify different types of hazards
- state the causes and effects of hazards
- explain human responses to natural and/or man made hazards in the short, medium and long term
- examine different types of hazards: natural hazards and manmade hazards

Inquiry questions:

- How can hazards help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Hazards: Learn

Hazards becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Hazards
- idea
- skill
- example
- practice
- correction

Hazards: Worked Example

Evidence model for Hazards: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Hazards: Vocabulary And Study Skill

Use these words and study moves before you practise Hazards. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Hazards
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Hazards without a clear example, method, or evidence.

Hazards: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Hazards.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Hazards: Practice And Correction

Practice for Hazards:

1. Use an example from your community or country to explain: propose responses to the effects of natural and non-natural hazards in their environment.
2. Use an example from your community or country to explain: identify different types of hazards.
3. Use an example from your community or country to explain: state the causes and effects of hazards.
4. Use an example from your community or country to explain: explain human responses to natural and/or man made hazards in the short, medium and long term.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to hazards and write two useful sentences about it.

Hazards: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Hazards.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Hazards: Outcome Check

Show that you can propose responses to the effects of natural and non-natural hazards in their environment.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Hazards: Outcome Check

Show that you can identify different types of hazards.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Population and settlement: Lesson Opener

Learning focus: Population and settlement

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Population and settlement.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- explain general population concepts and settlement patterns (rural and urban)
- define population and associated concepts
- identify the types of settlement
- define the concept of migration
- explain different population and settlement concepts
- observe various types of settlement patterns

Inquiry questions:

- How can population and settlement help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Population and settlement: Learn

Population and settlement becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Population and settlement
- Population
- settlement
- idea
- skill
- example
- practice
- correction

Population and settlement: Worked Example

Evidence model for Population and settlement: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Population and settlement: Vocabulary And Study Skill

Use these words and study moves before you practise Population and settlement. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Population and settlement
- Population
- settlement
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Population and settlement without a clear example, method, or evidence.

Population and settlement: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Population and settlement.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Population and settlement: Practice And Correction

Practice for Population and settlement:

1. Use an example from your community or country to explain: explain general population concepts and settlement patterns (rural and urban).
2. Use an example from your community or country to explain: define population and associated concepts.
3. Use an example from your community or country to explain: identify the types of settlement.
4. Use an example from your community or country to explain: define the concept of migration.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to population and settlement and write two useful sentences about it.

Population and settlement: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Population and settlement.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Population and settlement: Outcome Check

Show that you can explain general population concepts and settlement patterns (rural and urban).

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Population and settlement: Outcome Check

Show that you can define population and associated concepts.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Economic activities: Lesson Opener

Learning focus: Economic activities

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Economic activities.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- categorise the types of various economic activities and their importance on development
- define economic activity and state various economic activities
- identify the importance of various economic activities
- describe the various economic activities carried out around your school
- explain the importance of economic activities on sustainable development
- understand other perspectives for equitable sustainable development

Inquiry questions:

- How can economic activities help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Economic activities: Learn

Economic activities becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Economic activities
- Economic
- activities
- idea
- skill
- example
- practice
- correction

Economic activities: Worked Example

Evidence model for Economic activities: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

Economic activities: Vocabulary And Study Skill

Use these words and study moves before you practise Economic activities. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Economic activities
- Economic
- activities
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Economic activities without a clear example, method, or evidence.

Economic activities: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Economic activities.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Economic activities: Practice And Correction

Practice for Economic activities:

1. Use an example from your community or country to explain: categorise the types of various economic activities and their importance on development.
2. Use an example from your community or country to explain: define economic activity and state various economic activities.
3. Use an example from your community or country to explain: identify the importance of various economic activities.
4. Use an example from your community or country to explain: describe the various economic activities carried out around your school.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to economic activities and write two useful sentences about it.

Economic activities: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Economic activities.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Economic activities: Outcome Check

Show that you can categorise the types of various economic activities and their importance on development.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Economic activities: Outcome Check

Show that you can define economic activity and state various economic activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Forms of relief: Review Clinic 1

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Forms of relief that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Rocks: Review Clinic 2

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Rocks that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Soils: Review Clinic 3

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Soils that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Weather and climate: Review Clinic 4

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Weather and climate that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Glossary

Use this glossary to revise important words in Geography and Environment.

- Forms of relief: Explain this term using an example from the book, your school, or your community.
- Rocks: Explain this term using an example from the book, your school, or your community.
- Soils: Explain this term using an example from the book, your school, or your community.
- Weather and climate: Explain this term using an example from the book, your school, or your community.
- Vegetation: Explain this term using an example from the book, your school, or your community.
- General organisation of hydrography: Explain this term using an example from the book, your school, or your community.
- Hazards: Explain this term using an example from the book, your school, or your community.
- Population and settlement: Explain this term using an example from the book, your school, or your community.
- Economic activities: Explain this term using an example from the book, your school, or your community.

Add five more words from your lessons and write your own meanings.

Answer And Teacher Notes

A strong Geography and Environment answer responds to the exact task, uses correct vocabulary, gives a clear example or evidence, and shows correction after feedback. For practical work, name materials, safety, process, quality checks, peer feedback, and one improvement made after review.

Final Project

Create a final project for Geography and Environment that shows what you can now do independently.

Your project must include:

1. A clear title.
2. A real-life problem, question, text, performance, investigation, design, or worked task.
3. Evidence from at least three lessons in this book.
4. A drawing, table, map, chart, model, dialogue, paragraph, performance plan, practical product, or worked solution.
5. A correction note showing one improvement after feedback.
6. A short reflection explaining what you learned, what was difficult, and what you will practise next.

Presentation check: keep the work neat, label important parts, use correct vocabulary, and be ready to explain your choices to a classmate or teacher.
