KITABU QUEST S2 Geography and Environment

Rwanda REB-CBC learner book

Mascot: mountain gorilla

This KITABU QUEST book turns the curriculum into short lessons, worked examples, guided activities, practice, review, and home links for Rwanda learners.

## How To Use This Book

This book helps S2 learners study Geography and Environment one teachable topic at a time.

1. Start with the inquiry question and say what you already know.
2. Read the Learn section slowly and mark new words.
3. Try the worked example before reading the full solution.
4. Complete the activity and practice tasks.
5. Correct your answer using the success criteria.
6. Ask for support when your answer is still unclear.

Subject method: Use maps, field observations, diagrams, environmental evidence, and local examples.

## Learning Skills In This Book

Each topic builds knowledge, skill, values, communication, collaboration, critical thinking, creativity, digital awareness, and self-confidence.

Study actively: speak answers aloud, draw when useful, show your working, cite evidence, use local examples, and correct mistakes after feedback.

A strong answer is specific. It names the idea, gives evidence or method, applies it to the task, and checks whether it answers the question.

## Table Of Contents

Use this table to move through the book one topic at a time. Each topic has a lesson opener, clear teaching, a model or example, guided work, practice, and checks for understanding.

1. Map work interpretation
2. Types of photographs
3. Tectonic processes
4. Relief in Rwanda
5. Weathering and rocks
6. Soils in Rwanda
7. Vegetation in Rwanda
8. Drainage in Rwanda
9. Population in Rwanda
10. Rural and urban settlement in Rwanda
11. Agricultural systems in Rwanda
12. Forestry in Rwanda

As you finish each topic, return to the success criteria and correct one answer before moving on.

## Map work interpretation: Lesson Opener

Learning focus: Map work interpretation

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Map work interpretation.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- demonstrate how to measure distance and area on a map
- identify places and features on a map
- state the bearings and directions of places and features on a map
- use different scales to measure distance and calculate areas from topographic maps
- state different ways of representing relief on maps
- locate places and features on a map using grid references

Inquiry questions:

- How can map work interpretation help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Map work interpretation: Learn

Map work interpretation becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Map work interpretation
- work
- interpretation
- idea
- skill
- example
- practice
- correction

## Map work interpretation: Worked Example

Evidence model for Map work interpretation: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Map work interpretation: Vocabulary And Study Skill

Use these words and study moves before you practise Map work interpretation. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Map work interpretation
- work
- interpretation
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Map work interpretation without a clear example, method, or evidence.

## Map work interpretation: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Map work interpretation.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Map work interpretation: Practice And Correction**

Practice for Map work interpretation:

1. Use an example from your community or country to explain: demonstrate how to measure distance and area on a map.
2. Use an example from your community or country to explain: identify places and features on a map.
3. Use an example from your community or country to explain: state the bearings and directions of places and features on a map.
4. Use an example from your community or country to explain: use different scales to measure distance and calculate areas from topographic maps.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to map work interpretation and write two useful sentences about it.

## **Map work interpretation: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Map work interpretation.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Map work interpretation: Outcome Check

Show that you can demonstrate how to measure distance and area on a map.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Map work interpretation: Outcome Check

Show that you can identify places and features on a map.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Types of photographs: Lesson Opener

Learning focus: Types of photographs

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Types of photographs.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- interpret different types of photographs
- name different types of photographs
- state different parts of a photograph
- identify the importance of photographs
- observe and interpret photographs of the local environment
- explain how different types of photographs are taken

Inquiry questions:

- How can types of photographs help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Types of photographs: Learn**

Types of photographs becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Types of photographs
- Types
- photographs
- idea
- skill
- example
- practice
- correction

## **Types of photographs: Worked Example**

Evidence model for Types of photographs: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Types of photographs: Vocabulary And Study Skill

Use these words and study moves before you practise Types of photographs. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Types of photographs
- Types
- photographs
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Types of photographs without a clear example, method, or evidence.

## Types of photographs: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Types of photographs.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## Types of photographs: Practice And Correction

Practice for Types of photographs:

1. Use an example from your community or country to explain: interpret different types of photographs.
2. Use an example from your community or country to explain: name different types of photographs.
3. Use an example from your community or country to explain: state different parts of a photograph.
4. Use an example from your community or country to explain: identify the importance of photographs.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to types of photographs and write two useful sentences about it.

## **Types of photographs: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Types of photographs.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Types of photographs: Outcome Check**

Show that you can interpret different types of photographs.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Types of photographs: Outcome Check**

Show that you can name different types of photographs.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tectonic processes: Lesson Opener**

Learning focus: Tectonic processes

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Tectonic processes.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- explain the tectonic theory that has shaped the landscape we see
- explain the internal landform processes in the Earth's crust
- differentiate between faulting, folding and warping
- locate areas of folding, faulting and warping in Africa
- infer landforms based on their environments
- evaluate the causes and consequences of faulting, folding, and warping

Inquiry questions:

- How can tectonic processes help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tectonic processes: Learn**

Tectonic processes becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Tectonic processes
- Tectonic
- processes
- idea
- skill
- example
- practice
- correction

## **Tectonic processes: Worked Example**

Evidence model for Tectonic processes: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Tectonic processes: Vocabulary And Study Skill**

Use these words and study moves before you practise Tectonic processes. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Tectonic processes
- Tectonic
- processes
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Tectonic processes without a clear example, method, or evidence.

## **Tectonic processes: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Tectonic processes.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Tectonic processes: Practice And Correction**

Practice for Tectonic processes:

1. Use an example from your community or country to explain: explain the tectonic theory that has shaped the landscape we see.
2. Use an example from your community or country to explain: explain the internal landform processes in the Earth's crust.
3. Use an example from your community or country to explain: differentiate between faulting, folding and warping.
4. Use an example from your community or country to explain: locate areas of folding, faulting and warping in Africa.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to tectonic processes and write two useful sentences about it.

## **Tectonic processes: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Tectonic processes.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tectonic processes: Outcome Check**

Show that you can explain the tectonic theory that has shaped the landscape we see.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tectonic processes: Outcome Check**

Show that you can explain the internal landform processes in the Earth's crust.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Relief in Rwanda: Lesson Opener**

Learning focus: Relief in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Relief in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- distinguish different forms of relief features of Rwanda and their relationship with human activities
- give the coordinates and size of Rwanda
- compare the different forms of relief in Rwanda
- give the relationship between reliefs and human activities in Rwanda
- locate Rwanda on the map of Africa and give its geographical coordinates
- draw sketch diagrams of different forms of reliefs in Rwanda

Inquiry questions:

- How can relief in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Relief in Rwanda: Learn**

Relief in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Relief in Rwanda
- Relief
- Rwanda
- idea
- skill
- example
- practice
- correction

## **Relief in Rwanda: Worked Example**

Evidence model for Relief in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Relief in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Relief in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Relief in Rwanda
- Relief
- Rwanda
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Relief in Rwanda without a clear example, method, or evidence.

## **Relief in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Relief in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Relief in Rwanda: Practice And Correction**

Practice for Relief in Rwanda:

1. Use an example from your community or country to explain: distinguish different forms of relief features of Rwanda and their relationship with human activities.
2. Use an example from your community or country to explain: give the coordinates and size of Rwanda.
3. Use an example from your community or country to explain: compare the different forms of relief in Rwanda.
4. Use an example from your community or country to explain: give the relationship between reliefs and human activities in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to relief in Rwanda and write two useful sentences about it.

## **Relief in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Relief in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Relief in Rwanda: Outcome Check**

Show that you can distinguish different forms of relief features of Rwanda and their relationship with human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Relief in Rwanda: Outcome Check**

Show that you can give the coordinates and size of Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

# Weathering and rocks: Lesson Opener

Learning focus: Weathering and rocks

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Weathering and rocks.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- distinguish between different types of weathering and their relationship with rocks
- state and define the different types of weathering
- explain the difference that exists between different types of weathering
- state the factors influencing weathering
- state the relationship that exists between weathering and rock types
- describe the different types and processes of weathering

Inquiry questions:

- How can weathering and rocks help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Weathering and rocks: Learn

Weathering and rocks becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Weathering and rocks
- Weathering
- rocks
- idea
- skill
- example
- practice
- correction

## Weathering and rocks: Worked Example

Evidence model for Weathering and rocks: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Weathering and rocks: Vocabulary And Study Skill

Use these words and study moves before you practise Weathering and rocks. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Weathering and rocks
- Weathering
- rocks
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Weathering and rocks without a clear example, method, or evidence.

## Weathering and rocks: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Weathering and rocks.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Weathering and rocks: Practice And Correction**

Practice for Weathering and rocks:

1. Use an example from your community or country to explain: distinguish between different types of weathering and their relationship with rocks.
2. Use an example from your community or country to explain: state and define the different types of weathering.
3. Use an example from your community or country to explain: explain the difference that exists between different types of weathering.
4. Use an example from your community or country to explain: state the factors influencing weathering.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to weathering and rocks and write two useful sentences about it.

## **Weathering and rocks: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Weathering and rocks.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Weathering and rocks: Outcome Check**

Show that you can distinguish between different types of weathering and their relationship with rocks.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Weathering and rocks: Outcome Check**

Show that you can state and define the different types of weathering.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Soils in Rwanda: Lesson Opener**

Learning focus: Soils in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Soils in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- apply appropriate measures of soil conservation and soil erosion control in Rwanda
- state the different types of soils in Rwanda
- state the importance of soil in Rwanda
- locate areas of poor and fertile soil
- identify the causes and effects of soil erosion in Rwanda
- state different soil conservation methods in Rwanda

Inquiry questions:

- How can soils in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Soils in Rwanda: Learn

Soils in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Soils in Rwanda
- Soils
- Rwanda
- idea
- skill
- example
- practice
- correction

## Soils in Rwanda: Worked Example

Evidence model for Soils in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Soils in Rwanda: Vocabulary And Study Skill

Use these words and study moves before you practise Soils in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Soils in Rwanda
- Soils
- Rwanda
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Soils in Rwanda without a clear example, method, or evidence.

## Soils in Rwanda: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Soils in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## Soils in Rwanda: Practice And Correction

Practice for Soils in Rwanda:

1. Use an example from your community or country to explain: apply appropriate measures of soil conservation and soil erosion control in Rwanda.
2. Use an example from your community or country to explain: state the different types of soils in Rwanda.
3. Use an example from your community or country to explain: state the importance of soil in Rwanda.
4. Use an example from your community or country to explain: locate areas of poor and fertile soil.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to soils in Rwanda and write two useful sentences about it.

## **Soils in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Soils in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Soils in Rwanda: Outcome Check**

Show that you can apply appropriate measures of soil conservation and soil erosion control in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Soils in Rwanda: Outcome Check**

Show that you can state the different types of soils in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Vegetation in Rwanda: Lesson Opener**

Learning focus: Vegetation in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Vegetation in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- explain the importance of different types of vegetation in Rwanda
- locate the major vegetation types in Rwanda
- state the factors that influence vegetation distribution in Rwanda
- state the impacts of man's activities on vegetation in Rwanda
- outline the measures of conserving natural vegetation in Rwanda
- classify the different types of natural vegetation in Rwanda

Inquiry questions:

- How can vegetation in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Vegetation in Rwanda: Learn**

Vegetation in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Vegetation in Rwanda
- Vegetation
- Rwanda
- idea
- skill
- example
- practice
- correction

## **Vegetation in Rwanda: Worked Example**

Evidence model for Vegetation in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Vegetation in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Vegetation in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Vegetation in Rwanda
- Vegetation
- Rwanda
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Vegetation in Rwanda without a clear example, method, or evidence.

## **Vegetation in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Vegetation in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Vegetation in Rwanda: Practice And Correction**

Practice for Vegetation in Rwanda:

1. Use an example from your community or country to explain: explain the importance of different types of vegetation in Rwanda.
2. Use an example from your community or country to explain: locate the major vegetation types in Rwanda.
3. Use an example from your community or country to explain: state the factors that influence vegetation distribution in Rwanda.
4. Use an example from your community or country to explain: state the impacts of man's activities on vegetation in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to vegetation in Rwanda and write two useful sentences about it.

# Vegetation in Rwanda: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Vegetation in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Vegetation in Rwanda: Outcome Check

Show that you can explain the importance of different types of vegetation in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Vegetation in Rwanda: Outcome Check

Show that you can locate the major vegetation types in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Drainage in Rwanda: Lesson Opener**

Learning focus: Drainage in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Drainage in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- to investigate the importance of drainage and the challenges of obtaining sustainable and clean water in Rwanda
- identify the major rivers, swamps and lakes of Rwanda
- state the mode of formation of lakes in Rwanda
- suggest the importance of drainage in Rwanda
- explain the challenges of obtaining sustainable and clean water in Rwanda
- state methods of conserving

Inquiry questions:

- How can drainage in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Drainage in Rwanda: Learn**

Drainage in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Drainage in Rwanda
- Drainage
- Rwanda
- idea
- skill
- example
- practice
- correction

## **Drainage in Rwanda: Worked Example**

Evidence model for Drainage in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Drainage in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Drainage in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Drainage in Rwanda
- Drainage
- Rwanda
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Drainage in Rwanda without a clear example, method, or evidence.

## **Drainage in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Drainage in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Drainage in Rwanda: Practice And Correction**

Practice for Drainage in Rwanda:

1. Use an example from your community or country to explain: to investigate the importance of drainage and the challenges of obtaining sustainable and clean water in Rwanda.
2. Use an example from your community or country to explain: identify the major rivers, swamps and lakes of Rwanda.
3. Use an example from your community or country to explain: state the mode of formation of lakes in Rwanda.
4. Use an example from your community or country to explain: suggest the importance of drainage in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to drainage in Rwanda and write two useful sentences about it.

## **Drainage in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Drainage in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Drainage in Rwanda: Outcome Check**

Show that you can investigate the importance of drainage and the challenges of obtaining sustainable and clean water in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Drainage in Rwanda: Outcome Check**

Show that you can identify the major rivers, swamps and lakes of Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

# Population in Rwanda: Lesson Opener

Learning focus: Population in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Population in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- discuss the demographic problems and possible solutions in Rwanda
- outline the factors influencing population distribution and density in Rwanda
- identify the reasons for the type of population structure of Rwanda
- identify the causes and effects of migration/ population movements in Rwanda
- state the reasons for rapid population growth and its effects on Rwanda
- analyse the factors influencing population distribution in Rwanda

Inquiry questions:

- How can population in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Population in Rwanda: Learn

Population in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Population in Rwanda
- Population
- Rwanda
- idea
- skill
- example
- practice
- correction

## Population in Rwanda: Worked Example

Evidence model for Population in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Population in Rwanda: Vocabulary And Study Skill

Use these words and study moves before you practise Population in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Population in Rwanda
- Population
- Rwanda
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Population in Rwanda without a clear example, method, or evidence.

## Population in Rwanda: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Population in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Population in Rwanda: Practice And Correction**

Practice for Population in Rwanda:

1. Use an example from your community or country to explain: discuss the demographic problems and possible solutions in Rwanda.
2. Use an example from your community or country to explain: outline the factors influencing population distribution and density in Rwanda.
3. Use an example from your community or country to explain: identify the reasons for the type of population structure of Rwanda.
4. Use an example from your community or country to explain: identify the causes and effects of migration/ population movements in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to population in Rwanda and write two useful sentences about it.

## **Population in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Population in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Population in Rwanda: Outcome Check

Show that you can discuss the demographic problems and possible solutions in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Population in Rwanda: Outcome Check

Show that you can outline the factors influencing population distribution and density in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Rural and urban settlement in Rwanda: Lesson Opener

Learning focus: Rural and urban settlement in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Rural and urban settlement in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- explain the impact of rural and urban settlement on the sustainable development of Rwanda
- identify the different settlement patterns in Rwanda and outline their characteristics
- state the problems affecting rural settlements
- state the advantages and disadvantages of planned settlements (Imidugudu)
- identify the major urban centres of Rwanda and outline their functions
- state the factors that favour the growth and development of urban centres

Inquiry questions:

- How can rural and urban settlement in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Rural and urban settlement in Rwanda: Learn**

Rural and urban settlement in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Rural and urban settlement in Rwanda
- Rural
- urban
- settlement
- Rwanda
- idea
- skill
- example

## **Rural and urban settlement in Rwanda: Worked Example**

Evidence model for Rural and urban settlement in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Rural and urban settlement in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Rural and urban settlement in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Rural and urban settlement in Rwanda
- Rural
- urban
- settlement
- Rwanda
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Rural and urban settlement in Rwanda without a clear example, method, or evidence.

## **Rural and urban settlement in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Rural and urban settlement in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Rural and urban settlement in Rwanda: Practice And Correction**

Practice for Rural and urban settlement in Rwanda:

1. Use an example from your community or country to explain: explain the impact of rural and urban settlement on the sustainable development of Rwanda.
2. Use an example from your community or country to explain: identify the different settlement patterns in Rwanda and outline their characteristics.
3. Use an example from your community or country to explain: state the problems affecting rural settlements.
4. Use an example from your community or country to explain: state the advantages and disadvantages of planned settlements (Imidugudu).

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to rural and urban settlement in Rwanda and write two useful sentences about it.

## **Rural and urban settlement in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Rural and urban settlement in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Rural and urban settlement in Rwanda: Outcome Check**

Show that you can explain the impact of rural and urban settlement on the sustainable development of Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Rural and urban settlement in Rwanda: Outcome Check**

Show that you can identify the different settlement patterns in Rwanda and outline their characteristics.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Agricultural systems in Rwanda: Lesson Opener**

Learning focus: Agricultural systems in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Agricultural systems in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- investigate the impact of various agricultural activities on sustainable development in Rwanda
- list the different agricultural systems in Rwanda
- state the major crops grown in Rwanda
- identify the problems facing livestock farming in Rwanda
- state the problems affecting agriculture and solutions
- outline the reasons for agricultural modernisation in Rwanda

Inquiry questions:

- How can agricultural systems in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Agricultural systems in Rwanda: Learn**

Agricultural systems in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Agricultural systems in Rwanda
- Agricultural
- systems
- Rwanda
- idea
- skill
- example
- practice

## **Agricultural systems in Rwanda: Worked Example**

Evidence model for Agricultural systems in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Agricultural systems in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Agricultural systems in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Agricultural systems in Rwanda
- Agricultural
- systems
- Rwanda
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Agricultural systems in Rwanda without a clear example, method, or evidence.

## **Agricultural systems in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Agricultural systems in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Agricultural systems in Rwanda: Practice And Correction**

Practice for Agricultural systems in Rwanda:

1. Use an example from your community or country to explain: investigate the impact of various agricultural activities on sustainable development in Rwanda.
2. Use an example from your community or country to explain: list the different agricultural systems in Rwanda.
3. Use an example from your community or country to explain: state the major crops grown in Rwanda.
4. Use an example from your community or country to explain: identify the problems facing livestock farming in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to agricultural systems in Rwanda and write two useful sentences about it.

## **Agricultural systems in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Agricultural systems in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Agricultural systems in Rwanda: Outcome Check**

Show that you can investigate the impact of various agricultural activities on sustainable development in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Agricultural systems in Rwanda: Outcome Check

Show that you can list the different agricultural systems in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Forestry in Rwanda: Lesson Opener

Learning focus: Forestry in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Forestry in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- investigate the impact of various forestry activities on sustainable development in Rwanda
- define a forest and forestry
- name the major forest types and locate them in Rwanda
- state the importance of forests to the economic development of Rwanda
- identify the causes of deforestation and its solutions in Rwanda
- explain and apply forestry in Rwanda in a real learning situation

Inquiry questions:

- How can forestry in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Forestry in Rwanda: Learn

Forestry in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Forestry in Rwanda
- Forestry
- Rwanda
- idea
- skill
- example
- practice
- correction

## **Forestry in Rwanda: Worked Example**

Evidence model for Forestry in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Forestry in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Forestry in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Forestry in Rwanda
- Forestry
- Rwanda
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Forestry in Rwanda without a clear example, method, or evidence.

## **Forestry in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Forestry in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Forestry in Rwanda: Practice And Correction**

Practice for Forestry in Rwanda:

1. Use an example from your community or country to explain: investigate the impact of various forestry activities on sustainable development in Rwanda.
2. Use an example from your community or country to explain: define a forest and forestry.
3. Use an example from your community or country to explain: name the major forest types and locate them in Rwanda.
4. Use an example from your community or country to explain: state the importance of forests to the economic development of Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to forestry in Rwanda and write two useful sentences about it.

## **Forestry in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Forestry in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Forestry in Rwanda: Outcome Check**

Show that you can investigate the impact of various forestry activities on sustainable development in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Forestry in Rwanda: Outcome Check**

Show that you can define a forest and forestry.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Mining and quarrying in Rwanda: Lesson Opener**

Learning focus: Mining and quarrying in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Mining and quarrying in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- investigate the impact of mining and quarrying activities on sustainable development in Rwanda
- define mining and quarrying
- name the major quarrying and mining locations in Rwanda
- explain the factors that influence mineral exploitation in Rwanda
- state the problems resulting from mining and quarrying in Rwanda
- outline the future prospects for mineral

Inquiry questions:

- How can mining and quarrying in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Mining and quarrying in Rwanda: Learn**

Mining and quarrying in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Mining and quarrying in Rwanda
- Mining
- quarrying
- Rwanda
- idea
- skill
- example

## Mining and quarrying in Rwanda: Worked Example

Evidence model for Mining and quarrying in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Mining and quarrying in Rwanda: Vocabulary And Study Skill

Use these words and study moves before you practise Mining and quarrying in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Mining and quarrying in Rwanda
- Mining
- quarrying
- Rwanda
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Mining and quarrying in Rwanda without a clear example, method, or evidence.

## Mining and quarrying in Rwanda: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Mining and quarrying in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Mining and quarrying in Rwanda: Practice And Correction**

Practice for Mining and quarrying in Rwanda:

1. Use an example from your community or country to explain: investigate the impact of mining and quarrying activities on sustainable development in Rwanda.
2. Use an example from your community or country to explain: define mining and quarrying.
3. Use an example from your community or country to explain: name the major quarrying and mining locations in Rwanda.
4. Use an example from your community or country to explain: explain the factors that influence mineral exploitation in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to mining and quarrying in Rwanda and write two useful sentences about it.

## **Mining and quarrying in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Mining and quarrying in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Mining and quarrying in Rwanda: Outcome Check**

Show that you can investigate the impact of mining and quarrying activities on sustainable development in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Mining and quarrying in Rwanda: Outcome Check**

Show that you can define mining and quarrying.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and energy in Rwanda: Lesson Opener**

Learning focus: Power and energy in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Power and energy in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- investigate the impact of power and energy production on sustainable development of Rwanda
- state the various categories of renewable and non-renewable energy sources
- explain the major sources of energy and power available in Rwanda
- outline problems and future prospects for power and energy production in Rwanda
- differentiate between renewable and non-renewable energy resources
- explain the reasons for increased power and energy production in Rwanda

Inquiry questions:

- How can power and energy in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and energy in Rwanda: Learn**

Power and energy in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Power and energy in Rwanda
- Power
- energy
- Rwanda
- idea
- skill
- example
- practice

## **Power and energy in Rwanda: Worked Example**

Evidence model for Power and energy in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## Power and energy in Rwanda: Vocabulary And Study Skill

Use these words and study moves before you practise Power and energy in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Power and energy in Rwanda
- Power
- energy
- Rwanda
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Power and energy in Rwanda without a clear example, method, or evidence.

## Power and energy in Rwanda: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Power and energy in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## Power and energy in Rwanda: Practice And Correction

Practice for Power and energy in Rwanda:

1. Use an example from your community or country to explain: investigate the impact of power and energy production on sustainable development of Rwanda.
2. Use an example from your community or country to explain: state the various categories of renewable and non-renewable energy sources.
3. Use an example from your community or country to explain: explain the major sources of energy and power available in Rwanda.
4. Use an example from your community or country to explain: outline problems and future prospects for power and energy production in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to power and energy in Rwanda and write two useful sentences about it.

## **Power and energy in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Power and energy in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and energy in Rwanda: Outcome Check**

Show that you can investigate the impact of power and energy production on sustainable development of Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and energy in Rwanda: Outcome Check**

Show that you can state the various categories of renewable and non-renewable energy sources.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tourism in Rwanda: Lesson Opener**

Learning focus: Tourism in Rwanda

Country link: a Rwandan map, community, citizenship, culture, environment, or heritage example for Tourism in Rwanda.

Progression focus: connect ideas across topics and explain causes, methods, or consequences; use maps, places, data, and environmental evidence.

By the end of this topic, you should be able to:

- investigate the impact of tourism on sustainable development of Rwanda
- identify the different tourist attractions in Rwanda
- identify the importance of tourism to the economy of Rwanda
- explain the problems and future prospects of tourism in Rwanda
- identify the relationship between tourism in Rwanda with regional countries: Kenya, Uganda, and Tanzania
- compare the various tourist potentials in Rwanda with those in other countries

Inquiry questions:

- How can tourism in Rwanda help you solve a real problem in Geography and Environment?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tourism in Rwanda: Learn**

Tourism in Rwanda becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Tourism in Rwanda
- Tourism
- Rwanda
- idea
- skill
- example
- practice
- correction

## **Tourism in Rwanda: Worked Example**

Evidence model for Tourism in Rwanda: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography and Environment.

## **Tourism in Rwanda: Vocabulary And Study Skill**

Use these words and study moves before you practise Tourism in Rwanda. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Tourism in Rwanda
- Tourism
- Rwanda
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Tourism in Rwanda without a clear example, method, or evidence.

## **Tourism in Rwanda: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwandan map, community, citizenship, culture, environment, or heritage example for Tourism in Rwanda.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Tourism in Rwanda: Practice And Correction**

Practice for Tourism in Rwanda:

1. Use an example from your community or country to explain: investigate the impact of tourism on sustainable development of Rwanda.
2. Use an example from your community or country to explain: identify the different tourist attractions in Rwanda.
3. Use an example from your community or country to explain: identify the importance of tourism to the economy of Rwanda.
4. Use an example from your community or country to explain: explain the problems and future prospects of tourism in Rwanda.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to tourism in Rwanda and write two useful sentences about it.

# **Tourism in Rwanda: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Tourism in Rwanda.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tourism in Rwanda: Outcome Check**

Show that you can investigate the impact of tourism on sustainable development of Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Tourism in Rwanda: Outcome Check**

Show that you can identify the different tourist attractions in Rwanda.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Map work interpretation: Review Clinic 1**

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Map work interpretation that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## **Types of photographs: Review Clinic 2**

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Types of photographs that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## **Tectonic processes: Review Clinic 3**

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Tectonic processes that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## Relief in Rwanda: Review Clinic 4

Use this review clinic to strengthen Geography and Environment without copying earlier answers.

1. Choose one idea from Relief in Rwanda that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## Glossary

Use this glossary to revise important words in Geography and Environment.

- Map work interpretation: Explain this term using an example from the book, your school, or your community.
- Types of photographs: Explain this term using an example from the book, your school, or your community.
- Tectonic processes: Explain this term using an example from the book, your school, or your community.
- Relief in Rwanda: Explain this term using an example from the book, your school, or your community.
- Weathering and rocks: Explain this term using an example from the book, your school, or your community.
- Soils in Rwanda: Explain this term using an example from the book, your school, or your community.
- Vegetation in Rwanda: Explain this term using an example from the book, your school, or your community.
- Drainage in Rwanda: Explain this term using an example from the book, your school, or your community.
- Population in Rwanda: Explain this term using an example from the book, your school, or your community.
- Rural and urban settlement in Rwanda: Explain this term using an example from the book, your school, or your community.
- Agricultural systems in Rwanda: Explain this term using an example from the book, your school, or your community.
- Forestry in Rwanda: Explain this term using an example from the book, your school, or your community.
- Mining and quarrying in Rwanda: Explain this term using an example from the book, your school, or your community.
- Power and energy in Rwanda: Explain this term using an example from the book, your school, or your community.
- Tourism in Rwanda: Explain this term using an example from the book, your school, or your community.

Add five more words from your lessons and write your own meanings.

## **Answer And Teacher Notes**

A strong Geography and Environment answer responds to the exact task, uses correct vocabulary, gives a clear example or evidence, and shows correction after feedback. For practical work, name materials, safety, process, quality checks, peer feedback, and one improvement made after review.

## **Final Project**

Create a final project for Geography and Environment that shows what you can now do independently.

Your project must include:

1. A clear title.
2. A real-life problem, question, text, performance, investigation, design, or worked task.
3. Evidence from at least three lessons in this book.
4. A drawing, table, map, chart, model, dialogue, paragraph, performance plan, practical product, or worked solution.
5. A correction note showing one improvement after feedback.
6. A short reflection explaining what you learned, what was difficult, and what you will practise next.

Presentation check: keep the work neat, label important parts, use correct vocabulary, and be ready to explain your choices to a classmate or teacher.
