Title Page

KITABU QUEST S5 Geography

Rwanda REB-CBC learner book

Mascot: mountain gorilla

This KITABU QUEST book turns the curriculum into short lessons, worked examples, guided activities, practice, review, and home links for Rwanda learners.

How To Use This Book

This book helps S5 learners study Geography one teachable topic at a time.

1. Start with the inquiry question and say what you already know.
2. Read the Learn section slowly and mark new words.
3. Try the worked example before reading the full solution.
4. Complete the activity and practice tasks.
5. Correct your answer using the success criteria.
6. Ask for support when your answer is still unclear.

Subject method: Use maps, field observations, diagrams, and local examples.

Learning Skills In This Book

Each topic builds knowledge, skill, values, communication, collaboration, critical thinking, creativity, digital awareness, and self-confidence.

Study actively: speak answers aloud, draw when useful, show your working, cite evidence, use local examples, and correct mistakes after feedback.

A strong answer is specific. It names the idea, gives evidence or method, applies it to the task, and checks whether it answers the question.

Table Of Contents

Use this table to move through the book one topic at a time. Each topic has a lesson opener, clear teaching, a model or example, guided work, practice, and checks for understanding.

1. Statistical Graphs, Diagrams and Maps
2. Bearings, directions, distances and areas on a map
3. Map work interpretation
4. The Universe and the Solar System
5. The Origin of the Earth
6. Internal landform Processes 6.1. Faulting
7. Internal Landform Processes 6.2. Folding and Warping
8. Internal Landform Processes 6.3. Vulcanicity and Earthquakes
9. Soils
10. Weather and Climate of the world
11. Natural Vegetation of the world
12. Population Growth in the world
13. Urbanisation in the world

As you finish each topic, return to the success criteria and correct one answer before moving on.

Statistical Graphs, Diagrams and Maps: Lesson Opener

Learning focus: Statistical Graphs, Diagrams and Maps

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Statistical Graphs, Diagrams and Maps.

By the end of this topic, you should be able to:

- the interpret the statistical data, construct statistical graphs, diagrams and the maps
- state the advantages and disadvantages of the statistical graphs and the diagrams
- identify the importance of statistics in geography
- outline the different statistical methods
- list the advantages and disadvantages of each statistical method
- create the statistical graphs and diagrams to present the various geographical data

Inquiry questions:

- How can statistical graphs, diagrams and maps help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Statistical Graphs, Diagrams and Maps: Learn

Statistical Graphs, Diagrams and Maps becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Statistical Graphs, Diagrams and Maps
- Statistical
- Graphs
- Diagrams
- Maps
- idea
- skill
- example

Statistical Graphs, Diagrams and Maps: Worked Example

Evidence model for Statistical Graphs, Diagrams and Maps: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Statistical Graphs, Diagrams and Maps: Vocabulary And Study Skill

Use these words and study moves before you practise Statistical Graphs, Diagrams and Maps. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Statistical Graphs, Diagrams and Maps
- Statistical
- Graphs
- Diagrams
- Maps
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Statistical Graphs, Diagrams and Maps without a clear example, method, or evidence.

Statistical Graphs, Diagrams and Maps: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Statistical Graphs, Diagrams and Maps.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Statistical Graphs, Diagrams and Maps: Practice And Correction

Practice for Statistical Graphs, Diagrams and Maps:

1. Use an example from your community or country to explain: the interpret the statistical data, construct statistical graphs, diagrams and the maps.
2. Use an example from your community or country to explain: state the advantages and disadvantages of the statistical graphs and the diagrams.
3. Use an example from your community or country to explain: identify the importance of statistics in geography.
4. Use an example from your community or country to explain: outline the different statistical methods.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to statistical graphs, diagrams and maps and write two useful sentences about it.

Statistical Graphs, Diagrams and Maps: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Statistical Graphs, Diagrams and Maps.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Statistical Graphs, Diagrams and Maps: Outcome Check

Show that you can interpret the statistical data, construct statistical graphs, diagrams and the maps.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Statistical Graphs, Diagrams and Maps: Outcome Check

Show that you can state the advantages and disadvantages of the statistical graphs and the diagrams.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Bearings, directions, distances and areas on a map: Lesson Opener

Learning focus: Bearings, directions, distances and areas on a map

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Bearings, directions, distances and areas on a map.

By the end of this topic, you should be able to:

- the measure the bearings and the directions, calculate distances and areas on a map
- identify the places on a topographic map using Easting and Northing
- tell the directions and bearings on the topographic maps
- estimate the distances and areas on the topographic maps
- give the areas on the topographic maps
- interpret the relief on the maps using contours, spot heights,

Inquiry questions:

- How can bearings, directions, distances and areas on a map help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Bearings, directions, distances and areas on a map: Learn

Bearings, directions, distances and areas on a map becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Bearings, directions, distances and areas on a map
- Bearings
- directions
- distances
- areas
- idea
- skill
- example

Bearings, directions, distances and areas on a map: Worked Example

Evidence model for Bearings, directions, distances and areas on a map: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Bearings, directions, distances and areas on a map: Vocabulary And Study Skill

Use these words and study moves before you practise Bearings, directions, distances and areas on a map. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Bearings, directions, distances and areas on a map
- Bearings
- directions
- distances
- areas
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Bearings, directions, distances and areas on a map without a clear example, method, or evidence.

Bearings, directions, distances and areas on a map: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Bearings, directions, distances and areas on a map.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Bearings, directions, distances and areas on a map: Practice And Correction

Practice for Bearings, directions, distances and areas on a map:

1. Use an example from your community or country to explain: the measure the bearings and the directions, calculate distances and areas on a map.
2. Use an example from your community or country to explain: identify the places on a topographic map using Easting and Northing.
3. Use an example from your community or country to explain: tell the directions and bearings on the topographic maps.
4. Use an example from your community or country to explain: estimate the distances and areas on the topographic maps.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to bearings, directions, distances and areas on a map and write two useful sentences about it.

Bearings, directions, distances and areas on a map: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Bearings, directions, distances and areas on a map.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Bearings, directions, distances and areas on a map: Outcome Check

Show that you can measure the bearings and the directions, calculate distances and areas on a map.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Bearings, directions, distances and areas on a map: Outcome Check

Show that you can identify the places on a topographic map using Easting and Northing.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Map work interpretation: Lesson Opener

Learning focus: Map work interpretation

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Map work interpretation.

By the end of this topic, you should be able to:

- the explain the relationship between the physical aspects and human activities on maps
- identify the physical and human aspects on the ordinary survey maps
- state the relationship between the physical and human aspects on the topographic maps
- describe the physical and human aspects on the topographic map
- describe the relationship among the physical and human aspects on the topographical maps
- appreciate the importance of using the topographic maps to interpret the geographical phenomena and to understand the relationship between the relief and human activities

Inquiry questions:

- How can map work interpretation help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Map work interpretation: Learn

Map work interpretation becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Map work interpretation
- work
- interpretation
- idea
- skill
- example
- practice
- correction

Map work interpretation: Worked Example

Evidence model for Map work interpretation: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Map work interpretation: Vocabulary And Study Skill

Use these words and study moves before you practise Map work interpretation. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Map work interpretation
- work
- interpretation
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Map work interpretation without a clear example, method, or evidence.

Map work interpretation: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Map work interpretation.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Map work interpretation: Practice And Correction

Practice for Map work interpretation:

1. Use an example from your community or country to explain: the explain the relationship between the physical aspects and human activities on maps.
2. Use an example from your community or country to explain: identify the physical and human aspects on the ordinary survey maps.
3. Use an example from your community or country to explain: state the relationship between the physical and human aspects on the topographic maps.
4. Use an example from your community or country to explain: describe the physical and human aspects on the topographic map.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to map work interpretation and write two useful sentences about it.

Map work interpretation: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Map work interpretation.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Map work interpretation: Outcome Check

Show that you can the explain the relationship between the physical aspects and human activities on maps.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Map work interpretation: Outcome Check

Show that you can identify the physical and human aspects on the ordinary survey maps.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

The Universe and the Solar System: Lesson Opener

Learning focus: The Universe and the Solar System

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for The Universe and the Solar System.

By the end of this topic, you should be able to:

- the distinguish between the components of the universe and the Solar system
- identify the components of the universe and the solar system
- identify the planets in the solar system
- give the influence of the sun on the Earth
- outline the characteristics of the different planets
- state the effects of the earth's movements

Inquiry questions:

- How can the universe and the solar system help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

The Universe and the Solar System: Learn

The Universe and the Solar System becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- The Universe and the Solar System
- Universe
- Solar
- System
- idea
- skill
- example
- practice

The Universe and the Solar System: Worked Example

Evidence model for The Universe and the Solar System: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

The Universe and the Solar System: Vocabulary And Study Skill

Use these words and study moves before you practise The Universe and the Solar System. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- The Universe and the Solar System
- Universe
- Solar
- System
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about The Universe and the Solar System without a clear example, method, or evidence.

The Universe and the Solar System: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for The Universe and the Solar System.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

The Universe and the Solar System: Practice And Correction

Practice for The Universe and the Solar System:

1. Use an example from your community or country to explain: the distinguish between the components of the universe and the Solar system.
2. Use an example from your community or country to explain: identify the components of the universe and the solar system.
3. Use an example from your community or country to explain: identify the planets in the solar system.
4. Use an example from your community or country to explain: give the influence of the sun on the Earth.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to the universe and the solar system and write two useful sentences about it.

The Universe and the Solar System: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from The Universe and the Solar System.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

The Universe and the Solar System: Outcome Check

Show that you can distinguish between the components of the universe and the Solar system.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

The Universe and the Solar System: Outcome Check

Show that you can identify the components of the universe and the solar system.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

The Origin of the Earth: Lesson Opener

Learning focus: The Origin of the Earth

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for The Origin of the Earth.

By the end of this topic, you should be able to:

- the discuss the theories for the origin of the Earth
- explain the origin and gravity of the earth
- outline the evidences to prove that the earth is spherical/geoid
- explain the internal structure, mineral composition and the superficial configuration of the earth
- state the major geological eras and the periods
- apply the explain how the earth came into existence

Inquiry questions:

- How can the origin of the earth help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

The Origin of the Earth: Learn

The Origin of the Earth becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- The Origin of the Earth
- Origin
- Earth
- idea
- skill

The Origin of the Earth: Worked Example

Evidence model for The Origin of the Earth: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

The Origin of the Earth: Vocabulary And Study Skill

Use these words and study moves before you practise The Origin of the Earth. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- The Origin of the Earth
- Origin
- Earth
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about The Origin of the Earth without a clear example, method, or evidence.

The Origin of the Earth: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for The Origin of the Earth.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

The Origin of the Earth: Practice And Correction

Practice for The Origin of the Earth:

1. Use an example from your community or country to explain: the discuss the theories for the origin of the Earth.
2. Use an example from your community or country to explain: explain the origin and gravity of the earth.
3. Use an example from your community or country to explain: outline the evidences to prove that the earth is spherical/geoid.
4. Use an example from your community or country to explain: explain the internal structure, mineral composition and the superficial configuration of the earth.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to the origin of the earth and write two useful sentences about it.

The Origin of the Earth: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from The Origin of the Earth.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

The Origin of the Earth: Outcome Check

Show that you can discuss the theories for the origin of the Earth.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

The Origin of the Earth: Outcome Check

Show that you can explain the origin and gravity of the earth.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal landform Processes 6.1. Faulting: Lesson Opener

Learning focus: Internal landform Processes 6.1. Faulting

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Internal landform Processes 6.1. Faulting.

By the end of this topic, you should be able to:

- the examine the internal processes responsible for the evolution of different relief landforms
- recall the processes leading to the formation of different faulted features
- identify the major types of faults and the impact of faulting on the landscape and the drainage
- identify the influence of faulting impact to the man
- identify the other areas that are associated with the faulting in the world
- explain the processes responsible for the formation of different faulted landforms

Inquiry questions:

- How can internal landform processes 6.1. faulting help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal landform Processes 6.1. Faulting: Learn

Internal landform Processes 6.1. Faulting becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Internal landform Processes 6.1. Faulting
- Internal
- landform
- Processes
- Faulting
- idea
- skill
- example

Internal landform Processes 6.1. Faulting: Worked Example

Evidence model for Internal landform Processes 6.1. Faulting: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Internal landform Processes 6.1. Faulting: Vocabulary And Study Skill

Use these words and study moves before you practise Internal landform Processes 6.1. Faulting. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Internal landform Processes 6.1. Faulting
- Internal
- landform
- Processes
- Faulting
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Internal landform Processes 6.1. Faulting without a clear example, method, or evidence.

Internal landform Processes 6.1. Faulting: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Internal landform Processes 6.1. Faulting.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Internal landform Processes 6.1. Faulting: Practice And Correction

Practice for Internal landform Processes 6.1. Faulting:

1. Use an example from your community or country to explain: the examine the internal processes responsible for the evolution of different relief landforms.
2. Use an example from your community or country to explain: recall the processes leading to the formation of different faulted features.
3. Use an example from your community or country to explain: identify the major types of faults and the impact of faulting on the landscape and the drainage.
4. Use an example from your community or country to explain: identify the influence of faulting impact to the man.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to internal landform processes 6.1. faulting and write two useful sentences about it.

Internal landform Processes 6.1. Faulting: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Internal landform Processes 6.1. Faulting.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Internal landform Processes 6.1. Faulting: Outcome Check

Show that you can the examine the internal processes responsible for the evolution of different relief landforms.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal landform Processes 6.1. Faulting: Outcome Check

Show that you can recall the processes leading to the formation of different faulted features.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.2. Folding and Warping: Lesson Opener

Learning focus: Internal Landform Processes 6.2. Folding and Warping

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Internal Landform Processes 6.2. Folding and Warping.

By the end of this topic, you should be able to:

- examine the internal processes responsible for the evolution of different relief landforms
- recall the processes of the folding, types of folds and its influence on the drainage
- identify the major landforms associated with the folding
- define warping and the associated landforms
- state the influence of warping on the drainage
- explain the processes responsible for the folding

Inquiry questions:

- How can internal landform processes 6.2. folding and warping help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.2. Folding and Warping: Learn

Internal Landform Processes 6.2. Folding and Warping becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Internal Landform Processes 6.2. Folding and Warping
- Internal
- Landform
- Process
- Folding
- Warping
- idea
- skill

Internal Landform Processes 6.2. Folding and Warping: Worked Example

Evidence model for Internal Landform Processes 6.2. Folding and Warping: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Internal Landform Processes 6.2. Folding and Warping: Vocabulary And Study Skill

Use these words and study moves before you practise Internal Landform Proces ses 6.2. Folding and Warping. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Internal Landform Proces ses 6.2. Folding and Warping
- Internal
- Landform
- Proces
- Folding
- Warping
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Internal Landform Proces ses 6.2. Folding and Warping without a clear example, method, or evidence.

Internal Landform Proces ses 6.2. Folding and Warping: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Internal Landform Proces ses 6.2. Folding and Warping.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Internal Landform Proces ses 6.2. Folding and Warping: Practice And Correction

Practice for Internal Landform Proces ses 6.2. Folding and Warping:

1. Use an example from your community or country to explain: the examine the internal processes responsible for the evolution of different relief landforms.
2. Use an example from your community or country to explain: recall the processes of the folding, types of folds and its influence on the drainage.
3. Use an example from your community or country to explain: identify the major landforms associated with the folding.
4. Use an example from your community or country to explain: define warping and the associated landforms.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to internal landform processes 6.2. folding and warping and write two useful sentences about it.

Internal Landform Processes 6.2. Folding and Warping: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Internal Landform Processes 6.2. Folding and Warping.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.2. Folding and Warping: Outcome Check

Show that you can examine the internal processes responsible for the evolution of different relief landforms.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.2. Folding and Warping: Outcome Check

Show that you can recall the processes of the folding, types of folds and its influence on the drainage.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Lesson Opener

Learning focus: Internal Landform Processes 6.3. Volcanicity and Earthquakes

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Internal Landform Processes 6.3. Volcanicity and Earthquakes.

By the end of this topic, you should be able to:

- the examine the internal processes responsible for the evolution of different relief landforms
- define vulcanicity, volcanicity and recall the volcanic processes
- identify the major landforms associated with vulcanicity and volcanicity
- state the types of volcanoes and their characteristics
- state the impact of volcanicity on the drainage and to the man
- identify the major volcanic regions in the world

Inquiry questions:

- How can internal landform processes 6.3. vulcanicity and earthquakes help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.3. Vulcanicity and Earthquakes: Learn

Internal Landform Processes 6.3. Vulcanicity and Earthquakes becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Internal Landform Processes 6.3. Vulcanicity and Earthquakes
- Internal
- Landform
- Processes
- Vulcanicity
- Earthquakes
- idea
- skill

Internal Landform Processes 6.3. Vulcanicity and Earthquakes: Worked Example

Evidence model for Internal Landform Processes 6.3. Vulcanicity and Earthquakes: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Vocabulary And Study Skill

Use these words and study moves before you practise Internal Landform Processes 6.3. Volcanicity and Earthquakes. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Internal Landform Processes 6.3. Volcanicity and Earthquakes
- Internal
- Landform
- Processes
- Volcanicity
- Earthquakes
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Internal Landform Processes 6.3. Volcanicity and Earthquakes without a clear example, method, or evidence.

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Internal Landform Processes 6.3. Volcanicity and Earthquakes.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Practice And Correction

Practice for Internal Landform Processes 6.3. Volcanicity and Earthquakes:

1. Use an example from your community or country to explain: the examine the internal processes responsible for the evolution of different relief landforms.
2. Use an example from your community or country to explain: define volcanicity, volcanicity and recall the volcanic processes.
3. Use an example from your community or country to explain: identify the major landforms associated with volcanicity and volcanicity.
4. Use an example from your community or country to explain: state the types of volcanoes and their characteristics.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to internal landform processes 6.3. volcanicity and earthquakes and write two useful sentences about it.

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Internal Landform Processes 6.3. Volcanicity and Earthquakes.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Outcome Check

Show that you can examine the internal processes responsible for the evolution of different relief landforms.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Internal Landform Processes 6.3. Volcanicity and Earthquakes: Outcome Check

Show that you can define volcanicity, volcanicity and recall the volcanic processes.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Lesson Opener

Learning focus: Soils

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Soils.

By the end of this topic, you should be able to:

- the investigate the different constituents and morphological properties of the soil
- state the constituents of the soil
- outline the different morphological properties of the soil
- investigate the constituents of the soil
- describe the properties of the soil
- appreciate the importance of soil constituents and the morphological properties of the soil

Inquiry questions:

- How can soils help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Learn

Soils becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Soils
- idea
- skill
- example
- practice
- correction

Soils: Worked Example

Evidence model for Soils: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Soils: Vocabulary And Study Skill

Use these words and study moves before you practise Soils. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Soils
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Soils without a clear example, method, or evidence.

Soils: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Soils.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Soils: Practice And Correction

Practice for Soils:

1. Use an example from your community or country to explain: the investigate the different constituents and morphological properties of the soil.
2. Use an example from your community or country to explain: state the constituents of the soil.
3. Use an example from your community or country to explain: outline the different morphological properties of the soil.
4. Use an example from your community or country to explain: investigate the constituents of the soil.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to soils and write two useful sentences about it.

Soils: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Soils.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Outcome Check

Show that you can the investigate the different constituents and morphological properties of the soil.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Soils: Outcome Check

Show that you can state the constituents of the soil.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and Climate of the world: Lesson Opener

Learning focus: Weather and Climate of the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Weather and Climate of the world.

By the end of this topic, you should be able to:

- the appreciate the importance of the atmosphere, weather and the impact of climate on the environment and human activities in the world
- define the atmosphere
- state the layers of the atmosphere
- define the structure of the atmosphere
- identify the importance of the atmosphere
- identify the composition of the atmosphere

Inquiry questions:

- How can weather and climate of the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and Climate of the world: Learn

Weather and Climate of the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Weather and Climate of the world
- Weather
- Climate
- world
- idea
- skill
- example
- practice

Weather and Climate of the world: Worked Example

Evidence model for Weather and Climate of the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Weather and Climate of the world: Vocabulary And Study Skill

Use these words and study moves before you practise Weather and Climate of the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Weather and Climate of the world
- Weather
- Climate
- world
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Weather and Climate of the world without a clear example, method, or evidence.

Weather and Climate of the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Weather and Climate of the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Weather and Climate of the world: Practice And Correction

Practice for Weather and Climate of the world:

1. Use an example from your community or country to explain: the appreciate the importance of the atmosphere, weather and the impact of climate on the environment and human activities in the world.
2. Use an example from your community or country to explain: define the atmosphere.
3. Use an example from your community or country to explain: state the layers of the atmosphere.
4. Use an example from your community or country to explain: define the structure of the atmosphere.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to weather and climate of the world and write two useful sentences about it.

Weather and Climate of the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Weather and Climate of the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and Climate of the world: Outcome Check

Show that you can appreciate the importance of the atmosphere, weather and the impact of climate on the environment and human activities in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Weather and Climate of the world: Outcome Check

Show that you can define the atmosphere.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Natural Vegetation of the world: Lesson Opener

Learning focus: Natural Vegetation of the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Natural Vegetation of the world.

By the end of this topic, you should be able to:

- the appreciate the distribution of different types of vegetation in the world
- recall the locations of different types of natural vegetation
- identify the factors influencing the vegetation distribution
- outline the importance of the natural vegetation
- examine the classifications of the major types of natural vegetation
- describe the characteristics of each type of natural vegetation

Inquiry questions:

- How can natural vegetation of the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Natural Vegetation of the world: Learn

Natural Vegetation of the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Natural Vegetation of the world
- Natural
- Vegetation
- world
- idea

Natural Vegetation of the world: Worked Example

Evidence model for Natural Vegetation of the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Natural Vegetation of the world: Vocabulary And Study Skill

Use these words and study moves before you practise Natural Vegetation of the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Natural Vegetation of the world
- Natural
- Vegetation
- world
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Natural Vegetation of the world without a clear example, method, or evidence.

Natural Vegetation of the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Natural Vegetation of the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Natural Vegetation of the world: Practice And Correction

Practice for Natural Vegetation of the world:

1. Use an example from your community or country to explain: the appreciate the distribution of different types of vegetation in the world.
2. Use an example from your community or country to explain: recall the locations of different types of natural vegetation.
3. Use an example from your community or country to explain: identify the factors influencing the vegetation distribution.
4. Use an example from your community or country to explain: outline the importance of the natural vegetation.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to natural vegetation of the world and write two useful sentences about it.

Natural Vegetation of the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Natural Vegetation of the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Natural Vegetation of the world: Outcome Check

Show that you can appreciate the distribution of different types of vegetation in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Natural Vegetation of the world: Outcome Check

Show that you can recall the locations of different types of natural vegetation.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Population Growth in the world: Lesson Opener

Learning focus: Population Growth in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Population Growth in the world.

By the end of this topic, you should be able to:

- the discuss the problem of the population growth and the ways of controlling the population growth in the world. Explain the impacts of early sex, HIV/Aids, health risks and STDs on the world's population
- mention the population diversity
- define population concepts
- locate the population distribution and state the factors that account for the population distribution
- define under population and overpopulation
- outline the population problems of the

Inquiry questions:

- How can population growth in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Population Growth in the world: Learn

Population Growth in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Population Growth in the world
- Population
- Growth
- world
- idea
- skill
- example
- practice

Population Growth in the world: Worked Example

Evidence model for Population Growth in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Population Growth in the world: Vocabulary And Study Skill

Use these words and study moves before you practise Population Growth in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Population Growth in the world
- Population
- Growth
- world
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Population Growth in the world without a clear example, method, or evidence.

Population Growth in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Population Growth in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Population Growth in the world: Practice And Correction

Practice for Population Growth in the world:

1. Use an example from your community or country to explain: the discuss the problem of the population growth and the ways of controlling the population growth in the world. Explain the impacts of early sex, HIV/Aids, health risks and STDs on the world's population.
2. Use an example from your community or country to explain: mention the population diversity.
3. Use an example from your community or country to explain: define population concepts.
4. Use an example from your community or country to explain: locate the population distribution and state the factors that account for the population distribution.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to population growth in the world and write two useful sentences about it.

Population Growth in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Population Growth in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Population Growth in the world: Outcome Check

Show that you can discuss the problem of the population growth and the ways of controlling the population growth in the world. Explain the impacts of early sex, HIV/Aids, health risks and STDs on the world's population.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Population Growth in the world: Outcome Check

Show that you can mention the population diversity.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Urbanisation in the world: Lesson Opener

Learning focus: Urbanisation in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Urbanisation in the world.

By the end of this topic, you should be able to:

- the discuss the impact of settlement and urbanisation on the sustainable development of different countries
- identify the major types of settlements
- outline the factors, the effects and the solutions of rural settlements
- define the terms related to urbanisation
- identify the major urban centres and the factors influencing the urban development in the world
- state the functions of the world's major cities and ports

Inquiry questions:

- How can urbanisation in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Urbanisation in the world: Learn

Urbanisation in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Urbanisation in the world
- Urbanisation
- world
- idea
- skill
- example
- practice
- correction

Urbanisation in the world: Worked Example

Evidence model for Urbanisation in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Urbanisation in the world: Vocabulary And Study Skill

Use these words and study moves before you practise Urbanisation in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Urbanisation in the world
- Urbanisation
- world
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Urbanisation in the world without a clear example, method, or evidence.

Urbanisation in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Urbanisation in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Urbanisation in the world: Practice And Correction

Practice for Urbanisation in the world:

1. Use an example from your community or country to explain: the discuss the impact of settlement and urbanisation on the sustainable development of different countries.
2. Use an example from your community or country to explain: identify the major types of settlements.
3. Use an example from your community or country to explain: outline the factors, the effects and the solutions of rural settlements.
4. Use an example from your community or country to explain: define the terms related to urbanisation.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to urbanisation in the world and write two useful sentences about it.

Urbanisation in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Urbanisation in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Urbanisation in the world: Outcome Check

Show that you can the discuss the impact of settlement and urbanisation on the sustainable development of different countries.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Urbanisation in the world: Outcome Check

Show that you can identify the major types of settlements.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Agriculture in the world: Lesson Opener

Learning focus: Agriculture in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Agriculture in the world.

By the end of this topic, you should be able to:

- the explain the impact of agricultural activities on the sustainable development of different countries in the world
- name the different types of crop cultivation methods
- outline the characteristics of the different crop cultivation systems
- state the different types of farming in China
- outline the factors responsible for increasing the agricultural production
- describe the characteristics of the different crop cultivation methods

Inquiry questions:

- How can agriculture in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Agriculture in the world: Learn

Agriculture in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Agriculture in the world
- Agriculture
- world
- idea

Home link: Ask someone at home for one safe example related to agriculture in the world and write two useful sentences about it.

Agriculture in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Agriculture in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Agriculture in the world: Outcome Check

Show that you can explain the impact of agricultural activities on the sustainable development of different countries in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Agriculture in the world: Outcome Check

Show that you can name the different types of crop cultivation methods.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Forestry in the world: Lesson Opener

Learning focus: Forestry in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Forestry in the world.

By the end of this topic, you should be able to:

- the explain the impact of forests and forestry on the sustainable development
- identify the major types of forests in the world
- list the characteristics of the different type of forests
- state the factors leading to the forest distribution and exploitation in the world
- recall the importance of forestry to the economy of the countries
- outline the problems affecting lumbering

Inquiry questions:

- How can forestry in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Forestry in the world: Learn

Forestry in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.

Home link: Ask someone at home for one safe example related to forestry in the world and write two useful sentences about it.

Forestry in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Forestry in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Forestry in the world: Outcome Check

Show that you can explain the impact of forests and forestry on the sustainable development.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Forestry in the world: Outcome Check

Show that you can identify the major types of forests in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Fishing in the world: Lesson Opener

Learning focus: Fishing in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Fishing in the world.

By the end of this topic, you should be able to:

- the explain the impact of fishing on the sustainable development of different countries of the world
- identify the major marine fishing grounds
- identify the major freshwater/inland fisheries
- outline the different methods of catching fish
- name the major types of fishes caught
- outline the factors favouring fishing

Inquiry questions:

- How can fishing in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Fishing in the world: Learn

Fishing in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Fishing in the world
- Fishing
- world
- idea
- skill
- example
- practice
- correction

Fishing in the world: Worked Example

Evidence model for Fishing in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Fishing in the world: Vocabulary And Study Skill

Use these words and study moves before you practise Fishing in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Fishing in the world
- Fishing
- world
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Fishing in the world without a clear example, method, or evidence.

Fishing in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Fishing in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Fishing in the world: Practice And Correction

Practice for Fishing in the world:

1. Use an example from your community or country to explain: the explain the impact of fishing on the sustainable development of different countries of the world.
2. Use an example from your community or country to explain: identify the major marine fishing grounds.
3. Use an example from your community or country to explain: identify the major freshwater/inland fisheries.
4. Use an example from your community or country to explain: outline the different methods of catching fish.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to fishing in the world and write two useful sentences about it.

Fishing in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Fishing in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Fishing in the world: Outcome Check

Show that you can explain the impact of fishing on the sustainable development of different countries of the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Fishing in the world: Outcome Check

Show that you can identify the major marine fishing grounds.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Mining in the world: Lesson Opener

Learning focus: Mining in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Mining in the world.

By the end of this topic, you should be able to:

- the explain the impact of mining on the sustainable development of different countries in the world
- identify the distribution of minerals in the world
- list the methods used for mining in the world
- state the factors affecting the mineral exploitation
- outline the effects of mining to the economies of the world
- explain mining in relation to the selected countries

Inquiry questions:

- How can mining in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Mining in the world: Learn

Mining in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Mining in the world
- Mining
- world
- idea
- skill

Mining in the world: Worked Example

Evidence model for Mining in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

Mining in the world: Vocabulary And Study Skill

Use these words and study moves before you practise Mining in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Mining in the world
- Mining
- world
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Mining in the world without a clear example, method, or evidence.

Mining in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Mining in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

Mining in the world: Practice And Correction

Practice for Mining in the world:

1. Use an example from your community or country to explain: the explain the impact of mining on the sustainable development of different countries in the world.
2. Use an example from your community or country to explain: identify the distribution of minerals in the world.
3. Use an example from your community or country to explain: list the methods used for mining in the world.
4. Use an example from your community or country to explain: state the factors affecting the mineral exploitation.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to mining in the world and write two useful sentences about it.

Mining in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Mining in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

Mining in the world: Outcome Check

Show that you can explain the impact of mining on the sustainable development of different countries in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Mining in the world: Outcome Check

Show that you can identify the distribution of minerals in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

Statistical Graphs, Diagrams and Maps: Review Clinic 1

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from Statistical Graphs, Diagrams and Maps that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Bearings, directions, distances and areas on a map: Review Clinic 2

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from Bearings, directions, distances and areas on a map that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Map work interpretation: Review Clinic 3

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from Map work interpretation that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

The Universe and the Solar System: Review Clinic 4

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from The Universe and the Solar System that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Glossary

Use this glossary to revise important words in Geography.

- Statistical Graphs, Diagrams and Maps: Explain this term using an example from the book, your school, or your community.
- Bearings, directions, distances and areas on a map: Explain this term using an example from the book, your school, or your community.
- Map work interpretation: Explain this term using an example from the book, your school, or your community.
- The Universe and the Solar System: Explain this term using an example from the book, your school, or your community.
- The Origin of the Earth: Explain this term using an example from the book, your school, or your community.
- Internal landform Processes 6.1. Faulting: Explain this term using an example from the book, your school, or your community.
- Internal Landform Processes 6.2. Folding and Warping: Explain this term using an example from the book, your school, or your community.
- Internal Landform Processes 6.3. Vulcanicity and Earthquakes: Explain this term using an example from the book, your school, or your community.
- Soils: Explain this term using an example from the book, your school, or your community.
- Weather and Climate of the world: Explain this term using an example from the book, your school, or your community.
- Natural Vegetation of the world: Explain this term using an example from the book, your school, or your community.
- Population Growth in the world: Explain this term using an example from the book, your school, or your community.
- Urbanisation in the world: Explain this term using an example from the book, your school, or your community.
- Agriculture in the world: Explain this term using an example from the book, your school, or your community.
- Forestry in the world: Explain this term using an example from the book, your school, or your community.
- Fishing in the world: Explain this term using an example from the book, your school, or your community.
- Mining in the world: Explain this term using an example from the book, your school, or your community.

Add five more words from your lessons and write your own meanings.

Answer And Teacher Notes

A strong Geography answer responds to the exact task, uses correct vocabulary, gives a clear example or evidence, and shows correction after feedback. For practical work, name materials, safety, process, quality checks, peer feedback, and one improvement made after review.

Final Project

Create a final project for Geography that shows what you can now do independently.

Your project must include:

1. A clear title.
2. A real-life problem, question, text, performance, investigation, design, or worked task.
3. Evidence from at least three lessons in this book.
4. A drawing, table, map, chart, model, dialogue, paragraph, performance plan, practical product, or worked solution.
5. A correction note showing one improvement after feedback.
6. A short reflection explaining what you learned, what was difficult, and what you will practise next.

Presentation check: keep the work neat, label important parts, use correct vocabulary, and be ready to explain your choices to a classmate or teacher.
