KITABU QUEST S6 Geography

Rwanda REB-CBC learner book

Mascot: mountain gorilla

This KITABU QUEST book turns the curriculum into short lessons, worked examples, guided activities, practice, review, and home links for Rwanda learners.

## How To Use This Book

This book helps S6 learners study Geography one teachable topic at a time.

1. Start with the inquiry question and say what you already know.
2. Read the Learn section slowly and mark new words.
3. Try the worked example before reading the full solution.
4. Complete the activity and practice tasks.
5. Correct your answer using the success criteria.
6. Ask for support when your answer is still unclear.

Subject method: Use maps, field observations, diagrams, and local examples.

## Learning Skills In This Book

Each topic builds knowledge, skill, values, communication, collaboration, critical thinking, creativity, digital awareness, and self-confidence.

Study actively: speak answers aloud, draw when useful, show your working, cite evidence, use local examples, and correct mistakes after feedback.

A strong answer is specific. It names the idea, gives evidence or method, applies it to the task, and checks whether it answers the question.

## Table Of Contents

Use this table to move through the book one topic at a time. Each topic has a lesson opener, clear teaching, a model or example, guided work, practice, and checks for understanding.

1. Cross sections and Sketch maps
2. Interpretation of Photographs and video images
3. The origin and distribution of the continents
4. External landform processes and related features
5. Wave erosion and Deposition
6. Rocks and Minerals
7. Classification of Soils and Soil formation
8. Climate Change
9. Global Drainage Systems
10. Power and Energy Production in the world
11. Industrialisation in the world
12. Transport and Communication in the world
13. Trade and Commerce in the world

As you finish each topic, return to the success criteria and correct one answer before moving on.

## **Cross sections and Sketch maps: Lesson Opener**

Learning focus: Cross sections and Sketch maps

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Cross sections and Sketch maps.

By the end of this topic, you should be able to:

- the draw cross sections and sketch maps by reduction or enlargement
- identify the contours on a map
- define the concept of the gradient, vertical interval, exaggeration, amplitude and the inter-visibility
- identify the number of times to reduce or enlarge the map
- define the sketch of the reduced or enlarged map
- analyse the appearance of the contours on the topographic map

Inquiry questions:

- How can cross sections and sketch maps help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Cross sections and Sketch maps: Learn**

Cross sections and Sketch maps becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Cross sections and Sketch maps
- Cross
- sections
- Sketch
- maps
- idea
- skill
- example

## Cross sections and Sketch maps: Worked Example

Evidence model for Cross sections and Sketch maps: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## Cross sections and Sketch maps: Vocabulary And Study Skill

Use these words and study moves before you practise Cross sections and Sketch maps. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Cross sections and Sketch maps
- Cross
- sections
- Sketch
- maps
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Cross sections and Sketch maps without a clear example, method, or evidence.

## Cross sections and Sketch maps: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Cross sections and Sketch maps.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Cross sections and Sketch maps: Practice And Correction**

Practice for Cross sections and Sketch maps:

1. Use an example from your community or country to explain: the draw cross sections and sketch maps by reduction or enlargement.
2. Use an example from your community or country to explain: identify the contours on a map.
3. Use an example from your community or country to explain: define the concept of the gradient, vertical interval, exaggeration, amplitude and the inter-visibility.
4. Use an example from your community or country to explain: identify the number of times to reduce or enlarge the map.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to cross sections and sketch maps and write two useful sentences about it.

## **Cross sections and Sketch maps: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Cross sections and Sketch maps.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Cross sections and Sketch maps: Outcome Check

Show that you can draw cross sections and sketch maps by reduction or enlargement.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Cross sections and Sketch maps: Outcome Check

Show that you can identify the contours on a map.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Interpretation of Photographs and video images: Lesson Opener

Learning focus: Interpretation of Photographs and video images

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Interpretation of Photographs and video images.

By the end of this topic, you should be able to:

- interpret photographs, video images and draw sketches by reduction or enlargement of the photographs
- identify the different types of photographs
- identify the physical and human aspects on a photograph and the video images
- state the sections of a photograph
- explain and apply interpretation of photographs and video images in a real learning situation

Inquiry questions:

- How can interpretation of photographs and video images help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Interpretation of Photographs and video images: Learn**

Interpretation of Photographs and video images becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Interpretation of Photographs and video images
- Interpretation
- Photographs
- video
- images
- idea
- skill
- example

## **Interpretation of Photographs and video images: Worked Example**

Evidence model for Interpretation of Photographs and video images: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Interpretation of Photographs and video images: Vocabulary And Study Skill**

Use these words and study moves before you practise Interpretation of Photographs and video images. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Interpretation of Photographs and video images
- Interpretation
- Photographs
- video
- images
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Interpretation of Photographs and video images without a clear example, method, or evidence.

## **Interpretation of Photographs and video images: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Interpretation of Photographs and video images.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Interpretation of Photographs and video images: Practice And Correction**

Practice for Interpretation of Photographs and video images:

1. Use an example from your community or country to explain: the interpret photographs, video images and draw sketches by reduction or enlargement of the photographs.
2. Use an example from your community or country to explain: identify the different types of photographs.
3. Use an example from your community or country to explain: identify the physical and human aspects on a photograph and the video images.
4. Use an example from your community or country to explain: state the sections of a photograph.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to interpretation of photographs and video images and write two useful sentences about it.

## **Interpretation of Photographs and video images: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Interpretation of Photographs and video images.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Interpretation of Photographs and video images: Outcome Check**

Show that you can the interpret photographs, video images and draw sketches by reduction or enlargement of the photographs.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Interpretation of Photographs and video images: Outcome Check**

Show that you can identify the different types of photographs.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **The origin and distribution of the continents: Lesson Opener**

Learning focus: The origin and distribution of the continents

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for The origin and distribution of the continents.

By the end of this topic, you should be able to:

- the discuss the theories of the origin and the distribution of the continents
- name the theories of origin and distribution of the continents and ocean basins
- outline the evidences of the continental drift
- state the major types of plate boundaries and tectonic plates
- explain the effects of tectonics plate on the landscape
- describe the origin and distribution of the continents and ocean basins

Inquiry questions:

- How can the origin and distribution of the continents help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **The origin and distribution of the continents: Learn**

The origin and distribution of the continents becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- The origin and distribution of the continents
- origin
- distribution
- continents
- idea
- skill
- example
- practice

## **The origin and distribution of the continents: Worked Example**

Evidence model for The origin and distribution of the continents: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **The origin and distribution of the continents: Vocabulary And Study Skill**

Use these words and study moves before you practise The origin and distribution of the continents. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- The origin and distribution of the continents
- origin
- distribution
- continents
- idea

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about The origin and distribution of the continents without a clear example, method, or evidence.

## **The origin and distribution of the continents: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for The origin and distribution of the continents.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **The origin and distribution of the continents: Practice And Correction**

Practice for The origin and distribution of the continents:

1. Use an example from your community or country to explain: the discuss the theories of the origin and the distribution of the continents.
2. Use an example from your community or country to explain: name the theories of origin and distribution of the continents and ocean basins.
3. Use an example from your community or country to explain: outline the evidences of the continental drift.
4. Use an example from your community or country to explain: state the major types of plate boundaries and tectonic plates.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to the origin and distribution of the continents and write two useful sentences about it.

## **The origin and distribution of the continents: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from The origin and distribution of the continents.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **The origin and distribution of the continents: Outcome Check**

Show that you can discuss the theories of the origin and the distribution of the continents.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **The origin and distribution of the continents: Outcome Check**

Show that you can name the theories of origin and distribution of the continents and ocean basins.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **External landform processes and related features: Lesson Opener**

Learning focus: External landform processes and related features

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for External landform processes and related features.

By the end of this topic, you should be able to:

- the demonstrate an understanding of the different features resulting from the external processes and their relationships with the human activities
- explain the external processes of weathering
- state the major factors influencing the weathering
- identify the major features resulting from the weathering in the Karst regions
- outline the features resulting from the weathering
- recognise the different weathering processes

Inquiry questions:

- How can external landform processes and related features help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **External landform processes and related features: Learn**

External landform processes and related features becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- External landform processes and related features
- External
- landform
- processes
- related
- features
- idea
- skill

## **External landform processes and related features: Worked Example**

Evidence model for External landform processes and related features: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **External landform processes and related features: Vocabulary And Study Skill**

Use these words and study moves before you practise External landform processes and related features. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- External landform processes and related features
- External
- landform
- processes
- related
- features
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about External landform processes and related features without a clear example, method, or evidence.

## External landform processes and related features: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for External landform processes and related features.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## External landform processes and related features: Practice And Correction

Practice for External landform processes and related features:

1. Use an example from your community or country to explain: the demonstrate an understanding of the different features resulting from the external processes and their relationships with the human activities.
2. Use an example from your community or country to explain: explain the external processes of weathering.
3. Use an example from your community or country to explain: state the major factors influencing the weathering.
4. Use an example from your community or country to explain: identify the major features resulting from the weathering in the Karst regions.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to external landform processes and related features and write two useful sentences about it.

## External landform processes and related features: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from External landform processes and related features.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **External landform processes and related features: Outcome Check**

Show that you can demonstrate an understanding of the different features resulting from the external processes and their relationships with the human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **External landform processes and related features: Outcome Check**

Show that you can explain the external processes of weathering.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Wave erosion and Deposition: Lesson Opener**

Learning focus: Wave erosion and Deposition

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Wave erosion and Deposition.

By the end of this topic, you should be able to:

- the categorise different features resulting from the wave action and their relationships with the human activities
- identify the types of coasts
- explain the process of wave erosion and deposition
- identify the factors influencing the formation of the coastal landforms
- name the major features associated with the wave erosion and depositional processes
- recognise the different landforms resulting from the wave erosion and depositional processes

Inquiry questions:

- How can wave erosion and deposition help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Wave erosion and Deposition: Learn**

Wave erosion and Deposition becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Wave erosion and Deposition
- Wave
- erosion
- Deposition
- idea
- skill
- example
- practice

## **Wave erosion and Deposition: Worked Example**

Evidence model for Wave erosion and Deposition: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Wave erosion and Deposition: Vocabulary And Study Skill**

Use these words and study moves before you practise Wave erosion and Deposition. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Wave erosion and Deposition
- Wave
- erosion
- Deposition
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Wave erosion and Deposition without a clear example, method, or evidence.

## **Wave erosion and Deposition: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Wave erosion and Deposition.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Wave erosion and Deposition: Practice And Correction**

Practice for Wave erosion and Deposition:

1. Use an example from your community or country to explain: the categorise different features resulting from the wave action and their relationships with the human activities.
2. Use an example from your community or country to explain: identify the types of coasts.
3. Use an example from your community or country to explain: explain the process of wave erosion and deposition.
4. Use an example from your community or country to explain: identify the factors influencing the formation of the coastal landforms.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to wave erosion and deposition and write two useful sentences about it.

## **Wave erosion and Deposition: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Wave erosion and Deposition.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Wave erosion and Deposition: Outcome Check**

Show that you can categorise different features resulting from the wave action and their relationships with the human activities.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Wave erosion and Deposition: Outcome Check**

Show that you can identify the types of coasts.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

# **Rocks and Minerals: Lesson Opener**

Learning focus: Rocks and Minerals

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Rocks and Minerals.

By the end of this topic, you should be able to:

- the assess the economic importance of the rocks and the minerals
- identify the various types of rocks in the world and their characteristics
- identify different components of the rocks
- state the economic importance of the rocks
- identify the various types of minerals in the world
- identify the physical and the chemical properties of the minerals

Inquiry questions:

- How can rocks and minerals help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Rocks and Minerals: Learn**

Rocks and Minerals becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Rocks and Minerals
- Rocks
- Minerals
- idea
- skill
- example
- practice
- correction

## **Rocks and Minerals: Worked Example**

Evidence model for Rocks and Minerals: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Rocks and Minerals: Vocabulary And Study Skill**

Use these words and study moves before you practise Rocks and Minerals. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Rocks and Minerals
- Rocks
- Minerals
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Rocks and Minerals without a clear example, method, or evidence.

## **Rocks and Minerals: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Rocks and Minerals.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Rocks and Minerals: Practice And Correction**

Practice for Rocks and Minerals:

1. Use an example from your community or country to explain: the assess the economic importance of the rocks and the minerals.
2. Use an example from your community or country to explain: identify the various types of rocks in the world and their characteristics.
3. Use an example from your community or country to explain: identify different components of the rocks.
4. Use an example from your community or country to explain: state the economic importance of the rocks.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to rocks and minerals and write two useful sentences about it.

## **Rocks and Minerals: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Rocks and Minerals.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Rocks and Minerals: Outcome Check**

Show that you can assess the economic importance of the rocks and the minerals.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Rocks and Minerals: Outcome Check**

Show that you can identify the various types of rocks in the world and their characteristics.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Classification of Soils and Soil formation: Lesson Opener**

Learning focus: Classification of Soils and Soil formation

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Classification of Soils and Soil formation.

By the end of this topic, you should be able to:

- explain the factors and the processes responsible for the formation of the soil
- differentiate between the zonal, azonal and inter- zonal soils
- identify the major types of soils in the world
- identify the processes of the soil formation
- list the factors responsible for the soil formation
- outline the causes and the effects of the soil erosion

Inquiry questions:

- How can classification of soils and soil formation help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Classification of Soils and Soil formation: Learn**

Classification of Soils and Soil formation becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Classification of Soils and Soil formation
- Classification
- Soils
- Soil
- formation
- idea
- skill
- example

## **Classification of Soils and Soil formation: Worked Example**

Evidence model for Classification of Soils and Soil formation: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Classification of Soils and Soil formation: Vocabulary And Study Skill**

Use these words and study moves before you practise Classification of Soils and Soil formation. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Classification of Soils and Soil formation
- Classification
- Soils
- Soil
- formation
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Classification of Soils and Soil formation without a clear example, method, or evidence.

## **Classification of Soils and Soil formation: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Classification of Soils and Soil formation.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Classification of Soils and Soil formation: Practice And Correction**

Practice for Classification of Soils and Soil formation:

1. Use an example from your community or country to explain: the explain the factors and the processes responsible for the formation of the soil.
2. Use an example from your community or country to explain: differentiate between the zonal, azonal and inter- zonal soils.
3. Use an example from your community or country to explain: identify the major types of soils in the world.
4. Use an example from your community or country to explain: identify the processes of the soil formation.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to classification of soils and soil formation and write two useful sentences about it.

## **Classification of Soils and Soil formation: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Classification of Soils and Soil formation.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Classification of Soils and Soil formation: Outcome Check**

Show that you can explain the factors and the processes responsible for the formation of the soil.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Classification of Soils and Soil formation: Outcome Check

Show that you can differentiate between the zonal, azonal and inter- zonal soils.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Climate Change: Lesson Opener

Learning focus: Climate Change

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Climate Change.

By the end of this topic, you should be able to:

- the discuss the climate change and its impact on Rwanda and the other countries
- define the concept of climate change
- state the causes of climate change
- identify the effects of climate change
- locate the areas most affected by the climate change in the world
- identify the causes and the effects of global warming and green house

Inquiry questions:

- How can climate change help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Climate Change: Learn

Climate Change becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Climate Change
- Climate
- Change
- idea
- skill
- example
- practice
- correction

## **Climate Change: Worked Example**

Evidence model for Climate Change: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Climate Change: Vocabulary And Study Skill**

Use these words and study moves before you practise Climate Change. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Climate Change
- Climate
- Change
- idea
- skill
- example
- practice
- correction

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Climate Change without a clear example, method, or evidence.

## **Climate Change: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Climate Change.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Climate Change: Practice And Correction**

Practice for Climate Change:

1. Use an example from your community or country to explain: the discuss the climate change and its impact on Rwanda and the other countries.
2. Use an example from your community or country to explain: define the concept of climate change.
3. Use an example from your community or country to explain: state the causes of climate change.
4. Use an example from your community or country to explain: identify the effects of climate change.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to climate change and write two useful sentences about it.

## **Climate Change: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Climate Change.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Climate Change: Outcome Check**

Show that you can discuss the climate change and its impact on Rwanda and the other countries.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Climate Change: Outcome Check**

Show that you can define the concept of climate change.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

# Global Drainage Systems: Lesson Opener

Learning focus: Global Drainage Systems

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Global Drainage Systems.

By the end of this topic, you should be able to:

- the investigate the economic importance of the global drainage systems and the reasons for their conservation
- identify the different drainage patterns of the world
- outline the characteristics of a river profile
- identify the landforms resulting from the work of a river
- explain river capture and river rejuvenation
- state different drainage patterns

Inquiry questions:

- How can global drainage systems help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Global Drainage Systems: Learn

Global Drainage Systems becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Global Drainage Systems
- Global
- Drainage
- Systems
- idea
- skill
- example
- practice

## Global Drainage Systems: Worked Example

Evidence model for Global Drainage Systems: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Global Drainage Systems: Vocabulary And Study Skill**

Use these words and study moves before you practise Global Drainage Systems. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Global Drainage Systems
- Global
- Drainage
- Systems
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Global Drainage Systems without a clear example, method, or evidence.

## **Global Drainage Systems: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Global Drainage Systems.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## Global Drainage Systems: Practice And Correction

Practice for Global Drainage Systems:

1. Use an example from your community or country to explain: the investigate the economic importance of the global drainage systems and the reasons for their conservation.
2. Use an example from your community or country to explain: identify the different drainage patterns of the world.
3. Use an example from your community or country to explain: outline the characteristics of a river profile.
4. Use an example from your community or country to explain: identify the landforms resulting from the work of a river.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to global drainage systems and write two useful sentences about it.

## Global Drainage Systems: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Global Drainage Systems.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Global Drainage Systems: Outcome Check

Show that you can investigate the economic importance of the global drainage systems and the reasons for their conservation.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Global Drainage Systems: Outcome Check**

Show that you can identify the different drainage patterns of the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and Energy Production in the world: Lesson Opener**

Learning focus: Power and Energy Production in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Power and Energy Production in the world.

By the end of this topic, you should be able to:

- the evaluate the success of the sustainable development projects in the power and energy production in different parts of the world
- identify the major world's sources of energy
- explain the factors affecting the power production
- explain the importance of the power and energy in the world
- state the problems hindering the development of the power and energy and suggest the solutions
- carry out a research to find out the alternative environmental friendly power and energy sources

Inquiry questions:

- How can power and energy production in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and Energy Production in the world: Learn**

Power and Energy Production in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Power and Energy Production in the world
- Power
- Energy
- Production
- world
- idea
- skill
- example

## **Power and Energy Production in the world: Worked Example**

Evidence model for Power and Energy Production in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

# Power and Energy Production in the world: Vocabulary And Study Skill

Use these words and study moves before you practise Power and Energy Production in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Power and Energy Production in the world
- Power
- Energy
- Production
- world
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Power and Energy Production in the world without a clear example, method, or evidence.

## Power and Energy Production in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Power and Energy Production in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## Power and Energy Production in the world: Practice And Correction

Practice for Power and Energy Production in the world:

1. Use an example from your community or country to explain: the evaluate the success of the sustainable development projects in the power and energy production in different parts of the world.
2. Use an example from your community or country to explain: identify the major world's sources of energy.
3. Use an example from your community or country to explain: explain the factors affecting the power production.
4. Use an example from your community or country to explain: explain the importance of the power and energy in the world.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to power and energy production in the world and write two useful sentences about it.

## **Power and Energy Production in the world: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Power and Energy Production in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and Energy Production in the world: Outcome Check**

Show that you can the evaluate the success of the sustainable development projects in the power and energy production in different parts of the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Power and Energy Production in the world: Outcome Check**

Show that you can identify the major world's sources of energy.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Industrialisation in the world: Lesson Opener**

Learning focus: Industrialisation in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Industrialisation in the world.

By the end of this topic, you should be able to:

- the evaluate the success of the sustainable development projects in the industry in different parts the world
- identify different types of industries
- state the factors influencing the location and localisation of the industries
- name the major industrial regions of the world
- give the importance of the industrial development in the world
- identify the problems affecting the industries and the effects of industrial development

Inquiry questions:

- How can industrialisation in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Industrialisation in the world: Learn**

Industrialisation in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Industrialisation in the world
- Industrialisation
- world
- idea
- skill
- example
- practice
- correction

## **Industrialisation in the world: Worked Example**

Evidence model for Industrialisation in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Industrialisation in the world: Vocabulary And Study Skill**

Use these words and study moves before you practise Industrialisation in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Industrialisation in the world
- Industrialisation
- world
- idea
- skill

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Industrialisation in the world without a clear example, method, or evidence.

## **Industrialisation in the world: Guided Activity**

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Industrialisation in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Industrialisation in the world: Practice And Correction**

Practice for Industrialisation in the world:

1. Use an example from your community or country to explain: the evaluate the success of the sustainable development projects in the industry in different parts the world.
2. Use an example from your community or country to explain: identify different types of industries.
3. Use an example from your community or country to explain: state the factors influencing the location and localisation of the industries.
4. Use an example from your community or country to explain: name the major industrial regions of the world.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to industrialisation in the world and write two useful sentences about it.

# Industrialisation in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Industrialisation in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Industrialisation in the world: Outcome Check

Show that you can evaluate the success of the sustainable development projects in the industry in different parts of the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Industrialisation in the world: Outcome Check

Show that you can identify different types of industries.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Transport and Communication in the world: Lesson Opener**

Learning focus: Transport and Communication in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Transport and Communication in the world.

By the end of this topic, you should be able to:

- the analyse the impact of the transport and communication projects on the sustainable development of the different countries in the world
- give the meaning of transport and communication
- identify the major types of transport
- identify the factors influencing the development of the different types of transport
- outline the advantages and disadvantages of the different types of transport
- give the importance of transport

Inquiry questions:

- How can transport and communication in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Transport and Communication in the world: Learn**

Transport and Communication in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Transport and Communication in the world
- Transport
- Communication
- world
- idea
- skill
- example
- practice

## **Transport and Communication in the world: Worked Example**

Evidence model for Transport and Communication in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## **Transport and Communication in the world: Vocabulary And Study Skill**

Use these words and study moves before you practise Transport and Communication in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Transport and Communication in the world
- Transport
- Communication
- world
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Transport and Communication in the world without a clear example, method, or evidence.

## Transport and Communication in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Transport and Communication in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## Transport and Communication in the world: Practice And Correction

Practice for Transport and Communication in the world:

1. Use an example from your community or country to explain: the analyse the impact of the transport and communication projects on the sustainable development of the different countries in the world.
2. Use an example from your community or country to explain: give the meaning of transport and communication.
3. Use an example from your community or country to explain: identify the major types of transport.
4. Use an example from your community or country to explain: identify the factors influencing the development of the different types of transport.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to transport and communication in the world and write two useful sentences about it.

## Transport and Communication in the world: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Transport and Communication in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **Transport and Communication in the world: Outcome Check**

Show that you can analyse the impact of the transport and communication projects on the sustainable development of the different countries in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Transport and Communication in the world: Outcome Check**

Show that you can give the meaning of transport and communication.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Trade and Commerce in the world: Lesson Opener**

Learning focus: Trade and Commerce in the world

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for Trade and Commerce in the world.

By the end of this topic, you should be able to:

- the evaluate the impact of trade and commerce on the sustainable development of different countries in the world
- define trade and commerce
- identify the different types of trade and commerce
- outline the factors influencing the international trade
- give the importance of the international trade
- state the major financial centres of the world

Inquiry questions:

- How can trade and commerce in the world help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Trade and Commerce in the world: Learn**

Trade and Commerce in the world becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- Trade and Commerce in the world
- Trade
- Commerce
- world
- idea
- skill
- example
- practice

## Trade and Commerce in the world: Worked Example

Evidence model for Trade and Commerce in the world: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## Trade and Commerce in the world: Vocabulary And Study Skill

Use these words and study moves before you practise Trade and Commerce in the world. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Trade and Commerce in the world
- Trade
- Commerce
- world
- idea
- skill
- example
- practice

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Trade and Commerce in the world without a clear example, method, or evidence.

## Trade and Commerce in the world: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for Trade and Commerce in the world.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## **Trade and Commerce in the world: Practice And Correction**

Practice for Trade and Commerce in the world:

1. Use an example from your community or country to explain: the evaluate the impact of trade and commerce on the sustainable development of different countries in the world.
2. Use an example from your community or country to explain: define trade and commerce.
3. Use an example from your community or country to explain: identify the different types of trade and commerce.
4. Use an example from your community or country to explain: outline the factors influencing the international trade.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to trade and commerce in the world and write two useful sentences about it.

## **Trade and Commerce in the world: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Trade and Commerce in the world.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## Trade and Commerce in the world: Outcome Check

Show that you can evaluate the impact of trade and commerce on the sustainable development of different countries in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## Trade and Commerce in the world: Outcome Check

Show that you can define trade and commerce.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## World Multipurpose River Projects: Lesson Opener

Learning focus: World Multipurpose River Projects

Country link: a Rwanda map, community, citizenship, culture, environment, or heritage example for World Multipurpose River Projects.

By the end of this topic, you should be able to:

- the evaluate the impact of the multipurpose river projects on the sustainable development of the different countries in the world
- give the meaning of the multipurpose river projects
- explain the aims and the importance of multipurpose river projects
- identify the problems affecting the multipurpose river projects
- identify the major multipurpose river projects of the world
- explain the meaning of the multipurpose river projects

Inquiry questions:

- How can world multipurpose river projects help you solve a real problem in Geography?

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **World Multipurpose River Projects: Learn**

World Multipurpose River Projects becomes easier when you connect the idea to a real situation, name the important vocabulary, and practise one step at a time.

Learning routine:

1. Look at a real situation in Rwanda.
2. Name the exact idea or skill.
3. Explain it in simple words.
4. Work through one model example.
5. Try a similar task independently.
6. Correct your answer using the success criteria.

Key words:

- World Multipurpose River Projects
- World
- Multipurpose
- River
- Projects
- idea
- skill
- example

## **World Multipurpose River Projects: Worked Example**

Evidence model for World Multipurpose River Projects: Teach a real example clearly.

1. Name the place, group, object, source, skill, or issue.
2. Give two facts or observations from the lesson.
3. Explain why the example matters in Rwanda.
4. Add one responsible action, improvement, or reflection.
5. Check that your response uses the exact vocabulary from Geography.

## World Multipurpose River Projects: Vocabulary And Study Skill

Use these words and study moves before you practise World Multipurpose River Projects. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- World Multipurpose River Projects
- World
- Multipurpose
- River
- Projects
- idea
- skill
- example

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Rwanda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about World Multipurpose River Projects without a clear example, method, or evidence.

## World Multipurpose River Projects: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a Rwanda map, community, citizenship, culture, environment, or heritage example for World Multipurpose River Projects.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

## World Multipurpose River Projects: Practice And Correction

Practice for World Multipurpose River Projects:

1. Use an example from your community or country to explain: the evaluate the impact of the multipurpose river projects on the sustainable development of the different countries in the world.
2. Use an example from your community or country to explain: give the meaning of the multipurpose river projects.
3. Use an example from your community or country to explain: explain the aims and the importance of multipurpose river projects.
4. Use an example from your community or country to explain: identify the problems affecting the multipurpose river projects.

Correction check:

- answer uses a real example
- reasoning is clear
- work is checked

Reflection: What was clear? What needs more practice? What question will you ask your teacher or study partner?

Home link: Ask someone at home for one safe example related to world multipurpose river projects and write two useful sentences about it.

## **World Multipurpose River Projects: Challenge And Remediation**

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from World Multipurpose River Projects.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- answer uses a real example
- reasoning is clear
- work is checked

## **World Multipurpose River Projects: Outcome Check**

Show that you can the evaluate the impact of the multipurpose river projects on the sustainable development of the different countries in the world.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **World Multipurpose River Projects: Outcome Check**

Show that you can give the meaning of the multipurpose river projects.

Before answering, reread the topic title and choose the exact vocabulary, method, evidence, tool, diagram, or example that fits this outcome.

1. State the main idea in one clear sentence.
2. Give one example, method, source, observation, or piece of evidence from this topic.
3. Complete a short task that applies the idea.
4. Check your answer against the success criteria.
5. Write one correction or next step.

Success criteria:

- answer uses a real example
- reasoning is clear
- work is checked

## **Cross sections and Sketch maps: Review Clinic 1**

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from Cross sections and Sketch maps that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## **Interpretation of Photographs and video images: Review Clinic 2**

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from Interpretation of Photographs and video images that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## **The origin and distribution of the continents: Review Clinic 3**

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from The origin and distribution of the continents that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## **External landform processes and related features: Review Clinic 4**

Use this review clinic to strengthen Geography without copying earlier answers.

1. Choose one idea from External landform processes and related features that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Rwanda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

## **Glossary**

Use this glossary to revise important words in Geography.

- Cross sections and Sketch maps: Explain this term using an example from the book, your school, or your community.
- Interpretation of Photographs and video images: Explain this term using an example from the book, your school, or your community.
- The origin and distribution of the continents: Explain this term using an example from the book, your school, or your community.
- External landform processes and related features: Explain this term using an example from the book, your school, or your community.
- Wave erosion and Deposition: Explain this term using an example from the book, your school, or your community.
- Rocks and Minerals: Explain this term using an example from the book, your school, or your community.
- Classification of Soils and Soil formation: Explain this term using an example from the book, your school, or your community.
- Climate Change: Explain this term using an example from the book, your school, or your community.
- Global Drainage Systems: Explain this term using an example from the book, your school, or your community.
- Power and Energy Production in the world: Explain this term using an example from the book, your school, or your community.
- Industrialisation in the world: Explain this term using an example from the book, your school, or your community.
- Transport and Communication in the world: Explain this term using an example from the book, your school, or your community.
- Trade and Commerce in the world: Explain this term using an example from the book, your school, or your community.
- World Multipurpose River Projects: Explain this term using an example from the book, your school, or your community.

Add five more words from your lessons and write your own meanings.

## **Answer And Teacher Notes**

A strong Geography answer responds to the exact task, uses correct vocabulary, gives a clear example or evidence, and shows correction after feedback. For practical work, name materials, safety, process, quality checks, peer feedback, and one improvement made after review.

## **Final Project**

Create a final project for Geography that shows what you can now do independently.

Your project must include:

1. A clear title.
2. A real-life problem, question, text, performance, investigation, design, or worked task.
3. Evidence from at least three lessons in this book.
4. A drawing, table, map, chart, model, dialogue, paragraph, performance plan, practical product, or worked solution.
5. A correction note showing one improvement after feedback.
6. A short reflection explaining what you learned, what was difficult, and what you will practise next.

Presentation check: keep the work neat, label important parts, use correct vocabulary, and be ready to explain your choices to a classmate or teacher.
