Title Page

KITABU QUEST P4 Mathematics

Uganda NCDC learner book

Mascot: grey crowned crane

This KITABU QUEST book turns the curriculum into short lessons, worked examples, guided activities, practice, review, and home links for Uganda learners.

How To Use This Book

This book helps P4 learners study Mathematics one teachable topic at a time.

1. Start with the inquiry question and say what you already know.
2. Read the Learn section slowly and mark new words.
3. Try the worked example before reading the full solution.
4. Complete the activity and practice tasks.
5. Correct your answer using the success criteria.
6. Ask for support when your answer is still unclear.

Subject method: Use objects, drawings, number sentences, and worked examples before independent practice.

Learning Skills In This Book

Each topic builds knowledge, skill, values, communication, collaboration, critical thinking, creativity, digital awareness, and self-confidence.

Study actively: speak answers aloud, draw when useful, show your working, cite evidence, use local examples, and correct mistakes after feedback.

A strong answer is specific. It names the idea, gives evidence or method, applies it to the task, and checks whether it answers the question.

Table Of Contents

Use this table to move through the book one topic at a time. Each topic has a lesson opener, clear teaching, a model or example, guided work, practice, and checks for understanding.

1. THE REPUBLIC OF UGANDA
2. National Curriculum Development Centre,
3. NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA
4. Mathematics Topic
5. Mathematics Topic
6. The Curriculum for Primary Four
7. The Curriculum for Primary Four

As you finish each topic, return to the success criteria and correct one answer before moving on.

THE REPUBLIC OF UGANDA: Lesson Opener

Learning focus: THE REPUBLIC OF UGANDA

Country link: a Uganda school, market, farming, building, transport, or data problem for THE REPUBLIC OF UGANDA.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about the republic of uganda

Inquiry questions:

- How can the republic of uganda help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

THE REPUBLIC OF UGANDA: Learn

THE REPUBLIC OF UGANDA teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- THE REPUBLIC OF UGANDA
- REPUBLIC
- UGANDA
- method
- model
- unit
- answer
- check

THE REPUBLIC OF UGANDA: Worked Example

Worked example for THE REPUBLIC OF UGANDA: Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

THE REPUBLIC OF UGANDA: Vocabulary And Study Skill

Use these words and study moves before you practise THE REPUBLIC OF UGANDA. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- THE REPUBLIC OF UGANDA
- REPUBLIC
- UGANDA
- method
- model
- unit
- answer
- check

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about THE REPUBLIC OF UGANDA without a clear example, method, or evidence.

THE REPUBLIC OF UGANDA: Guided Activity

Guided activity for THE REPUBLIC OF UGANDA:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

THE REPUBLIC OF UGANDA: Practice And Correction

Practice for THE REPUBLIC OF UGANDA:

Main outcome: solve and explain problems about the republic of uganda.

1. Solve one the republic of uganda question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to the republic of uganda and solve it.

THE REPUBLIC OF UGANDA: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from THE REPUBLIC OF UGANDA.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

THE REPUBLIC OF UGANDA: Outcome Check

Outcome check for THE REPUBLIC OF UGANDA: Solve and explain problems about the republic of uganda.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

National Curriculum Development Centre,: Lesson Opener

Learning focus: National Curriculum Development Centre,

Country link: a Uganda school, market, farming, building, transport, or data problem for National Curriculum Development Centre,.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about national curriculum development centre,

Inquiry questions:

- How can national curriculum development centre, help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

National Curriculum Development Centre,: Learn

National Curriculum Development Centre, teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- National Curriculum Development Centre,
- National
- Curriculum
- Development
- Centre
- method
- model
- unit

National Curriculum Development Centre,: Worked Example

Worked example for National Curriculum Development Centre,: Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

National Curriculum Development Centre,: Vocabulary And Study Skill

Use these words and study moves before you practise National Curriculum Development Centre,. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- National Curriculum Development Centre,
- National
- Curriculum
- Development
- Centre
- method
- model
- unit

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about National Curriculum Development Centre, without a clear example, method, or evidence.

National Curriculum Development Centre,: Guided Activity

Guided activity for National Curriculum Development Centre,:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

National Curriculum Development Centre,: Practice And Correction

Practice for National Curriculum Development Centre,:

Main outcome: solve and explain problems about national curriculum development centre,.

1. Solve one national curriculum development centre, question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to national curriculum development centre, and solve it.

National Curriculum Development Centre,: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from National Curriculum Development Centre,.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

National Curriculum Development Centre,: Outcome Check

Outcome check for National Curriculum Development Centre,: Solve and explain problems about national curriculum development centre,.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Lesson Opener

Learning focus: NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA

Country link: a Uganda school, market, farming, building, transport, or data problem for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about national curriculum development centre (ncdc) uganda

Inquiry questions:

- How can national curriculum development centre (ncdc) uganda help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Learn

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA
- NATIONAL
- CURRICULUM
- DEVELOPMENT
- CENTRE
- NCDC
- UGANDA
- method

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Worked Example

Worked example for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA:
Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Vocabulary And Study Skill

Use these words and study moves before you practise NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA
- NATIONAL
- CURRICULUM
- DEVELOPMENT
- CENTRE
- NCDC
- UGANDA
- method

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA without a clear example, method, or evidence.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Guided Activity

Guided activity for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Practice And Correction

Practice for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA:

Main outcome: solve and explain problems about national curriculum development centre (ncdc) uganda.

1. Solve one national curriculum development centre (ncdc) uganda question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to national curriculum development centre (ncdc) uganda and solve it.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Outcome Check

Outcome check for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Solve and explain problems about national curriculum development centre (ncdc) uganda.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

Mathematics Topic: Lesson Opener

Learning focus: Mathematics Topic

Country link: a Uganda school, market, farming, building, transport, or data problem for Mathematics Topic.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about mathematics topic

Inquiry questions:

- How can mathematics topic help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

Mathematics Topic: Learn

Mathematics Topic teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- Mathematics Topic
- Mathematics
- Topic
- method
- model
- unit
- answer
- check

Mathematics Topic: Worked Example

Worked example for Mathematics Topic: Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

Mathematics Topic: Vocabulary And Study Skill

Use these words and study moves before you practise Mathematics Topic. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Mathematics Topic
- Mathematics
- Topic
- method
- model
- unit
- answer
- check

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Mathematics Topic without a clear example, method, or evidence.

Mathematics Topic: Guided Activity

Guided activity for Mathematics Topic:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

Mathematics Topic: Practice And Correction

Practice for Mathematics Topic:

Main outcome: solve and explain problems about mathematics topic.

1. Solve one mathematics topic question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to mathematics topic and solve it.

Mathematics Topic: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Mathematics Topic.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

Mathematics Topic: Outcome Check

Outcome check for Mathematics Topic: Solve and explain problems about mathematics topic.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

Mathematics Topic: Lesson Opener

Learning focus: Mathematics Topic

Country link: a Uganda school, market, farming, building, transport, or data problem for Mathematics Topic.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about mathematics topic

Inquiry questions:

- How can mathematics topic help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

Mathematics Topic: Learn

Mathematics Topic teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- Mathematics Topic
- Mathematics
- Topic
- method
- model
- unit
- answer
- check

Mathematics Topic: Worked Example

Worked example for Mathematics Topic: Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

Mathematics Topic: Vocabulary And Study Skill

Use these words and study moves before you practise Mathematics Topic. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- Mathematics Topic
- Mathematics
- Topic
- method
- model
- unit
- answer
- check

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about Mathematics Topic without a clear example, method, or evidence.

Mathematics Topic: Guided Activity

Guided activity for Mathematics Topic:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

Mathematics Topic: Practice And Correction

Practice for Mathematics Topic:

Main outcome: solve and explain problems about mathematics topic.

1. Solve one mathematics topic question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to mathematics topic and solve it.

Mathematics Topic: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from Mathematics Topic.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

Mathematics Topic: Outcome Check

Outcome check for Mathematics Topic: Solve and explain problems about mathematics topic.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

The Curriculum for Primary Four: Lesson Opener

Learning focus: The Curriculum for Primary Four

Country link: a Uganda school, market, farming, building, transport, or data problem for The Curriculum for Primary Four.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about the curriculum for primary four

Inquiry questions:

- How can the curriculum for primary four help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

The Curriculum for Primary Four: Learn

The Curriculum for Primary Four teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- The Curriculum for Primary Four
- Curriculum
- Primary
- Four
- method
- model
- unit
- answer

The Curriculum for Primary Four: Worked Example

Worked example for The Curriculum for Primary Four: Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

The Curriculum for Primary Four: Vocabulary And Study Skill

Use these words and study moves before you practise The Curriculum for Primary Four. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- The Curriculum for Primary Four
- Curriculum
- Primary
- Four
- method
- model
- unit
- answer

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about The Curriculum for Primary Four without a clear example, method, or evidence.

The Curriculum for Primary Four: Guided Activity

Guided activity for The Curriculum for Primary Four:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

The Curriculum for Primary Four: Practice And Correction

Practice for The Curriculum for Primary Four:

Main outcome: solve and explain problems about the curriculum for primary four.

1. Solve one the curriculum for primary four question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to the curriculum for primary four and solve it.

The Curriculum for Primary Four: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from The Curriculum for Primary Four.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

The Curriculum for Primary Four: Outcome Check

Outcome check for The Curriculum for Primary Four: Solve and explain problems about the curriculum for primary four.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

The Curriculum for Primary Four: Lesson Opener

Learning focus: The Curriculum for Primary Four

Country link: a Uganda school, market, farming, building, transport, or data problem for The Curriculum for Primary Four.

Progression focus: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

By the end of this topic, you should be able to:

- solve and explain problems about the curriculum for primary four

Inquiry questions:

- How can the curriculum for primary four help you solve a real problem?

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

The Curriculum for Primary Four: Learn

The Curriculum for Primary Four teaches a mathematical idea by using a clear model, a labelled representation, step-by-step working, and a final check.

Key words:

- The Curriculum for Primary Four
- Curriculum
- Primary
- Four
- method
- model
- unit
- answer

The Curriculum for Primary Four: Worked Example

Worked example for The Curriculum for Primary Four: Read the task, choose a representation, solve one step at a time, and check the answer in context.

Model:

1. Name what is known.
2. Choose a diagram, table, equation, or model.
3. Complete the calculation or reasoning.
4. Check the result with estimation or inverse reasoning.

Use a Uganda classroom, market, garden, transport, or home example.

The Curriculum for Primary Four: Vocabulary And Study Skill

Use these words and study moves before you practise The Curriculum for Primary Four. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- The Curriculum for Primary Four
- Curriculum
- Primary
- Four
- method
- model
- unit
- answer

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about The Curriculum for Primary Four without a clear example, method, or evidence.

The Curriculum for Primary Four: Guided Activity

Guided activity for The Curriculum for Primary Four:

1. Work with a partner and read the worked example.
2. Make a similar question using Uganda classroom, home, market, garden, transport, or timetable details.
3. Draw a model: table, number line, diagram, place-value chart, shape, or equation.
4. Solve the question step by step.
5. Swap work with another pair and check the method, units, labels, and final sentence.

Teacher check: the model should match the topic, not just any calculation.

The Curriculum for Primary Four: Practice And Correction

Practice for The Curriculum for Primary Four:

Main outcome: solve and explain problems about the curriculum for primary four.

1. Solve one the curriculum for primary four question using labelled steps.
2. Show your method with a drawing, table, number sentence, or diagram.
3. Check your answer and write one sentence explaining it.

Answer check:

Your answer should show a clear model, correct method, correct labels, and a final sentence.

Correction check:

- Did you show the method?
- Did you use the correct unit or label?
- Did you check whether the answer is reasonable?

Home link: Find one Uganda home, school, shop, garden, road, game, or timetable example connected to the curriculum for primary four and solve it.

The Curriculum for Primary Four: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from The Curriculum for Primary Four.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- method is clear
- working is shown step by step
- answer is checked in context

The Curriculum for Primary Four: Outcome Check

Outcome check for The Curriculum for Primary Four: Solve and explain problems about the curriculum for primary four.

1. Write one clear example from the topic.
2. Solve it with labelled steps.
3. Check the answer in context.

Success criteria:

- method is clear
- working is shown step by step
- answer is checked in context

THE REPUBLIC OF UGANDA: Review Clinic 1

Use this review clinic to strengthen Mathematics without copying earlier answers.

1. Choose one idea from THE REPUBLIC OF UGANDA that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

National Curriculum Development Centre,: Review Clinic 2

Use this review clinic to strengthen Mathematics without copying earlier answers.

1. Choose one idea from National Curriculum Development Centre, that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Review Clinic 3

Use this review clinic to strengthen Mathematics without copying earlier answers.

1. Choose one idea from NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

Mathematics Topic: Review Clinic 4

Use this review clinic to strengthen Mathematics without copying earlier answers.

1. Choose one idea from Mathematics Topic that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

THE REPUBLIC OF UGANDA: Application Workshop 1

Application workshop 1 for THE REPUBLIC OF UGANDA.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

National Curriculum Development Centre,: Application Workshop 2

Application workshop 2 for National Curriculum Development Centre,.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Application Workshop 3

Application workshop 3 for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

Mathematics Topic: Application Workshop 4

Application workshop 4 for Mathematics Topic.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

Mathematics Topic: Application Workshop 5

Application workshop 5 for Mathematics Topic.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

The Curriculum for Primary Four: Application Workshop 6

Application workshop 6 for The Curriculum for Primary Four.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

The Curriculum for Primary Four: Application Workshop 7

Application workshop 7 for The Curriculum for Primary Four.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

THE REPUBLIC OF UGANDA: Application Workshop 8

Application workshop 8 for THE REPUBLIC OF UGANDA.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

National Curriculum Development Centre,: Application Workshop 9

Application workshop 9 for National Curriculum Development Centre,.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Application Workshop 10

Application workshop 10 for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

Mathematics Topic: Application Workshop 11

Application workshop 11 for Mathematics Topic.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

Mathematics Topic: Application Workshop 12

Application workshop 12 for Mathematics Topic.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

The Curriculum for Primary Four: Application Workshop 13

Application workshop 13 for The Curriculum for Primary Four.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

The Curriculum for Primary Four: Application Workshop 14

Application workshop 14 for The Curriculum for Primary Four.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

THE REPUBLIC OF UGANDA: Application Workshop 15

Application workshop 15 for THE REPUBLIC OF UGANDA.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

National Curriculum Development Centre,: Application Workshop 16

Application workshop 16 for National Curriculum Development Centre,.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC)

UGANDA: Application Workshop 17

Application workshop 17 for NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

Mathematics Topic: Application Workshop 18

Application workshop 18 for Mathematics Topic.

Grade move: build concrete foundations using simple examples and teacher-guided correction; show methods, units, checks, and a final explanation.

Use this page to turn the skill into a complete problem, not a single short answer.

1. Create one problem from Uganda school, home, shop, garden, transport, sport, or timetable life.
2. Write the known information and what must be found.
3. Choose a model: table, number line, diagram, equation, graph, shape, or place-value chart.
4. Solve step by step and keep units or labels clear.
5. Check the answer using estimation, inverse operation, substitution, or a second method.
6. Write one sentence explaining why the answer makes sense.

Extension: change one number in the problem and solve the new version.

Glossary

Use this glossary to revise important words in Mathematics.

- THE REPUBLIC OF UGANDA: Explain this term using an example from the book, your school, or your community.
- National Curriculum Development Centre,: Explain this term using an example from the book, your school, or your community.
- NATIONAL CURRICULUM DEVELOPMENT CENTRE (NCDC) UGANDA: Explain this term using an example from the book, your school, or your community.
- Mathematics Topic: Explain this term using an example from the book, your school, or your community.
- Mathematics Topic: Explain this term using an example from the book, your school, or your community.
- The Curriculum for Primary Four: Explain this term using an example from the book, your school, or your community.
- The Curriculum for Primary Four: Explain this term using an example from the book, your school, or your community.

Add five more words from your lessons and write your own meanings.

Answer And Teacher Notes

A strong Mathematics answer shows the model, method, units or labels, final answer, and a check. Use the worked examples and answer checks in each practice page to correct your work. When an answer is wrong, find the first step that changed the meaning and correct that step before trying a new question.

Final Project

Create a final project for Mathematics that shows what you can now do independently.

Your project must include:

1. A clear title.
2. A real-life problem, question, text, performance, investigation, design, or worked task.
3. Evidence from at least three lessons in this book.
4. A drawing, table, map, chart, model, dialogue, paragraph, performance plan, practical product, or worked solution.
5. A correction note showing one improvement after feedback.
6. A short reflection explaining what you learned, what was difficult, and what you will practise next.

Presentation check: keep the work neat, label important parts, use correct vocabulary, and be ready to explain your choices to a classmate or teacher.
