KITABU QUEST S1 General Science

Uganda NCDC learner book

Mascot: chameleon

This KITABU QUEST book turns the curriculum into short lessons, worked examples, guided activities, practice, review, and home links for Uganda learners.

How To Use This Book

This book helps S1 learners study General Science one teachable topic at a time.

1. Start with the inquiry question and say what you already know.
2. Read the Learn section slowly and mark new words.
3. Try the worked example before reading the full solution.
4. Complete the activity and practice tasks.
5. Correct your answer using the success criteria.
6. Ask for support when your answer is still unclear.

Subject method: Observe, ask questions, test safely, record evidence, and explain findings.

Learning Skills In This Book

Each topic builds knowledge, skill, values, communication, collaboration, critical thinking, creativity, digital awareness, and self-confidence.

Study actively: speak answers aloud, draw when useful, show your working, cite evidence, use local examples, and correct mistakes after feedback.

A strong answer is specific. It names the idea, gives evidence or method, applies it to the task, and checks whether it answers the question.

Table Of Contents

Use this table to move through the book one topic at a time. Each topic has a lesson opener, clear teaching, a model or example, guided work, practice, and checks for understanding.

1. GENERAL SCIENCE SYLLABUS
2. The Uganda Vision 2040 aims to transform Uganda into a modern
3. The ESSP further outlines what the review implies: "This
4. General Science Topic
5. GENERAL SCIENCE SYLLABUS
6. THE CURRICULUM
7. GENERAL SCIENCE SYLLABUS

As you finish each topic, return to the success criteria and correct one answer before moving on.

GENERAL SCIENCE SYLLABUS: Lesson Opener

Learning focus: GENERAL SCIENCE SYLLABUS

Country link: a safe Uganda observation, model, data table, or investigation for GENERAL SCIENCE SYLLABUS.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

By the end of this topic, you should be able to:

- investigate and explain general science syllabus using evidence

Inquiry questions:

- How can general science syllabus help you solve a real problem?

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Learn

GENERAL SCIENCE SYLLABUS is learned by turning the topic into a clear, safe, evidence-based science task.

Core idea:

- Name the science idea before starting: structure, process, material, force, energy, organism, environment, or system.
- Use a diagram, data table, labelled model, safe observation, or teacher-approved investigation.
- Record what is seen or measured, not what is guessed.
- Explain the result using the vocabulary from this topic.
- Finish with one conclusion and one question for further study.

Key words:

- GENERAL SCIENCE SYLLABUS
- GENERAL
- SCIENCE
- SYLLABUS
- concept
- observation
- evidence
- safety

GENERAL SCIENCE SYLLABUS: Worked Example

Investigation model for GENERAL SCIENCE SYLLABUS: Turn the topic into a safe, clear classroom investigation or model.

1. Question: write one question that can be answered by observing, comparing, classifying, measuring, modelling, or reading data.
2. Materials: list safe classroom materials, diagrams, samples, cards, tables, or teacher-approved apparatus.
3. Method: do one step at a time and keep one condition fair where comparison is needed.
4. Safety: name any heat, glass, sharp tool, chemical, hygiene, electrical, or body-safety rule before starting.
5. Record: use a labelled table, diagram, or sentence notes.
6. Conclusion: state what the evidence shows and one limit of the investigation.

Answer check: a strong response names the concept, uses correct vocabulary, records evidence, and does not claim more than the evidence supports.

GENERAL SCIENCE SYLLABUS: Vocabulary And Study Skill

Use these words and study moves before you practise GENERAL SCIENCE SYLLABUS. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- GENERAL SCIENCE SYLLABUS
- GENERAL
- SCIENCE
- SYLLABUS
- concept
- observation
- evidence
- safety

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about GENERAL SCIENCE SYLLABUS without a clear example, method, or evidence.

GENERAL SCIENCE SYLLABUS: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a safe Uganda observation, model, data table, or investigation for GENERAL SCIENCE SYLLABUS.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

GENERAL SCIENCE SYLLABUS: Practice And Correction

Practice for GENERAL SCIENCE SYLLABUS:

Main outcome: investigate and explain general science syllabus using evidence.

1. Write one safe investigation question.
2. Name materials and observations needed.
3. Use the evidence to write a conclusion.

Answer check:

A strong science answer names the idea, uses correct units or labels where needed, records evidence, and writes a conclusion that follows from the evidence.

Safety check: use only teacher-approved materials and never test mains electricity, heat, sharp tools, or chemicals without direct supervision.

GENERAL SCIENCE SYLLABUS: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from GENERAL SCIENCE SYLLABUS.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Outcome Check

Outcome check for GENERAL SCIENCE SYLLABUS: Investigate and explain general science syllabus using evidence.

1. State a safe investigation question.
2. Name the evidence needed.
3. Write a conclusion from the evidence.

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

The Uganda Vision 2040 aims to transform Uganda into a modern: Lesson Opener

Learning focus: The Uganda Vision 2040 aims to transform Uganda into a modern

Country link: a safe Uganda observation, model, data table, or investigation for The Uganda Vision 2040 aims to transform Uganda into a modern.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

By the end of this topic, you should be able to:

- investigate and explain the uganda vision 2040 aims to transform uganda into a modern using evidence

Inquiry questions:

- How can the uganda vision 2040 aims to transform uganda into a modern help you solve a real problem?

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

The Uganda Vision 2040 aims to transform Uganda into a modern: Learn

The Uganda Vision 2040 aims to transform Uganda into a modern is learned by turning the topic into a clear, safe, evidence-based science task.

Core idea:

- Name the science idea before starting: structure, process, material, force, energy, organism, environment, or system.
- Use a diagram, data table, labelled model, safe observation, or teacher-approved investigation.
- Record what is seen or measured, not what is guessed.
- Explain the result using the vocabulary from this topic.
- Finish with one conclusion and one question for further study.

Key words:

- The Uganda Vision 2040 aims to transform Uganda into a modern
- Uganda
- Vision
- 2040
- aims
- transform
- into
- modern

The Uganda Vision 2040 aims to transform Uganda into a modern: Worked Example

Investigation model for The Uganda Vision 2040 aims to transform Uganda into a modern: Turn the topic into a safe, clear classroom investigation or model.

1. Question: write one question that can be answered by observing, comparing, classifying, measuring, modelling, or reading data.
2. Materials: list safe classroom materials, diagrams, samples, cards, tables, or teacher-approved apparatus.
3. Method: do one step at a time and keep one condition fair where comparison is needed.
4. Safety: name any heat, glass, sharp tool, chemical, hygiene, electrical, or body-safety rule before starting.
5. Record: use a labelled table, diagram, or sentence notes.
6. Conclusion: state what the evidence shows and one limit of the investigation.

Answer check: a strong response names the concept, uses correct vocabulary, records evidence, and does not claim more than the evidence supports.

The Uganda Vision 2040 aims to transform Uganda into a modern: Vocabulary And Study Skill

Use these words and study moves before you practise The Uganda Vision 2040 aims to transform Uganda into a modern. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- The Uganda Vision 2040 aims to transform Uganda into a modern
- Uganda
- Vision
- 2040
- aims
- transform
- into
- modern

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about The Uganda Vision 2040 aims to transform Uganda into a modern without a clear example, method, or evidence.

The Uganda Vision 2040 aims to transform Uganda into a modern: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a safe Uganda observation, model, data table, or investigation for The Uganda Vision 2040 aims to transform Uganda into a modern.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

The Uganda Vision 2040 aims to transform Uganda into a modern: Practice And Correction

Practice for The Uganda Vision 2040 aims to transform Uganda into a modern:

Main outcome: investigate and explain the uganda vision 2040 aims to transform uganda into a modern using evidence.

1. Write one safe investigation question.
2. Name materials and observations needed.
3. Use the evidence to write a conclusion.

Answer check:

A strong science answer names the idea, uses correct units or labels where needed, records evidence, and writes a conclusion that follows from the evidence.

Safety check: use only teacher-approved materials and never test mains electricity, heat, sharp tools, or chemicals without direct supervision.

The Uganda Vision 2040 aims to transform Uganda into a modern: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from The Uganda Vision 2040 aims to transform Uganda into a modern.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- evidence is specific
- safety is considered
- conclusion uses the evidence

The Uganda Vision 2040 aims to transform Uganda into a modern: Outcome Check

Outcome check for The Uganda Vision 2040 aims to transform Uganda into a modern: Investigate and explain the Uganda Vision 2040 aims to transform Uganda into a modern using evidence.

1. State a safe investigation question.
2. Name the evidence needed.
3. Write a conclusion from the evidence.

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

General Science Topic: Vocabulary And Study Skill

Use these words and study moves before you practise General Science Topic. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- General Science Topic
- General
- Science
- Topic
- concept
- observation
- evidence
- safety

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about General Science Topic without a clear example, method, or evidence.

General Science Topic: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a safe Uganda observation, model, data table, or investigation for General Science Topic.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

General Science Topic: Practice And Correction

Practice for General Science Topic:

Main outcome: investigate and explain general science topic using evidence.

1. Write one safe investigation question.
2. Name materials and observations needed.
3. Use the evidence to write a conclusion.

Answer check:

A strong science answer names the idea, uses correct units or labels where needed, records evidence, and writes a conclusion that follows from the evidence.

Safety check: use only teacher-approved materials and never test mains electricity, heat, sharp tools, or chemicals without direct supervision.

General Science Topic: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from General Science Topic.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- evidence is specific
- safety is considered
- conclusion uses the evidence

General Science Topic: Outcome Check

Outcome check for General Science Topic: Investigate and explain general science topic using evidence.

1. State a safe investigation question.
2. Name the evidence needed.
3. Write a conclusion from the evidence.

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Lesson Opener

Learning focus: GENERAL SCIENCE SYLLABUS

Country link: a safe Uganda observation, model, data table, or investigation for GENERAL SCIENCE SYLLABUS.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

By the end of this topic, you should be able to:

- investigate and explain general science syllabus using evidence

Inquiry questions:

- How can general science syllabus help you solve a real problem?

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Learn

GENERAL SCIENCE SYLLABUS is learned by turning the topic into a clear, safe, evidence-based science task.

Core idea:

- Name the science idea before starting: structure, process, material, force, energy, organism, environment, or system.
- Use a diagram, data table, labelled model, safe observation, or teacher-approved investigation.
- Record what is seen or measured, not what is guessed.
- Explain the result using the vocabulary from this topic.
- Finish with one conclusion and one question for further study.

Key words:

- GENERAL SCIENCE SYLLABUS
- GENERAL
- SCIENCE
- SYLLABUS
- concept
- observation
- evidence
- safety

GENERAL SCIENCE SYLLABUS: Worked Example

Investigation model for GENERAL SCIENCE SYLLABUS: Turn the topic into a safe, clear classroom investigation or model.

1. Question: write one question that can be answered by observing, comparing, classifying, measuring, modelling, or reading data.
2. Materials: list safe classroom materials, diagrams, samples, cards, tables, or teacher-approved apparatus.
3. Method: do one step at a time and keep one condition fair where comparison is needed.
4. Safety: name any heat, glass, sharp tool, chemical, hygiene, electrical, or body-safety rule before starting.
5. Record: use a labelled table, diagram, or sentence notes.
6. Conclusion: state what the evidence shows and one limit of the investigation.

Answer check: a strong response names the concept, uses correct vocabulary, records evidence, and does not claim more than the evidence supports.

GENERAL SCIENCE SYLLABUS: Vocabulary And Study Skill

Use these words and study moves before you practise GENERAL SCIENCE SYLLABUS. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- GENERAL SCIENCE SYLLABUS
- GENERAL
- SCIENCE
- SYLLABUS
- concept
- observation
- evidence
- safety

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about GENERAL SCIENCE SYLLABUS without a clear example, method, or evidence.

GENERAL SCIENCE SYLLABUS: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a safe Uganda observation, model, data table, or investigation for GENERAL SCIENCE SYLLABUS.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

GENERAL SCIENCE SYLLABUS: Practice And Correction

Practice for GENERAL SCIENCE SYLLABUS:

Main outcome: investigate and explain general science syllabus using evidence.

1. Write one safe investigation question.
2. Name materials and observations needed.
3. Use the evidence to write a conclusion.

Answer check:

A strong science answer names the idea, uses correct units or labels where needed, records evidence, and writes a conclusion that follows from the evidence.

Safety check: use only teacher-approved materials and never test mains electricity, heat, sharp tools, or chemicals without direct supervision.

GENERAL SCIENCE SYLLABUS: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from GENERAL SCIENCE SYLLABUS.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Outcome Check

Outcome check for GENERAL SCIENCE SYLLABUS: Investigate and explain general science syllabus using evidence.

1. State a safe investigation question.
2. Name the evidence needed.
3. Write a conclusion from the evidence.

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

THE CURRICULUM: Lesson Opener

Learning focus: THE CURRICULUM

Country link: a safe Uganda observation, model, data table, or investigation for THE CURRICULUM.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

By the end of this topic, you should be able to:

- investigate and explain the curriculum using evidence

Inquiry questions:

- How can the curriculum help you solve a real problem?

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

THE CURRICULUM: Learn

THE CURRICULUM is learned by turning the topic into a clear, safe, evidence-based science task.

Core idea:

- Name the science idea before starting: structure, process, material, force, energy, organism, environment, or system.
- Use a diagram, data table, labelled model, safe observation, or teacher-approved investigation.
- Record what is seen or measured, not what is guessed.
- Explain the result using the vocabulary from this topic.
- Finish with one conclusion and one question for further study.

Key words:

- THE CURRICULUM
- CURRICULUM
- concept
- observation
- evidence
- safety
- conclusion

THE CURRICULUM: Worked Example

Investigation model for THE CURRICULUM: Turn the topic into a safe, clear classroom investigation or model.

1. Question: write one question that can be answered by observing, comparing, classifying, measuring, modelling, or reading data.
2. Materials: list safe classroom materials, diagrams, samples, cards, tables, or teacher-approved apparatus.
3. Method: do one step at a time and keep one condition fair where comparison is needed.
4. Safety: name any heat, glass, sharp tool, chemical, hygiene, electrical, or body-safety rule before starting.
5. Record: use a labelled table, diagram, or sentence notes.
6. Conclusion: state what the evidence shows and one limit of the investigation.

Answer check: a strong response names the concept, uses correct vocabulary, records evidence, and does not claim more than the evidence supports.

THE CURRICULUM: Vocabulary And Study Skill

Use these words and study moves before you practise THE CURRICULUM. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- THE CURRICULUM
- CURRICULUM
- concept
- observation
- evidence
- safety
- conclusion

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about THE CURRICULUM without a clear example, method, or evidence.

THE CURRICULUM: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a safe Uganda observation, model, data table, or investigation for THE CURRICULUM.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

THE CURRICULUM: Practice And Correction

Practice for THE CURRICULUM:

Main outcome: investigate and explain the curriculum using evidence.

1. Write one safe investigation question.
2. Name materials and observations needed.
3. Use the evidence to write a conclusion.

Answer check:

A strong science answer names the idea, uses correct units or labels where needed, records evidence, and writes a conclusion that follows from the evidence.

Safety check: use only teacher-approved materials and never test mains electricity, heat, sharp tools, or chemicals without direct supervision.

THE CURRICULUM: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from THE CURRICULUM.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- evidence is specific
- safety is considered
- conclusion uses the evidence

THE CURRICULUM: Outcome Check

Outcome check for THE CURRICULUM: Investigate and explain the curriculum using evidence.

1. State a safe investigation question.
2. Name the evidence needed.
3. Write a conclusion from the evidence.

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Lesson Opener

Learning focus: GENERAL SCIENCE SYLLABUS

Country link: a safe Uganda observation, model, data table, or investigation for GENERAL SCIENCE SYLLABUS.

Progression focus: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

By the end of this topic, you should be able to:

- investigate and explain general science syllabus using evidence

Inquiry questions:

- How can general science syllabus help you solve a real problem?

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Learn

GENERAL SCIENCE SYLLABUS is learned by turning the topic into a clear, safe, evidence-based science task.

Core idea:

- Name the science idea before starting: structure, process, material, force, energy, organism, environment, or system.
- Use a diagram, data table, labelled model, safe observation, or teacher-approved investigation.
- Record what is seen or measured, not what is guessed.
- Explain the result using the vocabulary from this topic.
- Finish with one conclusion and one question for further study.

Key words:

- GENERAL SCIENCE SYLLABUS
- GENERAL
- SCIENCE
- SYLLABUS
- concept
- observation

GENERAL SCIENCE SYLLABUS: Worked Example

Investigation model for GENERAL SCIENCE SYLLABUS: Turn the topic into a safe, clear classroom investigation or model.

1. Question: write one question that can be answered by observing, comparing, classifying, measuring, modelling, or reading data.
2. Materials: list safe classroom materials, diagrams, samples, cards, tables, or teacher-approved apparatus.
3. Method: do one step at a time and keep one condition fair where comparison is needed.
4. Safety: name any heat, glass, sharp tool, chemical, hygiene, electrical, or body-safety rule before starting.
5. Record: use a labelled table, diagram, or sentence notes.
6. Conclusion: state what the evidence shows and one limit of the investigation.

Answer check: a strong response names the concept, uses correct vocabulary, records evidence, and does not claim more than the evidence supports.

GENERAL SCIENCE SYLLABUS: Vocabulary And Study Skill

Use these words and study moves before you practise GENERAL SCIENCE SYLLABUS. Good vocabulary helps you read the question, choose the right method, and explain your answer clearly.

Key words:

- GENERAL SCIENCE SYLLABUS
- GENERAL
- SCIENCE
- SYLLABUS
- concept
- observation
- evidence
- safety

Study skill:

1. Choose three key words.
2. Say each word in your own words.
3. Give one example from Uganda.
4. Use each word in a correct sentence, calculation step, diagram label, or oral answer.
5. Ask a partner to check whether your example matches the topic.

Common mistake to avoid: giving a general answer about GENERAL SCIENCE SYLLABUS without a clear example, method, or evidence.

GENERAL SCIENCE SYLLABUS: Guided Activity

Work with a partner or small group.

1. Read the inquiry question again.
2. Choose one real situation linked to a safe Uganda observation, model, data table, or investigation for GENERAL SCIENCE SYLLABUS.
3. Decide what evidence, method, vocabulary, tool, text, map, diagram, movement, or example is needed.
4. Complete the task together and explain each step aloud.
5. Compare your answer with another group.
6. Improve one part after feedback.

Group role check: one learner reads the task, one records ideas, one checks vocabulary or working, and one reports the answer.

GENERAL SCIENCE SYLLABUS: Practice And Correction

Practice for GENERAL SCIENCE SYLLABUS:

Main outcome: investigate and explain general science syllabus using evidence.

1. Write one safe investigation question.
2. Name materials and observations needed.
3. Use the evidence to write a conclusion.

Answer check:

A strong science answer names the idea, uses correct units or labels where needed, records evidence, and writes a conclusion that follows from the evidence.

Safety check: use only teacher-approved materials and never test mains electricity, heat, sharp tools, or chemicals without direct supervision.

GENERAL SCIENCE SYLLABUS: Challenge And Remediation

Use this page after practice.

If you need support:

1. Re-read the success criteria.
2. Copy the worked example steps as headings.
3. Replace the model details with details from GENERAL SCIENCE SYLLABUS.
4. Ask one clear question about the step that is confusing.

If you are ready for a challenge:

1. Create a new task from school, home, community, environment, technology, sport, art, market, or fieldwork.
2. Solve or answer it using correct vocabulary.
3. Explain why your answer is reasonable.
4. Write one extension question for a classmate.

Check:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Outcome Check

Outcome check for GENERAL SCIENCE SYLLABUS: Investigate and explain general science syllabus using evidence.

1. State a safe investigation question.
2. Name the evidence needed.
3. Write a conclusion from the evidence.

Success criteria:

- evidence is specific
- safety is considered
- conclusion uses the evidence

GENERAL SCIENCE SYLLABUS: Review Clinic 1

Use this review clinic to strengthen General Science without copying earlier answers.

1. Choose one idea from GENERAL SCIENCE SYLLABUS that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

The Uganda Vision 2040 aims to transform Uganda into a modern: Review Clinic 2

Use this review clinic to strengthen General Science without copying earlier answers.

1. Choose one idea from The Uganda Vision 2040 aims to transform Uganda into a modern that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

The ESSP further outlines what the review implies: "This: Review Clinic 3

Use this review clinic to strengthen General Science without copying earlier answers.

1. Choose one idea from The ESSP further outlines what the review implies: "This that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

General Science Topic: Review Clinic 4

Use this review clinic to strengthen General Science without copying earlier answers.

1. Choose one idea from General Science Topic that was difficult.
2. Explain the idea in your own words.
3. Make one new example from Uganda.
4. Create one question that checks knowledge.
5. Create one question that checks skill or application.
6. Answer both questions and correct your work.

Challenge: Turn the idea into a drawing, table, map, dialogue, model, demonstration, or worked solution.

GENERAL SCIENCE SYLLABUS: Application Workshop 1

Application workshop 1 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

The Uganda Vision 2040 aims to transform Uganda into a modern: Application Workshop 2

Application workshop 2 for The Uganda Vision 2040 aims to transform Uganda into a modern.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

The ESSP further outlines what the review implies: "This: Application Workshop 3

Application workshop 3 for The ESSP further outlines what the review implies: "This.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

General Science Topic: Application Workshop 4

Application workshop 4 for General Science Topic.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

GENERAL SCIENCE SYLLABUS: Application Workshop 5

Application workshop 5 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

THE CURRICULUM: Application Workshop 6

Application workshop 6 for THE CURRICULUM.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

GENERAL SCIENCE SYLLABUS: Application Workshop 7

Application workshop 7 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

GENERAL SCIENCE SYLLABUS: Application Workshop 8

Application workshop 8 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

The Uganda Vision 2040 aims to transform Uganda into a modern: Application Workshop 9

Application workshop 9 for The Uganda Vision 2040 aims to transform Uganda into a modern.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

The ESSP further outlines what the review implies: "This: Application Workshop 10

Application workshop 10 for The ESSP further outlines what the review implies: "This.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

General Science Topic: Application Workshop 11

Application workshop 11 for General Science Topic.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

GENERAL SCIENCE SYLLABUS: Application Workshop 12

Application workshop 12 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

THE CURRICULUM: Application Workshop 13

Application workshop 13 for THE CURRICULUM.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

GENERAL SCIENCE SYLLABUS: Application Workshop 14

Application workshop 14 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

GENERAL SCIENCE SYLLABUS: Application Workshop 15

Application workshop 15 for GENERAL SCIENCE SYLLABUS.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

The Uganda Vision 2040 aims to transform Uganda into a modern: Application Workshop 16

Application workshop 16 for The Uganda Vision 2040 aims to transform Uganda into a modern.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

The ESSP further outlines what the review implies: "This: Application Workshop 17"

Application workshop 17 for The ESSP further outlines what the review implies: "This.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

General Science Topic: Application Workshop 18

Application workshop 18 for General Science Topic.

Grade move: build lower-secondary foundations with clear vocabulary and guided application; connect evidence, diagrams, safety, and conclusions.

Use this page to deepen the science idea with evidence.

1. Write one question that can be answered by observation, model, measurement, classification, or data reading.
2. Name safe materials, diagrams, samples, tables, or apparatus that would help.
3. Predict what you expect and explain why.
4. Record evidence in a labelled table, diagram, or sentence notes.
5. Write a conclusion that answers the question without adding unsupported guesses.
6. Add one safety rule and one limitation of the evidence.

Extension: suggest one improved investigation for a future lesson.

Glossary

Use this glossary to revise important words in General Science.

- GENERAL SCIENCE SYLLABUS: Explain this term using an example from the book, your school, or your community.
- The Uganda Vision 2040 aims to transform Uganda into a modern: Explain this term using an example from the book, your school, or your community.
- The ESSP further outlines what the review implies: "This: Explain this term using an example from the book, your school, or your community.
- General Science Topic: Explain this term using an example from the book, your school, or your community.
- GENERAL SCIENCE SYLLABUS: Explain this term using an example from the book, your school, or your community.
- THE CURRICULUM: Explain this term using an example from the book, your school, or your community.
- GENERAL SCIENCE SYLLABUS: Explain this term using an example from the book, your school, or your community.

Add five more words from your lessons and write your own meanings.

Answer And Teacher Notes

A strong General Science answer states the idea, uses correct scientific vocabulary, records observations or data, includes units or labels where needed, and writes a conclusion that follows from evidence. Safety rules always come first. If evidence is missing, repeat the observation safely or explain what evidence would be needed.

Final Project

Create a final project for General Science that shows what you can now do independently.

Your project must include:

1. A clear title.
2. A real-life problem, question, text, performance, investigation, design, or worked task.
3. Evidence from at least three lessons in this book.
4. A drawing, table, map, chart, model, dialogue, paragraph, performance plan, practical product, or worked solution.
5. A correction note showing one improvement after feedback.
6. A short reflection explaining what you learned, what was difficult, and what you will practise next.

Presentation check: keep the work neat, label important parts, use correct vocabulary, and be ready to explain your choices to a classmate or teacher.
